Report of the Directors

The Board of Directors (the "Board" or the "Directors") submit their report together with the audited financial statements for the financial year ended 30 June 2025.

Principal Activities

GAM Star Fund p.l.c. (the "Company") was incorporated and registered in Ireland under the Companies Act 2014 as an investment company with variable capital on 20 February 1998 and is authorised by the Central Bank of Ireland ("the Central Bank") as an Undertaking for Collective Investment in Transferable Securities ("UCITS") under the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the "UCITS Regulations") and is subject to the Central Bank (Supervision and Enforcement) Act, 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations").

It is an umbrella type company, in that shares may be issued in relation to different funds (the "Funds") from time to time. A separate portfolio of assets will be maintained for each Fund and will be invested in accordance with the investment objective and policies applicable to such a Fund as set out in "Investments Objectives". Segregated liability exists between Funds.

Certain Funds are authorised for sale in Austria, Bahrain, Belgium, Bulgaria, Chile, Denmark, Finland, France, Germany, Iceland, Ireland, Italy, Liechtenstein, Luxembourg, the Netherlands, Norway, Portugal, Singapore, Spain, Switzerland, Sweden, Taiwan and the United Kingdom.

Risk Management Objectives

Details of risk management objectives are shown in note 3.

Results and Distributions

The results and distributions for the financial year are stated in the Profit and Loss Account and Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders.

Significant events during the Financial Year

Please refer note 21 for further details.

Review of the Business and Future Developments

Please refer to the commentary of each Fund on the following pages for a review of each Fund's activities during the financial year.

Events since Financial Year End

Please refer note 22 for further details.

Directors

The Directors of the Company during the financial year ended 30 June 2025 were:

Andrew Bates (Resigned 1 October 2025)
Raymond O'Neill (Appointed 1 October 2025)
Martin Jufer (Appointed 28 February 2025)
David Richard John Kemp (Appointed 14 March 2025)
Kishen Pattani (Resigned 14 March 2025)
Deborah Reidy (Resigned 1 August 2025)
Samantha McConnell (Appointed 1 August 2025)

Directors' fees for the financial year are stated in note 9.

Directors' and Secretary's Interests

None of the Directors or Secretary or their families held any beneficial interest in the share capital of the Company during the financial year ended 30 June 2025.

Transactions Involving Directors

The Board are not aware of any contracts or arrangements of any significance in relation to the business of the Company in which the Directors had any interest as defined in the Companies Act 2014 at any time during the financial year from 1 July 2024 to 30 June 2025, other than as disclosed in note 9.

Transactions with Connected Persons (for the purposes of Central Bank of Ireland UCITS Regulation 43(1))

The Board are satisfied:

- (i) that there are arrangements (evidenced by written procedures) in place to ensure that all transactions with connected persons (for the purposes of the Central Bank of Ireland UCITS Regulation 43(1)) are conducted at arm's length and in the best interest of shareholders and
- (ii) that any transactions with connected persons entered into during the financial year complied with the obligation of (i) above as attested by Bridge Fund Management Limited (the "Manager") through regular updates to the Board.

Statement of Directors' Responsibilities

The Directors are responsible for preparing the Directors' Report and the financial statements in accordance with Irish law.

Irish law requires the Directors to prepare financial statements for each financial year. The Directors have prepared the financial statements in accordance with Financial Reporting Standard ("FRS") 102 and the UCITS Regulations.

Under Irish law the Directors shall not approve the financial statements unless they are satisfied that they give a true and fair view of the Company's assets, liabilities and financial position as at the end of the financial year and of the profit or loss of the Company for the financial year.

In preparing these financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether the financial statements have been prepared in accordance with FRS 102 and ensure that they contain the additional information required by the Companies Act 2014; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.

The Directors are responsible for keeping adequate accounting records that are sufficient to:

- correctly record and explain the transactions of the Company;
- enable, at any time, the assets, liabilities, financial position and profit or loss of the Company to be determined with reasonable accuracy; and

Statement of Directors' Responsibilities, continued

 enable the Directors to ensure that the financial statements comply with the Companies Act 2014 and enable those financial statements to be audited.

The Directors believe that they have complied with the requirement to maintain adequate accounting records through the Manager's engagement of the services of an experienced Delegate Administrator for the purpose of maintaining adequate accounting records.

The Directors are responsible for safeguarding the assets of the Company. In this regard they have entrusted the assets of the Company to the Depositary pursuant to the terms of a Depositary Agreement. The Directors have a general responsibility for taking such steps as are reasonably open to them to prevent and detect fraud and other irregularities.

Corporate Governance

The Company is subject to and complies with Irish Statute comprising the Companies Act 2014, and the UCITS Regulations. The Company does not apply additional requirements in addition to those required by the above. Each of the service providers engaged by the Company is subject to their own corporate governance requirements.

Financial Reporting Process – Description of Main Features

The Board has delegated to the Manager the responsibility for establishing and maintaining adequate internal control and risk management systems of the Company in relation to the financial reporting process whilst maintaining effective oversight of this process. Such systems are designed to manage rather than eliminate the risk of failure to achieve the Company's financial reporting objectives and can only provide reasonable and not absolute assurance against material misstatement or loss. This includes appointing the Manager to maintain the accounting records of the Company independently of each of the Co-Investment Managers, Delegate Investment Managers and State Street Custodial Services (Ireland). The Manager has delegated this responsibility to the Delegate Administrator.

The Manager is contractually obliged to maintain adequate accounting records as required by the Amended and Restated Management Agreement dated 11 July 2017 as may be amended from time to time and in compliance with local laws, and effective 1 November 2024 GAM Fund Management Limited became part of the Apex Group by way of a merger by acquisition. Please refer to note 21 for further detail. The Delegate Administrator is contractually obliged to maintain adequate accounting records as required by the Administration Agreement dated 6 March 2016 as may be amended from time to time and in compliance with local laws. To that end the Delegate Administrator performs regular reconciliations of its records to those of the Depositary. The Delegate Administrator is also contractually obliged to prepare for review and approval by the Board the annual report including financial statements intended to give a true and fair view.

The Board evaluates and discusses significant accounting and reporting issues as the need arises. The Board also assesses and evaluates the Delegate Administrator's financial accounting and reporting routines and further assesses and evaluates the external auditors' performance, qualifications and independence. The Manager has operating responsibility for internal control in relation to the financial reporting process and the Manager's report to the Board.

Risk Assessment

The Board is responsible for assessing the risk of irregularities whether caused by fraud or error in financial reporting and ensuring the processes are in place for the timely identification of internal and external matters with a potential effect on financial reporting. The Board has also put in place processes to identify changes in accounting rules and to ensure that these changes are accurately reflected in the Company's financial statements.

The current imposition of economic sanctions against Russia and tensions in the Middle East may result in restricted or no access to certain markets, investments, service providers or counterparties and could negatively impact the performance of any Funds which have direct exposure to these regions. The ultimate impact on the Company and the Funds remains uncertain and can vary according to the countries, asset classes, industry sectors and securities they are invested in. For GAM Sustainable Emerging Equity, the value of two Russian securities have been written off to 0(Nil) during the 2023 accounting period. These positions remained valued at nil during the 2024 and 2025 accounting periods. The decision has been taken as the securities were not listed on any regulated markets. This decision is in line with other market participants. The Co-Investment Managers and Delegate Investment Managers will continue to monitor the economic impact of worldwide geopolitical events.

Control Activities

The Manager, Co-Investment Manager and Delegate Administrator are contractually obliged to design and maintain control structures to manage the risks which the Board judges to be significant for internal control over financial reporting. These control structures include appropriate division of responsibilities and specific control activities aimed at detecting or preventing the risk of significant deficiencies in financial reporting for every significant account in the financial statements and the related notes in the Company's annual report.

Information and Communication

The Company's policies and the Board's instructions with relevance for financial reporting are updated and communicated via appropriate channels, such as e-mail correspondence and meetings to ensure that all financial reporting information requirements are met in a complete and accurate manner.

Monitorina

The Board receives periodic presentations and review reports from the Depositary, each of the Co-Investment and Delegate Investment Managers, the Manager and the Delegate Administrator as appropriate. The Board also has an annual process to ensure that appropriate measures are taken to consider and address the shortcomings identified and measures recommended by the independent auditors.

Given the contractual obligations on the Manager and the Delegate Administrator, the Board has concluded that there is currently no need for the Company to have a separate internal audit function or an audit committee in order for the Board to perform effective monitoring and oversight of the internal control and risk management systems of the Company in relation to the financial reporting process.

GAM Star Fund p.l.c.

Shareholder Meetings

The General Meetings of the Company are held in Ireland. Twenty one days notice is given in respect of each general meeting. A proxy may attend on behalf of any shareholder. An ordinary resolution is a resolution passed by a plurality of votes cast and a special resolution is a resolution passed by a majority of 75% or more of the votes cast.

Each of the shares entitles the holder to attend and vote at meetings of the Company. Matters may be determined by a meeting of shareholders on a show of hands unless a poll is requested. Each shareholder has one vote on a show of hands. Each share gives the holder one vote in relation to any matters relating to the Company which are submitted to shareholders for a vote by poll.

No class of shares confers on the holder thereof any preferential or pre-emptive rights or any rights to participate in the profits and dividends of any other share class or any voting rights in relation to matters relating solely to any other share class.

Any resolution to alter the class rights of the shares requires the approval of three quarters of the holders of the shares represented or present and voting at a general meeting of the class. The quorum for any general meeting of the class convened to consider any alteration to the class rights of the shares shall be such number of shareholders being two or more persons whose holdings comprise one third of the shares.

Each of the shares other than subscriber shares entitles the shareholder to participate equally on a pro-rata basis in the dividends and net assets of the fund in respect of which the shares have been issued, save in the case of dividends declared prior to becoming a shareholder.

Subscriber shares entitle the shareholders holding them to attend and vote at all general meetings of the Company but do not entitle the holders to participate in the dividends or net assets of the Company.

Composition and Operation of Board and Committees

There are currently two directors who are independent non executive. None of the Directors have entered into an employment or service contract with the Company. The Articles of Association do not provide for retirement of Directors by rotation. However, the Directors may be removed by the shareholders by ordinary resolution in accordance with the procedures established under the Companies Act 2014. Currently the Board meets at least quarterly. There are no standing sub-committees of the Board however sub committees of 2 Directors can convene on an ad hoc basis if required to do so.

Accounting Records

The measures taken by the Board to secure compliance with the Company's obligations to keep adequate accounting records are the use of appropriate systems and procedures and the employment of competent persons. The Board have appointed the Manager for the purpose of maintaining accounting records. The Manager has delegated these responsibilities effective from 7 March 2016 to State Street Fund Services (Ireland) Limited as Delegate Administrator. Accordingly, the books of account are kept at 78 Sir John Rogerson's Quay, Dublin 2, D02 HD32, Ireland.

The integrity of these financial statements published on www.gam.com remain the responsibility of the Board.

Legislation in the Republic of Ireland governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

Relevant Audit Information

In accordance with section 330 and 332 of the Companies Act 2014, the Directors confirm that all audit information relating to the Company has been made available to PricewaterhouseCoopers.

In accordance with section 330 of the Companies Act 2014, the Directors have taken all steps that ought to have been taken by the Board in order to make themselves aware of any relevant audit information and to establish that PricewaterhouseCoopers are aware of that information.

Directors Compliance Statement

In accordance with Section 225 of the Companies Act 2014, the Directors:

- (a) acknowledge that they are responsible for securing the Company's compliance with its relevant obligations, as defined by the Companies Act 2014; and
- (b) confirm that
 - a compliance policy statement has been prepared setting out the Company's policies (that, in the Directors' opinion, are appropriate to the Company) for ensuring compliance by the Company with its relevant obligations;
 - adequate structures are in place, that in the Directors' opinion, are designed to secure material compliance with the Company's relevant obligations; and
 - iii) an annual review procedure has been put in place to review the Company's relevant obligations and ensure a structure is in place to comply with these obligations.

Independent Auditors

The independent auditors, PricewaterhouseCoopers, have indicated their willingness to remain in office in accordance with section 383(2) of the Companies Act 2014.

Approval of Financial Statements

These financial statements were approved by the Board of Directors on 29 October 2025.

On behalf of the Board of Directors:

Signed by:

Samantha McConnell Raymond O'Nill

603247CB1E284E8...

Director 29 October 2025 Director

Investment Objectives (unaudited)

The investment objectives of each Fund are set out below.

GAM Star Alpha Spectrum

The investment objective of the Fund is to seek to achieve an attractive return on capital while simultaneously attempting to limit the risk of capital loss. The Fund aims to achieve this investment objective by gaining exposure to equity, equity hedge, fixed income and trading strategies. Such exposure may be achieved directly and/or through financial derivative instruments and/or investment in open - ended collective investment schemes deploying equity long only, equity hedge, fixed income and trading strategies.

GAM Star Alpha Technology

(Merged into Liontrust Global Funds - Global Alpha Long short Fund on 24 January 2025, and is no longer available for investment.)

The investment objective of the Fund was to achieve long term capital appreciation. The Fund sought to achieve this objective by taking long and short positions primarily in equities or equity related derivative contracts of technology related companies. Such companies were listed on or dealt in Recognised Markets globally (including in Emerging Markets as described in the Prospectus) and up to 10% of its Net Asset Value ("NAV") might have been invested in unlisted equities of such companies.

GAM Star Asian Equity

The investment objective of the Fund is to achieve capital appreciation through investment primarily in quoted securities which are issued by public companies with principal offices or significant business activities in the Asian region, excluding Japan.

GAM Star Global Flexible

(formerly known as GAM Star Global Balanced)

The investment objective of the Fund is to achieve capital preservation accompanied by stable returns via a dynamic asset allocation, using a flexible approach. The Fund aims to achieve this investment objective by primarily gaining exposure to the following range of asset classes: equities and equity related securities, fixed income securities, commodities and alternative assets (other than commodities), in which it is not permitted to directly invest (such as real estate and fund of hedge funds). Such exposure may be achieved directly (where permissible in accordance with UCITS requirements) and/or indirectly through financial derivative instruments, collective investment schemes, and/or financial instruments constituting transferable securities such as exchange traded notes and/or exchange traded commodities. Allocations will be made at the Co-Investment Manager's discretion, both within each asset class and among the asset classes.

GAM Star Capital Appreciation US Equity

The investment objective of the Fund is to achieve long-term capital appreciation. It will be the policy of the Fund to invest primarily in equities and other equity related securities (including preferred shares, convertible bonds, American Depositary Receipts and exchange traded funds) which are issued by companies with principal offices in the United States of America, which exercise their primary economic activity in the United States of America, or which are listed on or dealt in a Recognised Market in the United States of America ("US Equities").

GAM Star Cat Bond

The investment objective of the Fund is to seek to generate returns through selective investment in a global portfolio of catastrophe bonds ("Cat Bonds"). Cat Bonds are debt securities that transfer the risk of catastrophic events from insurance companies, reinsurance companies, corporations, governments, etc. to the capital markets. Investors receive a risk premium in the form of a yield in exchange for bearing the risk of losses from pre-defined natural and non-natural catastrophic events, such as earthquakes or windstorms, mortality, cyber and catastrophe related events. The principal of any given Cat Bond is potentially reduced (and subject to partial, or in some cases total, loss) upon the occurrence of an event to which the Cat Bond is contractually linked.

GAM Star Global Cautious

The investment objective of the Fund is to achieve capital preservation accompanied by stable returns via a dynamic asset allocation, using a cautious approach. The Fund aims to achieve this investment objective by primarily gaining exposure to the following range of asset classes: equities and equity related securities, fixed income securities, commodities and alternative assets (other than commodities), in which it is not permitted to directly invest (such as real estate and fund of hedge funds). Such exposure may be achieved directly (where permissible in accordance with UCITS requirements) and/or indirectly through financial derivative instruments, collective investment schemes, and/or financial instruments constituting transferable securities such as exchange traded notes and/or exchange traded commodities. Allocations will be made at the Co-Investment Manager's discretion, both within each asset class and among the asset classes.

GAM Star China Equity

The investment objective of the Fund is to achieve capital appreciation through investment primarily in quoted equity securities listed on or dealt in any Recognised Market and which are issued by companies with principal offices or significant business activities in the People's Republic of China and Hong Kong.

GAM Star Composite Global Equity

The investment objective of the Fund is to achieve long term capital appreciation with the aim of generating a capital return in excess of global equity markets over the medium to long term. The Fund intends to pursue its investment objective by gaining exposure principally to equity and equity related strategies. In relation to the equities and equity related securities that the Fund may invest in, these will be principally, but not limited to common Shares, preference Shares, securities convertible into or exchangeable for such equities listed or traded on Recognised Markets worldwide. Although convertible securities may be deemed to embed a derivative, investment in such securities will not give rise to leveraged exposure. The Fund may also invest in exchange traded funds which are listed or traded on Recognised Markets worldwide in order to gain exposure to such strategies. The Fund may also invest in unlisted collective investment schemes in accordance with the provisions of the UCITS Regulations.

GAM Star Continental European Equity

The investment objective of the Fund is to achieve long-term capital appreciation through investing primarily in quoted equity and equity related securities (including but not limited to warrants), listed on or dealt in Recognised Markets within the EU which are issued by companies with principal offices in Europe other than the United Kingdom.

GAM Star Credit Opportunities (EUR)

The investment objective of the Fund is to achieve long-term capital gain in Euro. It will be the policy of the Fund to seek to achieve its investment objective through investment principally in income bearing or accruing securities with fixed principal amounts including government bonds, corporate bonds, junior debt securities, preferred shares, convertible securities and contingent capital notes.

GAM Star Credit Opportunities (GBP)

The investment objective of the Fund is to achieve long-term capital gain in Sterling. It will be the policy of the Fund to seek to achieve its investment objective through investment principally in income bearing or accruing securities with fixed principal amounts including government bonds, corporate bonds, junior debt securities, preferred shares, convertible securities and contingent capital notes.

GAM Star Credit Opportunities (USD)

The investment objective of the Fund is to achieve long-term capital gain in US dollars. It will be the policy of the Fund to seek to achieve its investment objective through investment principally in income bearing or accruing securities with fixed principal amounts including government bonds, corporate bonds, junior debt securities, preferred shares, convertible securities and contingent capital notes.

GAM Star Global Moderate

The investment objective of the Fund is to achieve capital preservation accompanied by stable returns via a dynamic asset allocation, using a moderate approach. The Fund aims to achieve this investment objective by primarily gaining exposure to the following range of asset classes: equities and equity related securities, fixed income securities, commodities and alternative assets (other than commodities), in which it is not permitted to directly invest (such as real estate and fund of hedge funds). Such exposure may be achieved directly (where permissible in accordance with UCITS requirements) and/or indirectly through financial derivative instruments, collective investment schemes, and/or financial instruments constituting transferable securities such as exchange traded notes and/or exchange traded commodities. Allocations will be made at the Co-Investment Manager's discretion, both within each asset class and among the asset classes.

GAM Star Global Dynamic Growth

(Merged into GAM Star Global Aggresive on 18 March 2025, and is no longer available for investment.)

The investment objective of the Fund was to seek to achieve long term capital growth. The Fund aimed to achieve this investment objective primarily through investment in open-ended collective investment schemes which provided exposure to equities, fixed income securities, property, commodities and currencies as set out in the terms of the Prospectus. The Fund did not invest in closed-ended collective investment schemes. The Fund did not invest directly in property or commodities and such indirect exposure should be generated as described in the supplement of the Prospectus.

GAM Sustainable Emerging Equity

The investment objective of the Fund is to achieve long term capital appreciation. The Fund seeks to achieve this objective through investing primarily in equity and equity related securities (such as warrants and rights issues) of companies listed on or dealt in Recognised Markets in Emerging Markets or which are listed on or dealt in Recognised Markets outside of the Emerging Markets but which generate the bulk of their earnings in Emerging Markets.

GAM Star Emerging Market Rates

The investment objective of the Fund is to achieve an attractive risk-adjusted return, whilst actively managing downside risk (such as bond market and currency risk), through investment in a portfolio of local and hard currency bonds and other fixed income securities from emerging markets (as hereinafter defined) worldwide.

GAM Star European Equity

The investment objective of the Fund is to achieve long-term capital appreciation through investing primarily in quoted equity securities issued by companies with principal offices in Europe, including Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, the Netherlands, Norway, Portugal, Russia, Spain, Sweden, Switzerland, Turkey and the United Kingdom. It will be the policy of the Fund to invest primarily in equities.

GAM Star Flexible Global Portfolio

(Merged into GAM Star Global Moderate on 25 March 2025, and is no longer available for investment.)

The investment objective of the Fund was to achieve capital appreciation by gaining exposure to one or more of the following asset classes: financial indices, open-ended collective investment schemes, exchange traded funds, exchange traded commodities, property, fixed income securities, equities, equity related securities, derivative instruments, cash, cash equivalents, money market instruments and closed-ended funds. Allocations were made at the Co-Investment Manager's discretion, both within each asset class and among the asset classes. The Fund did not need to be invested in any or all of the asset classes at any one time.

GAM Star GAMCO US Equity

(Merged into GAM Star Capital Appreciation US Equity on 12 December 2018, and is no longer available for investment.)

The investment objective of the Fund was to achieve long-term capital appreciation. It was the policy of the Fund to invest primarily in a diversified portfolio of equities (i) issued by companies with principal offices in the United States of America and/or (ii) which were listed on Recognised Markets in the United States of America. Whilst the Fund primarily invested in the equities described above, it could also invest in other equities listed on Recognised Markets worldwide.

GAM Star Global Rates

The investment objective of the Fund is to achieve absolute returns. The Fund employs a process of economic analysis to identify fundamental trends within both the fixed income and global currency markets. There are both medium term and short term based themes involved in the Fund's strategy. Further information can be found in the supplement of the Prospectus.

GAM Star Global Selector

(Merged into GAM Star Worldwide Equity on 22 January 2020, and is no longer available for investment.)

The investment objective of the Fund was to achieve long term capital appreciation by investing primarily in a focused, concentrated portfolio of worldwide quoted equity and equity related securities (including, but not limited to warrants), listed on or dealt in Recognised Markets on a worldwide basis.

GAM Star Global Aggressive

(Formerly known as GAM Star Global Growth)

The investment objective of the Fund is to achieve capital preservation accompanied by stable returns via a dynamic asset allocation, using an aggressive approach. The Fund aims to achieve this investment objective by primarily gaining exposure to the following range of asset classes: equities and equity related securities, fixed income securities, commodities and alternative assets (other than commodities), in which it is not permitted to directly invest (such as real estate and fund of hedge funds). Such exposure may be achieved directly (where permissible in accordance with UCITS requirements) and/or indirectly through financial derivative instruments, collective investment schemes, and/or financial instruments constituting transferable securities such as exchange traded notes and/or exchange traded commodities. Allocations will be made at the Co-Investment Manager's discretion, both within each asset class and among the asset classes.

GAM Star Financial Credit

(Formerly known as GAM Star Interest Trend)

The investment objective of the Fund is to achieve long-term capital appreciation in US dollars. The Fund aims to achieve its investment objective through investment principally in income bearing securities which are expected to generate fixed income payments and also selectively make capital gains from trends in interest rates. Such instruments include government bonds, corporate bonds, junior debt securities, the rights and claims of the Fund as holder of such instruments will generally rank junior to the claims of holders of unsubordinated debt issued by that issuer.

GAM Star Japan Leaders

The investment objective of the Fund is to achieve long-term capital appreciation through investing primarily in quoted equity securities in Japan issued by companies with principal office in Japan. It will be the policy of the Fund to invest primarily in equities.

GAM Star MBS Total Return

The Fund's primary investment objective is to seek to generate returns through selective investment in a diversified portfolio of mortgage-backed debt securities ("MBS") and asset-backed debt securities ("ABS"). The Fund may also invest to a lesser extent in debt securities (such as bonds and notes) issued by corporations and governments. Such debt securities may pay fixed, floating and inverse floating rates of interest and may include zero coupon obligations.

GAM Star Tactical Opportunities

(Merged into GAM Star Global Moderate on 25 March 2025, and is no longer available for investment.)

The investment objective of the Fund was to seek to achieve capital appreciation via unconstrained tactical asset allocation. The Fund aimed to achieve this investment objective by gaining exposure either directly or indirectly through the use of derivatives to a range of asset classes including equities, fixed income securities, currencies, commodities and property as described in the Prospectus. The Fund did not invest directly in property or commodities.

GAM Star Disruptive Growth

The investment objective of the Fund is to achieve long-term capital appreciation. It will be the policy of the Fund to invest primarily in a globally diversified portfolio of technology related companies. The Fund seeks to achieve this objective through investing primarily in equity and equity related securities (such as warrants and rights issues) of companies listed on or dealt in Recognised Markets worldwide, and up to 10% of its net assets in unlisted equities, in each case which demonstrate long term growth opportunities within the broader technology sector or whose business models are driven by new technologies. The Fund may also seek to gain exposure to such companies through the use of financial derivative instruments described in the supplement of the Prospectus.

GAM Star US All Cap Equity

(Merged into GAM Star Global Equity on 21 January 2025, and is no longer available for investment.)

The investment objective of the Fund was to achieve long-term capital appreciation through investing primarily in quoted securities in the United States of America issued by companies with principal offices in the United States of America. The Fund invested in a broad spread of equities, and might have invested in fixed income securities and preferred stock listed on or dealt in a Recognised Market in the United States of America. The policy of the Fund was to invest primarily in equities.

GAM Star Global Equity

(Formerly known as GAM Star Worldwide Equity)

The investment objective of the Fund is to provide capital appreciation primarily through investment in quoted securities on a global basis. It will be the normal policy of the Fund to invest mainly in equities which are listed or traded on Recognised Markets globally and issued by companies in both developed and emerging market countries. However, the Fund may invest not more than 15% of the Net Asset Value of the Fund in Fixed Income Securities and preferred stock, if the fund manager considers this course of action appropriate to the goal of maximising capital growth.

GAM Sustainable Climate Bond

The investment objective of the Fund is to achieve long-term income and capital gain in Euro, by investing in "Impact Bonds" with a positive environmental or social impact. Impact Bonds are bonds which have a specific environmental, social and governance ("ESG") purpose. The Fund will seek to achieve its investment objective through investment principally in such Impact Bonds issued by companies in the financial sector which aim to generate social and/or environmental impact alongside a financial return. The Fund may invest in income bearing or accruing securities with fixed principal amounts including government bonds, corporate bonds, junior debt securities, preferred Shares, convertible securities and contingent capital notes, provided such fulfil the definition of an Impact Bond. Further information can be found in the supplement of the Prospectus.

GAM Star Fund p.l.c.

General

In addition, please note the following in relation to the investment objectives and policies of the Funds:

- (i) any Fund, the name of which contains a reference to a specific type of security, country or region will invest at least two thirds of its non-liquid assets* in that specific type of security, country or region;
- (ii) any Fund, the name of which contains a specific reference to a specific currency, will invest at least two thirds of its non-liquid assets in securities denominated in that specific currency;
- (iii) where the investment policy of a Fund states that investments are made "primarily" in a specific type of security, country or region, that Fund will invest either directly or indirectly (through the use of financial derivative instruments) at least two thirds of its non-liquid assets in that specific type of security, country or region;
- (iv) where the investment policy of a Fund refers to investments in companies of a specific country or region, this means (in the absence of any other definition) that these companies will have their registered office in the specific country or region stated, notwithstanding their being listed on any stock exchange mentioned in the investment policy of the Fund.
- * Non-liquid assets refers to all assets of any Fund other than cash.

Commentary (Unaudited)

Market Background

The past year was defined by persistent geopolitical tensions and resilient global equity markets. Despite headlines surrounding the Israel–US–Iran conflict and trade tariff uncertainty, investor sentiment remained firm, supported by strong corporate earnings and a robust US economy. The MSCI AC World Index posted solid gains, though market leadership was narrow and momentum-driven.

In this environment, the fund delivered a positive absolute return, albeit trailing the benchmark. Signs of investor caution emerged, reflected in a weaker US dollar and rising gold prices, suggesting underlying unease. The US economy continued to benefit from structural strengths in technology, energy independence and corporate management.

Performance

For the twelve-month period ending 30 June 2025, the GAM Star Alpha Spectrum fund (Ordinary EUR Acc) returned +2.55%, compared to +3.05% for its benchmark, the Average EUR 1 Month Deposit Rate Return.

Positioning

The portfolio remains anchored in equities either directly or indirectly through Funds, with a modest overweight to the US and selective exposure to undervalued European and Japanese stocks. We remain cautious on emerging markets, particularly China, due to economic and geopolitical concerns.

Diversification includes short-dated bonds, investment-grade credit, and targeted allocations to mortgage-backed securities, subordinated financials, climate-linked and insurance-linked bonds. Alternatives such as merger arbitrage, macro trading, real estate and gold play a modest role. Gold has continued to benefit from rising uncertainty, reinforcing its role as a strategic diversifier.

Outlook

Looking ahead, the disconnect between market sentiment and real-world events is likely to persist. Geopolitical risks and trade negotiations will remain influential, alongside the potential for unexpected shocks. While the US economy remains resilient, investor fatigue could prompt reassessment of equity exposure. In this context, we believe our disciplined, fundamentals-driven approach is more relevant than ever. We continue to focus on high-quality global businesses and niche areas where our conviction can deliver long-term value. Rather than chasing short-term trends, we prioritise risk control and sustainable growth. By staying true to our philosophy, we aim to navigate uncertainty and deliver consistent, risk-adjusted returns for our clients.

Fund Manager: Jian Shi Cortesi

30 June 2025

Commentary (Unaudited)

Market Background

The twelve-month period saw Asian markets deliver strong returns, albeit with elevated volatility against a challenging geopolitical backdrop, with US trade tariffs a particular source of uncertainty. The market narrative was dominated by the theme of Artificial Intelligence (Al), which propelled many technology and communication services stocks sharply higher over the period.

Performance

The fund delivered a net return of 16.34% in US dollar terms, slightly behind the 16.81% gain in the MSCI AC Asia ex Japan Index.

Our relatively large allocation to the outperforming Chinese market, which benefitted from further stimulus, supported fund returns, although stock selection detracted to some extent, with our lack of exposure to technology group Xiaomi weighing on returns.

However, positive contributions came from our overweight in automaker Geely Automobile Holdings, the company behind brands such as Polestar and Volvo Cars, on strong new product momentum. Auto sector peer BYD, which is capitalising on R&D investment by delivering battery and charging technology innovation and impressive global sales growth, was another strong performer for the fund. Our favouring of Sea Ltd, a Singapore-based consumer internet business that enjoyed strong growth across its e-commerce, financial services and digital entertainment units, added further value.

Positioning

Consistent with the fund's long-term objectives, the portfolio is positioned with the aim of capturing secular growth trends in areas such as consumption and innovation. During the period we increased our overweight stance in Chinese internet giant Tencent as we believe the valuation has yet to adequately reflect the company's potential for further growth in areas such as gaming and online marketing.

Outlook

Currently, the most-commonly-perceived risk for Asia is President Trump's trade policies. Potential tariff hikes are the key headwind, especially for the more export-oriented Asian economies. However, during the last Trump presidency, despite the trade war and the Covid impact, the MSCI Asia ex-Japan index rose more than 70% from the beginning of 2017 to the beginning of 2021. Chinese exports have in fact grown significantly since Trump started the trade war with China in 2018.

Earlier this year, the US introduced sweeping tariffs on many countries, including major Asian economies. While some nations may find opportunities amid shifting supply chains, the overall impact is complex and multi-faceted, requiring careful navigation by policymakers and businesses alike. Asia is better positioned to handle these challenges compared to the previous trade war, thanks to improved supply chain integration and a resilient growth outlook. However, export-dependent economies like South Korea, Taiwan, and Singapore may experience modest growth slowdowns.

Due to the widely perceived trade risk, some investors may sell very good Asian companies with strong long-term outlooks due to short-term macro fears. This could provide great opportunities for long-term oriented investors like us. Our strategy for the remainder of 2025 and beyond is to focus on Asian companies that benefit from the long-term tailwind in consumption, technology and clean energy trends, as well as those focusing on growth in domestic markets. Asian markets or other emerging markets.

Nevertheless, there is risk of negative indirect impact on our portfolio companies from potentially lower global GDP growth, which could be offset to some degree by potential monetary easing and domestic stimulus in some Asian countries, particularly in China. Against this backdrop, companies driven by local demand feature strongly in the portfolio, especially in internet, telecom, consumer staples, travel, software and financials.

Commentary (Unaudited)

Market Background

The past year was defined by persistent geopolitical tensions and resilient global equity markets. Despite headlines surrounding the Israel–US–Iran conflict and trade tariff uncertainty, investor sentiment remained firm, supported by strong corporate earnings and a robust US economy. The MSCI AC World Index posted solid gains, though market leadership was narrow and momentum-driven.

In this environment, the fund delivered a positive absolute return, albeit trailing the benchmark. Signs of investor caution emerged, reflected in a weaker US dollar and rising gold prices, suggesting underlying unease. The US economy continued to benefit from structural strengths in technology, energy independence and corporate management.

Performance

For the twelve-month period ending 30 June 2025, the GAM Star Global Flexible fund (Institutional GBP Acc) returned +6.39%, compared to +6.36% for its benchmark, the SONIA Compounded Index +1%.

Positioning

The portfolio remains anchored in equities, with a modest overweight to the US and selective exposure to undervalued European and Japanese stocks. We remain cautious on emerging markets, particularly China, due to economic and geopolitical concerns.

Diversification includes short-dated bonds, investment-grade credit, and targeted allocations to mortgage-backed securities, subordinated financials, climate-linked and insurance-linked bonds. Alternatives such as merger arbitrage, macro trading, real estate and gold play a modest role. Gold has continued to benefit from rising uncertainty, reinforcing its role as a strategic diversifier.

Outlook

Looking ahead, the disconnect between market sentiment and real-world events is likely to persist. Geopolitical risks and trade negotiations will remain influential, alongside the potential for unexpected shocks. While the US economy remains resilient, investor fatigue could prompt reassessment of equity exposure. In this context, we believe our disciplined, fundamentals-driven approach is more relevant than ever. We continue to focus on high-quality global businesses and niche areas where our conviction can deliver long-term value. Rather than chasing short-term trends, we prioritise risk control and sustainable growth. By staying true to our philosophy, we aim to navigate uncertainty and deliver consistent, risk-adjusted returns for our clients.

Fund Manager: Wellington Management Company LLP

30 June 2025

Commentary (Unaudited)

Market Background

US equities advanced during the one-year period as the S&P 500 Index (+15.2%) continued to set record highs, supported by resilient corporate earnings, a stabilising economic backdrop and growing expectations of monetary easing. Gains were again concentrated in a narrow cohort of mega-cap technology companies, reinforcing the performance gap between the market-cap weighted S&P 500 Index and its equal-weighted counterpart, and extending the outperformance of growth stocks relative to value. Economic indicators released in the second quarter of 2025 pointed to a modest rebound in activity following a brief contraction earlier in the year, though inflation remained above target and labour market momentum showed signs of cooling.

Performance and Positioning

During the period, the GAM Star US Capital Appreciation Equity fund rose by +5.4%, underperforming the S&P 500 Index. Security selection was the primary driver of relative underperformance as weak selection within the information technology and consumer staples sectors was partially offset by stronger selection within the communication services and industrials sectors. At the issuer level, the top relative detractors to benchmark-relative performance during the period included our overweight exposures to Schlumberger and UnitedHealth Group. We reduced our overweight exposures to both companies as of the end of the period. The top relative contributors to benchmark-relative performance during the period included our overweight exposure to GE Vernova and an off-benchmark position in Spotify. We increased our overweight exposure to GE Vernova and maintained our position in Spotify as of the end of the period. Sector allocation, a residual of our bottom-up stock selection process, detracted from relative performance. Our underweight exposure to financials and overweight exposure to energy detracted, partially offset by our underweight exposure to materials.

Sector exposure is an indication of where the portfolio managers are finding compelling investment ideas with changes often modest. The fund was most overweight consumer staples and consumer discretionary and most underweight financials and industrials at the end of the period.

Outlook

As managers, we aim to understand drivers of risk across equity styles. We look to our trend-following (eg growth) and mean-reversion (eg value) exposures to provide long-term capital appreciation potential. In the growth universe, we focus on identifying potential opportunities and associated risks given the recent market rebound. With higher momentum stocks whipsawing from negative to positive gains through the first half of the year, we rely on our idea sponsors to navigate through the noise to identify stocks that display strong fundamentals and long-term growth potential. In the value universe, we look to our idea sponsors to provide exposure to attractively valued names while avoiding companies that are at heightened risk of becoming insolvent and those that may be more sensitive to macroeconomic uncertainties. We balance these with quality and defensive exposures that we expect will provide a stable ballast to the portfolio during bouts of market volatility. Within these exposures, we are particularly cautious of how higher interest rates might impact defensive stocks and look to our idea sponsors' bottom-up processes to find companies with attractive and stable business models. As always, our goal is to manage existing and emerging risks across the portfolio to provide a consistent risk profile driven by fundamental security selection.

GAM Star Cat Bond

Fund Manager: Swiss Re Insurance-Linked Investment Advisors Corporation - Maria Giovanna Guatteri/Weilong Su

30 June 2025

Commentary (Unaudited)

Market Background

The period was shaped by macroeconomic uncertainty, with central banks, particularly the US Federal Reserve, maintaining a cautious stance amid persistent inflation and uneven global growth. This environment reinforced the appeal of diversifying, uncorrelated return sources such as Insurance-Linked Securities (ILS).

The ILS market expanded meaningfully. While Q3 2024 was subdued, Q4 saw a surge in issuance as investors redeployed capital. By Q1 2025, the market's notional size had grown from USD 44.5 billion to USD 52.2 billion, setting a new quarterly issuance record of USD 6.5 billion. Q2 2025 surpassed all previous annual issuance records year-to-date. Despite seasonal risks, no major catastrophe events triggered significant losses, and secondary market liquidity remained robust.

Performance

The fund's USD Institutional share class returned +11.50%, outperforming the With Intelligence ILS Advisers Index at +11.19%. Performance was particularly strong in Q3 and Q4 2024, supported by seasonal hurricane risk premium and tightening spreads. Q1 2025 was impacted by the Los Angeles wildfires, though losses were minor and March rebounded strongly. Q2 delivered steady gains, with May and June buoyed by coupon income and stabilising loss development. The fund's ability to reinvest into higher-spread opportunities supported consistent, risk-adjusted returns.

Positioning

Following the appointment of Swiss Re's subsidiary Swiss Re Insurance-Linked Investment Advisors Corporation ("SRILIAC") as co-manager in May 2025, the fund's positioning was gradually aligned with Swiss Re's proprietary risk views. This alignment has primarily been achieved through participation in approximately USD 8 billion of new issuance settled after 7 May, offering opportunities to deploy capital supported by inflows and substantial coupon and maturity volumes. The team maintained discipline, avoiding unattractive structures as spreads tightened. Secondary market activity was used to refine exposures without materially altering the fund's short-term risk-return profile.

Outlook

We remain constructive on the cat bond market. Elevated issuance and healthy spreads offer attractive opportunities for uncorrelated returns. As Q3 begins, focus shifts to the hurricane season. While a Category 3 landfall has occurred in the East Pacific, the season has been quiet so far. Forecasts suggest activity in line with the 10-year average, though hurricane frequency does not always correlate with insured losses or market volatility. With new issuance slowing, we are actively monitoring the secondary market for tactical opportunities. The fund remains well-positioned to respond to event-driven dislocations and continue delivering strong, risk-adjusted performance.

30 June 2025

Commentary (Unaudited)

Market Background

The past year was defined by persistent geopolitical tensions and resilient global equity markets. Despite headlines surrounding the Israel–US–Iran conflict and trade tariff uncertainty, investor sentiment remained firm, supported by strong corporate earnings and a robust US economy. The MSCI AC World Index posted solid gains, though market leadership was narrow and momentum-driven.

In this environment, the fund delivered a positive absolute return, albeit trailing the benchmark. Signs of investor caution emerged, reflected in a weaker US dollar and rising gold prices, suggesting underlying unease. The US economy continued to benefit from structural strengths in technology, energy independence and corporate management.

Performance

For the twelve-month period ending 30 June 2025, the GAM Star Global Cautious fund (Institutional GBP Acc) returned +5.04%, compared to +5.62% for its benchmark, the SONIA Compounded Index.

Positioning

The portfolio remains anchored in Fund of Funds, with a modest overweight to the US and selective exposure to undervalued European and Japanese stocks. We remain cautious on emerging markets, particularly China, due to economic and geopolitical concerns.

Diversification includes short-dated bonds, investment-grade credit, and targeted allocations to mortgage-backed securities, subordinated financials, climate-linked and insurance-linked bonds. Alternatives such as merger arbitrage, macro trading, real estate and gold play a modest role. Gold has continued to benefit from rising uncertainty, reinforcing its role as a strategic diversifier.

Outlook

Looking ahead, the disconnect between market sentiment and real-world events is likely to persist. Geopolitical risks and trade negotiations will remain influential, alongside the potential for unexpected shocks. While the US economy remains resilient, investor fatigue could prompt reassessment of equity exposure. In this context, we believe our disciplined, fundamentals-driven approach is more relevant than ever. We continue to focus on high-quality global businesses and niche areas where our conviction can deliver long-term value. Rather than chasing short-term trends, we prioritise risk control and sustainable growth. By staying true to our philosophy, we aim to navigate uncertainty and deliver consistent, risk-adjusted returns for our clients.

Commentary (Unaudited)

Market Background

The 12 months under review marked a significant turnaround for Chinese equities, driven by a powerful combination of coordinated policy stimulus and improving economic fundamentals. Despite uncertainties over US trade policy as the Trump administration took office in 2025, the Chinese stock market experienced sharp, policy-induced rallies, rewarding investors who remained engaged during the period.

Performance

The benchmark MSCI China Index delivered a strong return of 33.78 per cent for the period, compared to the 31.57% gain in the GAM Star China Equity fund in USD terms

While the fund delivered robust returns in absolute terms, stock selection weighed to some extent on returns relative to the benchmark. Our low exposure to broad-based technology firm Xiaomi – which operates in sectors from smartphones to electric vehicles – dragged on returns.

However, positive contributions came from our overweight in automaker Geely Automobile Holdings, the company behind brands such as Polestar and Volvo Cars, on strong new product momentum. Other valuable contributors included online health care company JD Health International, which rallied as the company continued to deliver strong results. Our stake in online broker Futu performed well as the firm executed its international expansion plan to acquire more clients and grow revenue and earnings. However, our holdings in online recruitment platform Kanzhun and medical device firm Shenzhen Mindray Bio-Medical Electronics weighed to some extent on returns.

Positioning

Consistent with the fund's long-term objectives of delivering capital appreciation, the portfolio is positioned with the aim of capturing secular growth trends in areas such as consumption and innovation. We favour a range of companies in the information technology and communications services sectors, while maintaining underweight exposure to lower-growth sectors such as energy and materials. During the period we maintained our focus on capturing the theme of China's strength in areas such as artificial intelligence (AI), electric vehicles (EVs) and advanced manufacturing, raising our existing stake in Kingboard Holdings, a diverse group with interests in the manufacturing of specialist laminates, particularly for the electronics industry. We also raised exposure to selected financials, including China Merchants Bank, which we believe can grow revenues ahead of expectations, helped by its strong franchise in private banking and wealth management.

Outlook

While tariffs have added complexity and volatility to the trade landscape, China is structurally better prepared than before. Only 2.3% of China's GDP is dependent on exports to the US, far below that of Germany, Japan, Mexico and Canada. The diversification of supply chains, domestic policy support and resilient non-US internal demand give China a more robust footing. Though there may be short-term growth pressure on export-reliant sectors, shifting global trade dynamics could create new opportunities, especially for Chinese companies that can capitalise on expansion into new geographic locations.

In our view, Chinese equities currently offer a unique opportunity: undervalued innovation. China's innovation momentum has started to attract global attention. This shift aligns with the long-term "Made in China 2025" strategy. China is accelerating its focus on R&D-led growth across advanced manufacturing, clean energy, EVs, pharmaceuticals and Al, positioning its equity market for a more sustainable and innovation-driven future. Such growth is offered at low prices: while major global markets like the US, Europe, India and Japan trade near historical highs, the equity market in China remains significantly discounted — the MSCI China Index would need to climb over 70% to return to 2021 levels, presenting notable upside potential. In addition, unlike the policy uncertainty elsewhere, China continues to implement consistent, pro-growth measures, particularly in response to external pressures such as tariffs.

We continue to favour Chinese companies driven by local demand, especially in internet, technology hardware, software, EVs and insurance — sectors best placed to benefit from China's policy support and innovation-led growth. Helped by the emphasis on innovation and growing exposure to the domestic

economy, we believe our favoured Chinese companies are well-placed to continue to grow revenue and earnings in the future. Our portfolio holdings have minimal US revenue exposure and are well-positioned to benefit from domestic growth and expansion into non-US markets. While slower global growth poses some risk, we expect it to be mitigated by targeted domestic stimulus.

30 June 2025

Commentary (Unaudited)

Market Background

The past year was defined by persistent geopolitical tensions and resilient global equity markets. Despite headlines surrounding the Israel–US–Iran conflict and trade tariff uncertainty, investor sentiment remained firm, supported by strong corporate earnings and a robust US economy. The MSCI AC World Index posted solid gains, though market leadership was narrow and momentum-driven.

In this environment, the fund delivered a positive absolute return, albeit trailing the benchmark. Signs of investor caution emerged, reflected in a weaker US dollar and rising gold prices, suggesting underlying unease. The US economy continued to benefit from structural strengths in technology, energy independence and corporate management.

Performance

For the twelve-month period ending 30 June 2025, the GAM Star Composite Global Equity fund (Ordinary USD Acc) returned +10.70%, compared to +16.69% for its benchmark, the MSCI AC World Index (USD Gross Total Return).

Positioning

The fund is positioned to capitalise on the superior real returns that stocks have historically offered over time. The structural case for stocks remains undimmed in our view, and we continue to be moderately engaged in equities either directly or indirectly through Funds across all our strategies. In regional equity terms, we are marginally overweight the US versus the MSCI AC World Index, with a similar stance to still undervalued European equities and Japan. However, we are slightly cautious on emerging markets and China given the latter's continuing economic challenges and the on-going geopolitical risks surrounding trade with the US and the Taiwan question.

Outlook

Looking ahead, the disconnect between market sentiment and real-world events is likely to persist. Geopolitical risks and trade negotiations will remain influential, alongside the potential for unexpected shocks. While the US economy remains resilient, investor fatigue could prompt reassessment of equity exposure. In this context, we believe our disciplined, fundamentals-driven approach is more relevant than ever. We continue to focus on high-quality global businesses and niche areas where our conviction can deliver long-term value. Rather than chasing short-term trends, we prioritise risk control and sustainable growth. By staying true to our philosophy, we aim to navigate uncertainty and deliver consistent, risk-adjusted returns for our clients.

Commentary (Unaudited)

Market Background

The review period presented a mixed environment for European equity investors. Markets contended with persistent core inflation, continued monetary policy adjustments from central banks, and an unsettled geopolitical backdrop amid the ongoing Russia/Ukraine war, Middle East conflict and US-driven trade frictions. Despite these headwinds, Continental European equities demonstrated resilience, buoyed by a series of European Central Bank interest rate cuts and growing optimism over the outlook for many of the region's companies, helped by signs of growing European self-reliance in defence.

Performance

Against this backdrop, the MSCI Europe ex UK benchmark delivered a return of 7.64%, ahead of the GAM Star Continental European Equity fund's 2.39% return

The fund's underperformance relative to the benchmark was partly due to stock selection in health care, although our favouring of financials, and stock selection in the sector, offset much of the drag.

The most significant stock-level detractor from relative performance was our holding in Danish healthcare company Novo Nordisk amid signs that competitors were gaining ground in the weight loss drug segment. The IT sector was another source of underperformance, with semiconductor-related companies STMicroelectronics and BE Semiconductor Industries detracting as the sector faced cyclical headwinds and investor sentiment cooled. We subsequently disposed of these positions.

However, our holdings among financials supported relative performance. Overweights in Italian bank UniCredit and Spanish lender Banco Bilbao Vizcaya Argentaria were key contributors. Both institutions had benefited from the previous higher interest rate environment which supported their net interest margins, and they continued to demonstrate robust capital strength and attractive shareholder return policies. Positions in CaixaBank and FinecoBank also contributed strongly before they were sold during the period as part of a major portfolio repositioning.

Within industrials, our positions in Irish airline Ryanair and French building materials company Cie de Saint-Gobain added considerable value. Ryanair capitalised on the sustained recovery in air travel, leveraging its low-cost model to gain market share. Saint-Gobain performed well, aided by its exposure to energy-efficient renovation trends.

Positioning

The most significant event was a change in the portfolio management team in May, which was followed by a comprehensive portfolio review and repositioning. This was undertaken to increase the fund's focus and align it more closely with our core investment philosophy: identifying high-quality, undervalued European businesses with durable competitive advantages.

This led to the sale of several positions, including the aforementioned semiconductor and bank holdings.

We redeployed capital into businesses we believe are better positioned for the evolving environment. For example, we increased our exposure to selected industrials such as aviation companies Ryanair, Airbus and MTU Aero Engine, which we believe possess superior business models and attractive return profiles. The aim of this repositioning is to build a more concentrated portfolio of our best ideas, informed by our 'all-in' framework, which includes our expectations of earnings growth, cash return and valuation change for a company to assess our expected all-in return for a stock.

Outlook

Europe's investment landscape is undergoing structural transformation, shaped by shifting global dynamics and renewed emphasis on self-reliance. Despite long-standing scepticism on Europe's ability to reform, we think increased geopolitical uncertainty driven by the Russia/Ukraine conflict, trade aggression from the US and anaemic economic growth is forcing change.

Germany continues to stand at the forefront of this realignment with its pivot away from stringent fiscal conservatism. The announced infrastructure and defence stimulus is expected to trickle through the economy and is also attracting private capital from overseas. We think Germany's fiscal stimulus could benefit companies listed in other countries with German exposure. We see some tentative signs at EU level of more investor-friendly reform through support for cross-border banking consolidation, talks of a savings and investment union, consolidation in areas like space and defence procurement, relaxation of green policies and a focus on competitiveness.

However, we remain sceptical of some EU-wide initiatives given headwinds from national interests, such as Spain's handling of the BBVA-Banco Sabadell merger, and France's increasingly unstable political environment. Hence, we are selective in our country exposure.

Nevertheless, European equities remain attractively valued versus their US counterparts, with a valuation gap exceeding 30% that we believe could narrow as confidence builds. Against this backdrop, we remain committed to navigating the evolving macroeconomic and regulatory environment with a disciplined, fundamentals-driven investment approach, aiming to position the portfolio to capitalise on structural growth trends in European equities.

Commentary (Unaudited)

Market Background

During the period under review, credit markets performed well against a backdrop of gradually declining inflation and resilient growth data, pointing to a soft-landing scenario. We saw a number of risk-off events that were short lived. There was some volatility on interest rates, but US and Euro Government interest rates finished the period lower. Spreads on our securities tightened during the year. For instance, spreads within EUR Additional Tier 1 (AT1) Contingent Convertible bonds (CoCos) tightened from 400 basis points (bps) to 318 basis points. On top of that, market technicals remain very strong. As an example, in H1 2025, we saw more than USD 31 billion of AT1 CoCos issued. which was met by a huge demand of more than USD 190 billion. It is important to note that the overall AT1 CoCo market represents approximately USD 230 billion, so this demand was very significant. Regarding extension risk, this number went down during the year from 28% to currently 13% of the AT1 CoCos market being priced to perpetuity. However, this number went up to 50% during the April selloff, which was the largest risk-off event in the past year. Spreads on EUR AT1 CoCos widened to 450 bps during that period. We took the opportunity to add to AT1 CoCos during this April selloff, which was short-lived and relatively mild for credit markets. Moreover, markets recovered quickly and as such, we did not increase our exposure above 25% during the selloff. Spreads being closer to historical tights and extension risk being relatively low suggest that there remains more value in Tier 2 and senior bonds from financials, and moreover this gives us dry powder should we see a drawdown.

Performance

The institutional share class was up 7.98% during the year, compared to the rise of 6.05% in the Bloomberg Euro Aggregate Corporate Total Return Index (EUR). As stated above, credit spreads tightened during the year.

Positioning

We believe that the fund remains extremely robust and well positioned in term of credit/interest rate/liquidity risk. Tactical changes were made across the capital structure depending on market conditions. However, those were relatively limited given the robustness of markets. The main changes made were during the small selloff in April where we increased AT1 CoCos at very attractive yields going from 8-9% to higher. However, the selloff was short-lived and mild for credit markets, and as such we did not increase our exposure above 25% during the selloff.

The fund captured 3.57% of income during the year. With a yield to maturity of 4.49% and a yield to call of 3.91%, we believe we are well-placed to continue capturing high income going forward.

Outlook

Credit markets were strong in the past year. During the April selloff, the impact on credit spreads was significantly lower than the volatility seen on equity markets. Markets seem to currently be unaffected by tariff rhetoric and geopolitical issues. Moreover, market technicals are relatively strong due in large part by investors being attracted by the "all-in" yields. However, as we have seen in the past, when valuations are close to the tightest, caution is required. On top of that, extension risk on AT1 CoCos remains closer to the lower end. We demonstrated during the small selloff in April that we are well positioned for any drawdown. Moreover, we used some dry powder to add to AT1 CoCos during that small selloff. As such we feel that we are well positioned going forward, capturing an attractive yield with a very conservative portfolio — mitigating the potential downside risk and with significant dry powder to take advantage of potential market volatility.

Commentary (Unaudited)

Market Background

During the period under review, credit markets performed well against a backdrop of gradually declining inflation and resilient growth data, pointing to a soft-landing scenario. We saw a number of risk-off events that were short lived. There was some volatility on interest rates, but UK Government interest rates finished the period slightly lower. Spreads on our securities tightened significantly during the year. For instance, spreads within GBP Additional Tier 1 (AT1) Contingent Convertible bonds (CoCos) tightened by close to 90 basis points (bps). On top of that, market technicals remain very strong. As an example, in H1 2025, we saw more than USD 31 billion of AT1 CoCos issued, which was met by a huge demand of more than USD 190 billion. It is important to note that the overall AT1 CoCo market represents approximately USD 230 billion, so this demand was very significant. Regarding extension risk, this number went down during the year from 28% to currently 13% of the AT1 CoCos market being priced to perpetuity. However, this number went up to 50% during the April selloff. The April selloff was the largest risk-off event in the past year. Spreads on GBP AT1 CoCos widened to 450 bps during that period. We took the opportunity to add to AT1 CoCos during the April selloff. However, the selloff was short lived and relatively mild for credit markets. Moreover, markets recovered guickly and as such, we did not increase our exposure above 25% during the selloff. Spreads being closer to historical tights and extension risk being relatively low suggest that there remains more value in Tier 2 and senior bonds from financials, and moreover this gives us dry powder should we see a drawdown.

Performance

The institutional share class was up 8.45% during the year, compared to the 5.60% gain in the Bloomberg Sterling Aggregate Corporate Total Return Index (GBP). As stated above, credit spreads tightened significantly during the year.

Positioning

We believe that the fund remains extremely robust and well positioned in term of credit/interest rate/liquidity risk.

Tactical changes were made across the capital structure depending on market conditions. However, those were relatively limited given the robustness of markets. The main changes made were during the small selloff in April where we increased AT1 CoCos at very attractive yields going from 8-9% to higher. However, the selloff was short-lived and mild for credit markets, and as such we did not increase our exposure above 25% during the selloff.

The fund captured 4.50% of income during the year. With a yield to maturity of 5.98% and a yield to call of 5.38%, we believe we are well-placed to continue capturing high income going forward.

Outlook

Credit markets were strong in the past year. During the April selloff, the impact on credit spreads was significantly lower than the volatility seen on equity markets. Markets seem to currently be unaffected by tariff rhetoric and geopolitical issues. Moreover, market technicals are relatively strong due in large part by investors being attracted by the "all-in" yields. However, as we have seen in the past, when valuations are close to the tightest, caution is required. On top of that, extension risk on AT1 CoCos remains closer to the lower end. We demonstrated during the small selloff in April that we are well positioned for any drawdown. Moreover, we used some dry powder to add to AT1 CoCos during that small selloff. As such we feel that we are well positioned going forward, capturing an attractive yield with a very conservative portfolio — mitigating the potential downside risk and with significant dry powder to take advantage of potential market volatility.

Commentary (Unaudited)

Market Background

During the period under review, credit markets performed well against a backdrop of gradually declining inflation and resilient growth data, pointing to a soft-landing scenario. We saw a number of risk-off events that were short lived. There was some volatility on interest rates, but US Government interest rates finished the year lower. Spreads on our securities tightened during the year. For instance, spreads within USD Additional Tier 1 (AT1) Contingent Convertible bonds (CoCos) tightened to 283 basis points (bps) from already tight historical levels. On top of that, market technicals remain very strong. As an example, in H1 2025, we saw more than USD 31 billion of AT1 CoCos issued, which was met by a huge demand of more than USD 190 billion. It is important to note that the overall AT1 CoCo market represents approximately USD 230 billion, so this demand was very significant. Regarding extension risk, this number went down during the year from 28% to currently 13% of the AT1 CoCos market being priced to perpetuity. However, this number went up to 50% during the April selloff, the largest risk-off event in the past year. Spreads on USD AT1 CoCos widened to 420 bps during that period. We took the opportunity to add to AT1 CoCos during the April selloff. However, the selloff was short lived and relatively mild for credit markets. Moreover, markets recovered quickly and as such, we did not increase our exposure above 25% during the selloff. Spreads being closer to historical tights and extension risk being relatively low suggest that there remains more value in Tier 2 and senior bonds from financials, and moreover this gives us dry powder should we see a drawdown.

Performance

The institutional share class was up 8.78% during the year, compared to the 6.91% gain in the Bloomberg US Aggregate Corporate Total Return Index (USD). As stated above, credit spreads tightened during the year.

Positioning

We believe that the fund remains extremely robust and well positioned in term of credit/interest rate/liquidity risk.

Tactical changes were made across the capital structure depending on market conditions. However, those were relatively limited given the robustness of markets. The main changes made were during the small selloff in April where we increased AT1 CoCos at very attractive yields going from 8-9% to higher. However, the selloff was short-lived and mild for credit markets, and as such we did not increase our exposure above 25% during the selloff.

The fund captured 4.23% of income during the year. With a yield to maturity of 5.91% and a yield to call of 5.29%, we believe we are well-positioned to continue capturing high income going forward.

Outlook

Credit markets were strong in the past year. During the April selloff, the impact on credit spreads was significantly lower than the volatility seen on equity markets. Markets seem to currently be unaffected by tariff rhetoric and geopolitical issues. Moreover, market technicals are relatively strong due in large part by investors being attracted by the "all-in" yields. However, as we have seen in the past, when valuations are close to the tightest, caution is required. On top of that, extension risk on AT1 CoCos remains closer to the lower end. We demonstrated during the small selloff in April that we are well positioned for any drawdown. Moreover, we used some dry powder to add to AT1 CoCos during that small selloff. As such we feel that we are well positioned going forward, capturing an attractive yield with a very conservative portfolio — mitigating the potential downside risk and with significant dry powder to take advantage of potential market volatility.

30 June 2025

Commentary (Unaudited)

Market Background

The past year was defined by persistent geopolitical tensions and resilient global equity markets. Despite headlines surrounding the Israel–US–Iran conflict and trade tariff uncertainty, investor sentiment remained firm, supported by strong corporate earnings and a robust US economy. The MSCI AC World Index posted solid gains, though market leadership was narrow and momentum-driven.

In this environment, the fund delivered a positive absolute return, albeit trailing the benchmark. Signs of investor caution emerged, reflected in a weaker US dollar and rising gold prices, suggesting underlying unease. The US economy continued to benefit from structural strengths in technology, energy independence and corporate management.

Performance

For the twelve-month period ending 30 June 2025, the GAM Star Global Moderate fund (Institutional GBP Acc) returned +5.63%, compared to +5.94% for its benchmark, the SONIA Compounded Index +0.5%.

Positioning

The portfolio remains anchored in equities, with a modest overweight to the US and selective exposure to undervalued European and Japanese stocks. We remain cautious on emerging markets, particularly China, due to economic and geopolitical concerns.

Diversification includes short-dated bonds, investment-grade credit, and targeted allocations to mortgage-backed securities, subordinated financials, climate-linked and insurance-linked bonds. Alternatives such as merger arbitrage, macro trading, real estate and gold play a modest role. Gold has continued to benefit from rising uncertainty, reinforcing its role as a strategic diversifier.

Outlook

Looking ahead, the disconnect between market sentiment and real-world events is likely to persist. Geopolitical risks and trade negotiations will remain influential, alongside the potential for unexpected shocks. While the US economy remains resilient, investor fatigue could prompt reassessment of equity exposure. In this context, we believe our disciplined, fundamentals-driven approach is more relevant than ever. We continue to focus on high-quality global businesses and niche areas where our conviction can deliver long-term value. Rather than chasing short-term trends, we prioritise risk control and sustainable growth. By staying true to our philosophy, we aim to navigate uncertainty and deliver consistent, risk-adjusted returns for our clients.

Fund Manager: GAM Emerging Markets Equities Team

30 June 2025

Commentary (Unaudited)

Market Background

Emerging markets (EM) delivered a resilient performance over the 12 months to 30 June 2025, navigating a challenging macroeconomic landscape shaped by rising trade protectionism, a patchy recovery in China, and persistent policy divergence between the US and other major economies. Despite these headwinds, EM equities outperformed developed markets (DM), with the MSCI EM (USD) Net Total Return Index rising 15.3%.

The global narrative was dominated by a "tariff storm," as US protectionist policies disrupted global supply chains and dampened sentiment. Meanwhile, "US exceptionalism" kept policy rates elevated, influencing capital flows. In contrast, many EM central banks were ahead of the curve in tackling inflation, enabling earlier monetary easing. A weaker US dollar and improving sovereign balance sheets further supported EM assets.

Asia led regional performance, with South Korea and Taiwan benefiting from political stability, fiscal stimulus and Al-driven tech momentum. Latin America and CEEMEA (Central and Eastern Europe, Middle East and Africa) followed. Sector-wise, information technology, industrials and materials outperformed, while consumer sectors lagged. EM earnings expectations improved, particularly in Latin America, and currencies such as the Hungarian forint strengthened.

Performance

The GAM Sustainable Emerging Equity fund returned 20.7%, outperforming its benchmark. This outperformance reflects our active, high-conviction approach focused on secular growth themes in technology and sustainability. Stock selection was the key driver, with strong contributions from Kingdee International (Al integration and policy support), NAVER Corporation (cloud and Al leadership), and overweight positions in Naspers, Reliance Industries and National Bank of Greece.

However, not all holdings met expectations. Samsung Electronics underperformed amid China's uneven recovery, while Banco BBVA Argentina and WHA Corporation faced macroeconomic and sector-specific challenges. Relative performance was also impacted by non-holdings in Xiaomi and Tencent.

Positioning

Throughout the year, we actively refined the portfolio, maintaining underweights in large-cap Chinese exporters and Indian tech, which we viewed as vulnerable to US demand and valuation risks. We increased exposure to Chinese software firms benefiting from AI and policy tailwinds and retained selective exposure to structural themes in India.

Outlook

Looking ahead, we expect global conditions to remain challenging, but lower interest rates and policy support in EM should provide a constructive backdrop. We remain focused on resilient consumption, regional travel, consumer finance, and the energy transition—areas we believe offer compelling long-term opportunities.

30 June 2025

Commentary (Unaudited)

Market Background

The 12-month period to 30 June 2025 was characterised by significant divergence in global monetary policy, persistent inflationary pressures in several developed market (DM) economies and an undercurrent of US-driven geopolitical tension surrounding international trade. Against this backdrop, emerging market (EM) debt and currency markets offered a range of attractive opportunities for active managers.

Central bank policies began to diverge significantly, particularly in early 2025, with the European Central Bank extending its series of interest rate cuts while the US Federal Reserve adopted a more cautious approach amid uncertainty over the impact of trade tariffs on inflation. In EMs, the Chinese authorities maintained their efforts to underpin economic activity, introducing a fresh stimulus package and implementing three interest rate cuts during the review year. In contrast, Brazil, having slashed borrowing costs during the previous 12 months, raised interest rates no fewer than seven times during the review period, lifting the benchmark Selic rate from 10.5% to 15.0% in an effort to dampen inflation of over 5%.

Fund Performance

In this environment, the GAM Star Emerging Market Rates fund delivered a strong performance. By actively managing duration, currency exposure and country selection, the fund successfully traversed the shifting investment to generate strong returns for investors.

For the 12-month period ending 30 June 2025, the fund generated a return of 15.09%. This represents a significant outperformance against the United States SOFR Secured Overnight Financing Rate Compounded Index, which returned 4.86% over the period.

Positioning

Throughout the year, our portfolio strategy remained dynamic and conviction-led. We adjusted the fund's duration and currency exposures to reflect our evolving view on global monetary policy and country-specific fundamentals. As DM and EM central banks charted different paths, we sought to capitalise on the resulting movements in interest rate differentials and foreign exchange markets. For example, during the second half of 2024 the portfolio benefitted from our view that inflation would moderate across both EM and DM economies, while growth would remain resilient, with long FX positions in Turkey delivering good returns for the portfolio.

Our process emphasises a rigorous, top-down macroeconomic analysis combined with a bottom-up assessment of local market dynamics. This allowed us to favour positions in countries with attractive real yields, credible policy frameworks and improving fiscal outlooks. Conversely, we managed our risk by reducing exposure to markets where we identified deteriorating fundamentals or heightened vulnerability to external shocks, such as the trade tariff risks that continued to concern the market during the first half of 2025.

Outlook

From a top-down perspective, we are managing through two competing macro forces that could materially influence EM market performance. On one hand, the decline in US exceptionalism—evident in weakening macro data and rising fiscal concerns—has supported a tactical reduction in US dollar exposure and raised questions around the long-held "safe haven" status of US assets. On the other hand, a potential US recession poses meaningful spillover risks to the rest of the world, where growth sensitivity—or beta—to the US cycle remains high. This may limit the extent of USD downside, particularly given the absence of sufficiently deep and liquid alternatives in other markets. As such, we continue to assess the relative probabilities of a disinflationary recession versus a stagflationary regime—both of which carry very different implications for EM assets and demand an agile approach to positioning.

Against this uncertain macro backdrop, our strongest conviction is that elevated market volatility will persist, creating compelling opportunities for active EM managers to take advantage of temporary dislocations. In EM rates and FX, we continue to favour exposures with meaningful real rate cushions, strong external fundamentals, credible policy frameworks, and improving

inflation trajectories. As global growth moderates and uncertainty remains high, we expect inflation to soften further across much of EM, giving central banks room to ease policy in a controlled manner.

30 June 2025

Commentary (Unaudited)

Market Background

The review period presented a mixed environment for European equity investors. Markets contended with persistent core inflation, continued monetary policy adjustments from central banks, and an unsettled geopolitical backdrop amid the ongoing Russia/Ukraine war, Middle East conflict and US-driven trade frictions. Despite these headwinds, European equities demonstrated resilience, buoyed by a series of European Central Bank interest rate cuts and growing optimism over the outlook for many of the region's companies, helped by signs of growing European self-reliance in defence.

Performance

The GAM Star European Equity fund generated a return of 2.88%. This was behind the MSCI Europe in EUR Net Total Return benchmark, which returned 8.08% over the same period.

The fund's underperformance relative to the benchmark was largely due to stock selection in health care and materials, although our favouring of financials, and stock selection in the sector, offset much of the drag.

The most significant stock-level detractor from relative performance was our holding in Danish healthcare company Novo Nordisk amid signs that competitors were gaining ground in the weight loss drug segment. The IT sector was another source of underperformance, with semiconductor-related companies STMicroelectronics and BE Semiconductor Industries detracting as the sector faced cyclical headwinds and investor sentiment cooled. We subsequently disposed of these positions.

However, our holdings among financials supported relative performance. Overweights in Italian bank UniCredit and Spanish lender Banco Bilbao Vizcaya Argentaria were key contributors. Both institutions had benefited from the previous higher interest rate environment which supported their net interest margins, and they continued to demonstrate robust capital strength and attractive shareholder return policies. Positions in CaixaBank and FinecoBank also contributed strongly before they were sold during the period as part of a major portfolio repositioning.

Within industrials, our positions in Irish airline Ryanair and French building materials company Cie de Saint-Gobain added considerable value. Ryanair capitalised on the sustained recovery in air travel, leveraging its low-cost model to gain market share. Saint-Gobain performed well, aided by its exposure to energy-efficient renovation trends.

Positioning

The most significant event was a change in the portfolio management team in May, which was followed by a comprehensive portfolio review and repositioning. This was undertaken to increase the fund's focus and align it more closely with our core investment philosophy: identifying high-quality, undervalued European businesses with durable competitive advantages.

This led to the sale of several positions, including the aforementioned semiconductor and bank holdings.

We redeployed capital into businesses we believe are better positioned for the evolving environment. For example, we increased our exposure to selected industrials such as aviation companies Ryanair, Airbus and MTU Aero Engine, which we believe possess superior business models and attractive return profiles. The aim of this repositioning is to build a more concentrated portfolio of our best ideas, informed by our 'all-in' framework, which includes our expectations of earnings growth, cash return and valuation change for a company to assess our expected all-in return for a stock.

Outlook

Europe's investment landscape is undergoing structural transformation, shaped by shifting global dynamics and renewed emphasis on self-reliance. Despite long-standing scepticism on Europe's ability to reform, we think increased geopolitical uncertainty driven by the Russia/Ukraine conflict, trade aggression from the US and anaemic economic growth is forcing change.

Germany continues to stand at the forefront of this realignment with its pivot away from stringent fiscal conservatism. The announced infrastructure and defence stimulus is expected to trickle through the economy and is also attracting private capital from overseas. We think Germany's fiscal stimulus could benefit companies listed in other countries with German exposure. We see some tentative signs at EU level of more investor-friendly reform through support for cross-border banking consolidation, talks of a savings and investment union, consolidation in areas like space and defence procurement, relaxation of green policies and a focus on competitiveness.

However, we remain sceptical of some EU-wide initiatives given headwinds from national interests, such as Spain's handling of the BBVA-Banco Sabadell merger, and France's increasingly unstable political environment. Hence, we are selective in our country exposure.

Nevertheless, European equities remain attractively valued versus their US counterparts, with a valuation gap exceeding 30% that we believe could narrow as confidence builds. Against this backdrop, we remain committed to navigating the evolving macroeconomic and regulatory environment with a disciplined, fundamentals-driven investment approach, aiming to position the portfolio to capitalise on structural growth trends in European equities.

Commentary (Unaudited)

Market Background

The review period was dominated by swings in investor sentiment against a backdrop of unpredictable geopolitical developments. While markets have generally become increasingly desynchronised amid divergent economic outlooks and policy responses from leading central banks, this nonetheless represented an opportunity-rich environment for active fixed income investors. Elevated macro volatility against the backdrop of the ongoing Russia/Ukraine war, renewed conflict in parts of the Middle East, central banks' divergent approach to battling inflation and US-inspired trade frictions were key themes for investors to contend with during the period.

While the US Federal Reserve (Fed) took the lead in cutting interest rates during the second half of 2024, taking the Fed Funds target rate from 5.25%-5.50% to 4.25%-4.50%, policymakers adopted a more cautious approach during the first half of 2025. Amid uncertainty over the potentially inflationary impact of trade tariffs that formed part of President Trump's "American First" agenda, the Fed held interest rates steady over the remainder of the review period, despite signs that uncertainties were dragging on US economic activity. In contrast, the European Central Bank, having cut interest rates from 4.25% to 3.00% during the second half of 2024, lowered benchmark borrowing costs to 2.15% by the end of the review period. Conversely, with inflation picking up to 4.0% in January, the Bank of Japan lifted interest rates from 0.10% to 0.50% over the period. Meanwhile, having slashed interest rates during the previous 12 months, the Central Bank of Brazil raised borrowing costs aggressively over the review period, from 10.50% to 15.00%, with a view to stabilising the weakening real and taming inflation, which held above 5% in the second quarter of 2025.

Over the review period, US 10-year government bond yields rose from 4.3% to 4.4%. In the eurozone, German bund yields rose from 2.5% to 2.6%, while UK gilt yields climbed from 4.2% to 4.6%, reflecting concerns over the hefty budget deficit amid muted economic growth. Meanwhile, Japanese bond yields jumped from 1.1% to 1.4%, and Brazilian yields increased from 12.2% to 13.6%.

In currency markets, a significant weakening of the US dollar was main feature, with the US Dollar Index shedding around -8.5% over the 12-month period, largely reflecting some loss of its 'safe haven' appeal amid unpredictable US trade policy.

Performance

The GAM Star Global Rates (Inst USD) fund rose in value by 11.17%, compared to the 4.86% gain in the US SOFR Secured Overnight Financing Compounded Index.

Positioning

The portfolio delivered robust gains over much of the review period, quickly overcoming a setback from Q4 2024, as very strong performance over the first half of 2025 contributed to robust returns for the strategy over the 12-month period as a whole.

During the third quarter of 2024, our fixed income strategies added considerable value. Curve steepener trades in developed markets were key drivers of portfolio returns, with a US steepener position delivering particularly strong performance.

However, during the subsequent quarter, a long Brazilian rates stance, both outright and versus the UK, weighed on returns during the final weeks of 2024, leading us to scale back some of our exposure. Nevertheless, currency strategies, including a long Norwegian krone position versus a basket of other currencies, cushioned the effect.

The portfolio enjoyed healthy gains during the first quarter of 2025, driven primarily by a reversal in the performance of our remaining long Brazilian rates positions, both outright and relative to the UK. Separate long UK rates exposure versus Europe generated additional returns.

The portfolio's strong performance continued into the second quarter, with our long UK rates exposure a key driver of returns, particularly in April, when this stance, versus the US and relative to Canada via one-year futures, capped a 12-month period of substantial returns for the portfolio.

Outlook

In recent weeks and for the moment, investors appear to be more focused on the prospect of lower US interest rates in the coming months and a less negative trade backdrop - as the Trump administration appears to be grinding out trade deals. However, the risks are that attention begins to shift towards the fiscal consequences of the Trump tax policies and the implications for the fiscal deficit and Treasury issuance. June estimates from the Congressional Budget Office have the US deficit running between 6.5% and 7% over the next three years (an increase from March of around two percentage points), a path that is clearly unsustainable. Another risk remains the possibility of President Trump announcing a particularly dovish Fed Governor to succeed Jerome Powell in the coming weeks.

The bulk of the portfolio's risk remains in cross country interest rates, with the balance split fairly evenly between currency and inflation.

30 June 2025

Commentary (Unaudited)

Market Background

The past year was defined by persistent geopolitical tensions and resilient global equity markets. Despite headlines surrounding the Israel–US–Iran conflict and trade tariff uncertainty, investor sentiment remained firm, supported by strong corporate earnings and a robust US economy. The MSCI AC World Index posted solid gains, though market leadership was narrow and momentum-driven.

In this environment, the fund delivered a positive absolute return, albeit trailing the benchmark. Signs of investor caution emerged, reflected in a weaker US dollar and rising gold prices, suggesting underlying unease. The US economy continued to benefit from structural strengths in technology, energy independence and corporate management.

Performance

For the twelve-month period ending 30 June 2025, the GAM Star Global Aggressive fund (Institutional GBP Acc) returned +4.50%, compared to +7.17% for its benchmark, the SONIA Compounded Index +1.5%.

Positioning

The portfolio remains anchored in equities, with a modest overweight to the US and selective exposure to undervalued European and Japanese stocks. We remain cautious on emerging markets, particularly China, due to economic and geopolitical concerns.

Diversification includes short-dated bonds, investment-grade credit, and targeted allocations to mortgage-backed securities, subordinated financials, climate-linked and insurance-linked bonds. Alternatives such as merger arbitrage, macro trading, real estate and gold play a modest role. Gold has continued to benefit from rising uncertainty, reinforcing its role as a strategic diversifier.

Outlook

Looking ahead, the disconnect between market sentiment and real-world events is likely to persist. Geopolitical risks and trade negotiations will remain influential, alongside the potential for unexpected shocks. While the US economy remains resilient, investor fatigue could prompt reassessment of equity exposure. In this context, we believe our disciplined, fundamentals-driven approach is more relevant than ever. We continue to focus on high-quality global businesses and niche areas where our conviction can deliver long-term value. Rather than chasing short-term trends, we prioritise risk control and sustainable growth. By staying true to our philosophy, we aim to navigate uncertainty and deliver consistent, risk-adjusted returns for our clients.

30 June 2025

Commentary (Unaudited)

Market Background

During the period under review, credit markets performed well against a backdrop of gradually declining inflation and resilient growth data, pointing to a soft-landing scenario. We saw a number of risk-off events that were short lived. There was some volatility on interest rates, but US Government interest rates finished the period lower. Spreads on our securities tightened during the year. For instance, spreads within USD Additional Tier 1 (AT1) Contingent Convertible bonds (CoCos) tightened to 283 basis points (bps) from already tight historical levels. On top of that, market technicals remain very strong. As an example, in H1 2025, we saw more than USD 31 billion of AT1 CoCos issued, which was met by a huge demand of more than USD 190 billion. It is important to note that the overall AT1 CoCo market represents approximately USD 230 billion, so this demand was very significant. Regarding extension risk, this number went down during the year from 28% to currently 13% of the AT1 CoCos market being priced to perpetuity. However, this number went up to 50% during the April selloff, which was the largest risk-off event in the past year. Spreads on USD AT1 CoCos widened to 420 bps during that period, but they have now come back close to historical tights. As such, in current market conditions, it is important to focus on the better bond structures, ie the AT1 CoCos of high-quality banks with large resets, which imply that these bonds are very likely to be called irrespective of market conditions. Those bonds tend to have less drawdown in a market downturn, while still having attractive yields. This approach helped us since we had a significantly smaller drawdown during the selloff.

Performance

The institutional share class was up 9.34% during the year, compared to the 6.91% gain in the Bloomberg US Aggregate Corporate Total Return Index (USD). As stated above, credit spreads tightened during the year.

Positioning

We believe that the fund remains extremely robust and well positioned in term of credit/interest rate/liquidity risk.

While already only investing within financials, the fund experienced some changes. First of all, the name was changed to the GAM Star Financial Credit. Moreover, the fund has a stronger focus on AT1 CoCos. As such the fund has gone from approximately 50% AT1 CoCos to 80%. Going forward, the fund will remain invested approximately 80% within AT1 CoCos. Depending on market conditions, the fund will focus on different types of AT1 bond structures, ie better bond structures when spreads and tight and extension risk is low (similarly to now) and more aggressive structures when markets widen and apportunities arise.

The fund captured 5.14% of income during the year. With a yield to maturity of 7.04% and a yield to call of 5.43%, we believe we are well-placed to continue capturing high income going forward.

Outlook

Credit markets were strong in the past year. During the April selloff, the impact on credit spreads was significantly lower than the volatility seen on equity markets. Markets seem to currently be unaffected by Tariff rhetoric and geopolitical issues. Moreover, market technicals were relatively strong due in large part by investors being attracted by the "all-in" yields. However, as we have seen in the past, when valuations are close to the tightest, caution is required. On top of that, extension risk on AT1 cocos remains closer to the lower end. We demonstrated during the small selloff in April that we are well positioned for any drawdown. We are currently capturing an attractive yield with while focusing on the better AT1 CoCo structure – in our view, mitigating the potential downside risk and with significant dry powder to take advantage of potential market volatility.

Commentary (Unaudited)

Market Background

From July 2024 to June 2025, the Japanese equity market experienced notable volatility. A sharp correction in August 2024 was driven largely by an unwinding of yen carry trades, as rising global interest rate volatility and a sudden appreciation of the yen forced investors to reduce leveraged positions. This triggered broad risk-off sentiment and sharp declines across Japanese equities. Although the market recovered in the following months, it faced another correction in March and April 2025 amid renewed concerns over yen strength, US export restrictions and weakness in US technology stocks. The market rebounded in May and June, ending the first half of 2025 with modest gains. Sentiment improved in the second quarter, supported by progress in international trade negotiations and the postponement of new tariff measures. Al-related stocks, particularly in semiconductors, led the rebound and helped offset broader macroeconomic concerns. Factor rotations continued, with value slightly outperforming growth and small caps meaningfully outperforming large caps.

Performance and Positioning

Throughout the year, our strongest relative performers were the healthcare, IT, and utilities sectors, all of which contributed positively to portfolio returns. However, these gains were more than offset by significant underperformance in industrials, consumer discretionary, and consumer staples. At the stock level, Obic was the top contributor, particularly in the July and September quarters, driven by excellent execution and continued expansion of its already high operating profit margins. M3 also performed strongly, as its earnings signalled that the negative impact of Covid-19 is fading, with the company expecting a return to normal growth rates in FY3/26. On the negative side, Unicharm underperformed following weaker-than-expected earnings, impacted by a less favourable sales mix in Asia and rising logistics and promotional costs. Misumi shares declined due to concerns over increasing competition from local players in China. In addition, ongoing trade tensions and the overhang from pending tariffs have weighed on its business model, leading to downward revisions in earnings estimates.

Outlook

The Japanese equity market enters July under the shadow of heightened trade tensions, as the 90-day suspension on U.S. tariffs expires on 9 July. President Trump has signalled a sharp escalation - threatening tariffs of 30-35% on Japanese imports should no agreement be reached. This represents a major risk to corporate earnings and investor sentiment, particularly for globally exposed and tariff-sensitive companies. While underlying fundamentals in Japan remain robust-supported by improving corporate governance, a stable macro backdrop and a projected 7.5% earnings compound annual growth rate (CAGR) over the next three vears—trade policy uncertainty has become the dominant market driver. Many companies are withholding guidance for FY25/26 as they await clarity, and the broader market remains highly sensitive to any headlines out of Washington or Tokyo. Given the elevated volatility, we remain defensively positioned, focusing on high-quality companies with strong balance sheets, pricing power and idiosyncratic growth drivers. This has historically provided resilience in uncertain environments. We also anticipate a rotation in market leadership, as the recent rally in banks-driven more by macro speculation than fundamentals-begins to fade, and the Bank of Japan maintains its cautious stance on policy tightening. In summary, while the medium-term outlook for Japan remains constructive, the outcome of US-Japan trade negotiations in early July will likely dictate near-term market direction. Until this overhang is resolved, volatility is expected to persist.

Commentary (Unaudited)

Market Background

The 12-month period from July 2024 to June 2025 was characterised by significant macroeconomic developments and elevated market volatility. The year began with strong equity performance and declining Treasury yields, driven by expectations of Federal Reserve (Fed) rate cuts. However, geopolitical tensions, global tariff announcements and mixed economic data introduced volatility in both equity and fixed-income markets.

The S&P 500 Total Return (USD) gained 15.1% over the reporting period, reaching a series of new record highs during the second half of 2024 and first half of 2025. The US Treasury yields fluctuated in response to inflation data, credit rating changes and fiscal policy announcements. The US 10-year Treasury rate ended the period 17 basis points (bps) lower at 4.23%.

Mortgage rates remained elevated throughout the year, generally around 6.7% to 7.0%. The 30-year fixed mortgage rate in the US declined slightly, finishing at approximately 6.8%.

US housing prices continued to rise modestly, supported by a persistent supply shortage and strong consumer fundamentals. As at the end of May 2025, US housing prices had increased by 0.5% month-over-month and 2.3% year-over-year, according to the most recent Case-Shiller Home Price Index release.

Performance

Over the past 12 months, the GAM Star MBS Total Return fund (USD Institutional share class) delivered a return of 8.1%, outperforming the ICE BofA US Mortgage Backed Securities in USD which rose by 6.5%.

The fund's strong performance was driven by interest income, stable credit spreads in the non-agency RMBS sector and tactical positioning. Monthly returns were generally positive, with 11 of 12 positive months. During the period of market stress in April 2025, a modest drawdown occurred due to spread widening, but the fund's defensive structure helped mitigate losses.

Positioning

Throughout the year, the fund maintained a consistent allocation strategy focused on non-agency residential mortgage-backed securities (RMBS) issued prior to the 2008-2009 financial crisis (Legacy RMBS), which benefit from substantial home equity buffers.

As at 30 June 2025, approximately 7% of the portfolio was allocated to commercial mortgages, primarily in apartment complexes with low vacancy rates. We continued to avoid exposure to retail malls and office buildings. Over 95% of the securities held senior positions in the capital structure. The portfolio maintained a low effective duration, generally around one year - reflecting a conservative, income-focused approach. We believe that this defensive positioning allowed the fund to achieve attractive yields while managing risk.

Outlook

The second quarter of 2025 was dominated by developments in global trade policies and their implications for economic growth. Mortgage-backed securities (MBS) spreads widened following the initial tariff announcement but largely recovered over the quarter, mirroring trends across other fixed-income sectors. We believe this volatility reflected change in risk premiums rather than concerns over cashflow disruptions.

Despite ongoing uncertainty around US trade policy, immigration and the fiscal proposals that could significantly increase government debt levels, domestic consumers and the housing sector have remained largely unaffected. In our view, the RMBS sector continues to be an underappreciated relative safe haven, offering wide spreads both historically and relative to asset classes such as high yield bonds.

Looking ahead, the outlook for the US housing market remains constructive. Home prices are expected to remain stable, supported by limited housing supply, low foreclosure rates and strong consumer balance sheets. We believe that the credit quality of the underlying mortgages remains robust, even in the face of potential economic slowdown. Non-agency RMBS spreads

continue to offer attractive relative value compared to corporate credit, and the fund is well-positioned to capture income while preserving capital through its senior bond exposure and seasoned mortgage collateral.

30 June 2025

Commentary (Unaudited)

Market Background

The review period was characterised by a continued, albeit narrow, bull market for global equities. The MSCI AC World Index delivered a strong return of 16.3%, though these gains were concentrated in a small number of mega-capitalisation stocks. The market narrative was again dominated by the theme of Artificial Intelligence (AI), which propelled technology and communication services sectors to new highs, particularly in the US.

Against this backdrop of broadly concentrated returns, global central banks tracked along a challenging path, balancing persistent inflationary pressures with concerns over economic growth, particularly during the first half of 2025 when worries grew over the impact of rising US-driven global trade friction. While policy rates remained generally elevated for much of the period, market sentiment was buoyed by expectations of an eventual pivot towards monetary easing, with the European Central Bank extending earlier easing with a succession of interest rate cuts in 2025.

Performance

The GAM Star Disruptive Growth fund returned 9.4%, compared to the 16.8% gain in the benchmark, MSCI World Growth Index, partly reflecting our disciplined, valuation-aware approach in a market led to a large extend by a limited number of mega-cap stocks.

Our lack of exposure to Meta Platforms (owner of Facebook and WhatsApp) and semiconductor companies Micron Technology and Intel weighed on fund returns. While we continually evaluate these stocks, they did not meet our criteria for sustainable disruptive growth at valuations we deemed appropriate during the period. Although our favouring of Google-parent Alphabet and Danish pharmaceutical firm Novo Nordisk also weighed on returns over the period, our overweighting of Netflix supported performance as the streaming company's on-going investment in highly successful original content and advancements in its user experience generated further robust subscriber growth. Meanwhile, our favouring of Broadcom also contributed significantly, as the semiconductor firm capitalised on the demand for advanced networking and Al infrastructure.

Positioning

During the period, our focus remained firmly on identifying high-quality companies with durable competitive advantages that are fundamentally reshaping their industries.

We introduced a new holding in Sony Group. We believe the Japan-headquartered global consumer electronics conglomerate has considerable potential to significantly grow revenues from gaming, entertainment and financial services on the basis of its multi-faceted franchise as platform owner, content creator and display/audio technology.

We also added a large new stake in ASM International, a supplier of capital semiconductor equipment that specialises in Atomic Layer Deposition (ALD), a process for depositing ultra-thin film layers, one atomic layer at a time, onto a silicon substrate. Thanks to changes in transistor structure and the ongoing shrinkage of devices, this technology is enabling ASM to disrupt the semiconductor deposition market.

While we extended our overweight in strongly performing Japanese consulting firm BayCurrent, we took profits and exited our position in health care technology company Omnicell, locking in strong gains for the fund.

Outlook

Looking ahead, we maintain our conviction in the long-term potential of companies driving and benefiting from disruptive innovation. While near-term market volatility may persist amid heightened trade tensions and an uncertain global interest rate environment, we believe the current backdrop presents compelling opportunities to invest in high-quality growth companies at more reasonable valuations.

In this environment, our focus remains firmly anchored in our long-standing investment process. We will continue to evaluate opportunities through the lens of our broader thematic framework, prioritising businesses with innovative disruptive potential that are structurally advantaged, capable of generating consistent free cash flow and committed to long-term shareholder value creation.

We believe that a disciplined approach, centred on identifying high-quality growth-orientated companies with real disruptive potential, robust balance sheets, sustainable pricing power and exposure to secular growth trends, offers the most appropriate path through the current complexities. The portfolio remains positioned to capitalise on these long-term themes, with core allocations to companies we believe are well-placed to compound value for our investors over a multi-year horizon.

30 June 2025

Commentary (Unaudited)

Market Background

The review period was characterised by a continued, albeit narrow, bull market for global equities. The MSCI AC World Index delivered a strong return of 16.3%, though these gains were heavily concentrated in a small number of mega-capitalisation stocks. The market narrative was again dominated by the theme of Artificial Intelligence (AI), which propelled technology and communication services sectors to new highs, particularly in the US.

Against this backdrop of broadly concentrated returns, global central banks tracked along a challenging path, balancing persistent inflationary pressures with concerns over economic growth, particularly during the first half of 2025 when worries grew over the impact of rising US-driven global trade friction. While policy rates remained generally elevated for much of the period, market sentiment was buoyed by expectations of an eventual pivot towards monetary easing, with the European Central Bank extending earlier easing with a succession of interest rate cuts in 2025.

Performance

The GAM Star Global Equity fund returned 9.7%. While a positive absolute result, this trailed behind the benchmark's 16.3% gains, partly reflecting our disciplined, valuation-aware approach in a market led by momentum.

The fund's underperformance can be largely attributed to our deliberate underweight positioning in some of benchmark's largest and most expensive constituents. Our cautious stance towards Al-focused chip giant NVIDIA was the single largest drag on relative returns. Similarly, being underweight in the healthcare giant Novo Nordisk also detracted as its shares continued their ascent. Our holding in UnitedHealth Group also weighed on performance.

Despite these headwinds, our stock selection generated significant value in several areas. An overweight position in semiconductor firm Broadcom was a key contributor, allowing us to participate in the AI theme in a company we believed offered an attractive valuation and robust cash flow profile. In financials, our holding in JPMorgan performed strongly amid a resilient economic environment. Our decision to have no holding in Apple proved to be a significant positive contributor to relative performance amid tariff concerns. Elsewhere, a position in UK aerospace & defence firm BAE Systems delivered strong returns as geopolitical risk remained elevated.

On the negative side, our position in SharkNinja, a company we rate for its ability to use technology to disrupt the consumer appliance market, detracted from performance due to concerns over the effects of trade tariffs.

Positioning

We remained committed to our philosophy of investing in high-quality companies at sensible multiples, focusing on long-term value creation rather than chasing short-term market trends. This led us to exit several positions where valuations appeared stretched or the risk/reward profile had deteriorated. We exited our residual holding in Money Forward and, as noted, our decision to avoid Apple was beneficial while our disposal of Novo Nordisk detracted.

Our positioning reflects a belief in the importance of diversification. While the US market has been the primary engine of global returns, we identified attractive opportunities in other regions. European markets, for example, offer a diverse set of global leaders across sectors like industrials, energy and luxury goods, providing a valuable way to de-concentrate portfolio risk away from US technology. Our holding in Sony Group demonstrates this approach of seeking global leaders based outside of the US – we believe the Japan-headquartered global consumer electronics conglomerate has considerable potential to significantly grow revenues from gaming, entertainment and financial services on the basis of its multi-faceted franchise as platform owner, content creator and display/audio technology.

The portfolio remains tilted towards companies with strong balance sheets, sustainable competitive advantages, and management teams with a clear record of excellent capital allocation.

Outlook

We anticipate that market volatility will remain elevated as heightened trade tension and an uncertain global interest rate environment continue to shape

investor sentiment. Diverging monetary policy paths among major central banks are likely to fuel currency fluctuations and contribute to shifting capital flows. In this environment, our focus remains firmly anchored in our long-standing investment process. We will continue to evaluate opportunities through the lens of our broader thematic framework, prioritising businesses that are structurally advantaged, capable of generating consistent free cash flow and committed to long-term shareholder value creation.

We believe that a disciplined approach, centred on identifying high-quality companies with robust balance sheets, sustainable pricing power and exposure to secular growth trends, offers the most prudent path through the current complexities. The portfolio remains positioned to capitalise on these long-term themes, with core allocations to companies we believe are well-placed to compound value for our investors over a multi-year horizon.

Commentary (Unaudited)

Market Background

During the period under review, credit markets performed well against a backdrop of gradually declining inflation and resilient growth data, pointing to a soft-landing scenario. We saw a number of risk-off events that were short lived. There was some volatility on interest rates, but US and Euro Government interest rates finished the period lower. Spreads on our securities tightened during the year. For instance, spreads within EUR Additional Tier 1 (AT1) Contingent Convertible bonds (CoCos) tightened from 400 basis points (bps) to 318 basis points. On top of that, market technicals remain very strong. As an example, in H1 2025, we saw more than USD 31 billion of AT1 CoCos issued, which was met by a huge demand of more than USD 190 billion. It is important to note that the overall AT1 CoCo market represents approximately USD 230 billion, so this demand was very significant. Regarding extension risk, this number went down during the year from 28% to currently 13% of the AT1 CoCos market being priced to perpetuity. However, this number went up to 50% during the April selloff, which was the largest risk-off event in the past year. Spreads on EUR AT1 CoCos widened to 450 bps during that period. We took the opportunity to add to AT1 CoCos during this April selloff, which was short-lived and relatively mild for credit markets. Moreover, markets recovered quickly and as such, we did not increase our exposure above 25% during the selloff. Spreads being closer to historical tights and extension risk being relatively low suggest that there remains more value in Tier 2 and senior bonds from financials, and moreover this gives us dry powder should we see a drawdown.

Performance

The institutional share class was up 7.98% during the year, compared to the rise of 6.05% in the Bloomberg Euro Aggregate Corporate Total Return Index (EUR). As stated above, credit spreads tightened during the year.

Positioning

We believe that the fund remains extremely robust and well positioned in term of credit/interest rate/liquidity risk. Tactical changes were made across the capital structure depending on market conditions. However, those were relatively limited given the robustness of markets. The main changes made were during the small selloff in April where we increased AT1 CoCos at very attractive yields going from 8-9% to higher. However, the selloff was short-lived and mild for credit markets, and as such we did not increase our exposure above 25% during the selloff.

The fund captured 3.57% of income during the year. With a yield to maturity of 4.49% and a yield to call of 3.91%, we believe we are well-placed to continue capturing high income going forward.

Outlook

Credit markets were strong in the past year. During the April selloff, the impact on credit spreads was significantly lower than the volatility seen on equity markets. Markets seem to currently be unaffected by tariff rhetoric and geopolitical issues. Moreover, market technicals are relatively strong due in large part by investors being attracted by the "all-in" yields. However, as we have seen in the past, when valuations are close to the tightest, caution is required. On top of that, extension risk on AT1 CoCos remains closer to the lower end. We demonstrated during the small selloff in April that we are well positioned for any drawdown. Moreover, we used some dry powder to add to AT1 CoCos during that small selloff. As such we feel that we are well positioned going forward, capturing an attractive yield with a very conservative portfolio — mitigating the potential downside risk and with significant dry powder to take advantage of potential market volatility.

The Company is an umbrella fund with segregated liability between Funds. Accordingly any liability incurred on behalf of or attributable to any Fund of the Company shall be discharged solely out of the assets of that Fund, and neither the Company nor any director, receiver, examiner, liquidator, provisional liquidator or other person shall apply, nor be obliged to apply, the assets of any such Fund in satisfaction of any liability incurred on behalf of or attributable to any other Fund of the Company, irrespective of when such liability was incurred.

(Formerly known as GAM Star Worldwide Equity)

GAM Sustainable Climate Bond

2. Accounting policies

The significant accounting policies and estimations techniques adopted by the Company are as follows:

(a) Basis of preparation of financial statements

These financial statements have been prepared in accordance with FRS 102: the Financial Reporting Standard applicable in the Republic of Ireland, Irish Statute comprising the Companies Act 2014 and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the "UCITS Regulations") and under the Central Bank (Supervision and Enforcement) Act, 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations"). Accounting standards generally accepted in Ireland in preparing financial statements giving a true and fair view are those published by the Institute of Chartered Accountants in Ireland and issued by the Financial Reporting Council ("FRC").

The Companies Act 2014 prescribed formats for financial statements have been adapted to make them more applicable to investment funds. The Company has availed of the exemption available to open ended investment funds that hold a substantial proportion of highly liquid and fair valued investments under FRS 102 and is not presenting cash flow statement. The information required by FRS 102 to be included in a statement of comprehensive income, is in the opinion of the Directors, contained in the Profit and Loss Account of each Fund.

On initial application of FRS 102, in accounting for its financial instruments, a reporting entity is required to apply either a) the full requirements of FRS 102 relating to Basic Financial Instruments and Other Financial Instruments Issues, b) the recognition and measurement provisions of IAS 39 Financial Instruments: Recognition and Measurement and only the disclosure requirements of FRS 102 relating to Basic Financial Instruments and Other Financial Instruments or c) the recognition and measurement provisions of IFRS 9 Financial Instruments and only the disclosure requirements of FRS 102 relating to Basic Financial Instruments and Other Financial Instruments.

The Company has elected to apply the recognition and measurement provisions of IAS 39 and only the disclosure requirements of FRS 102.

In arriving at the results for the financial year, all amounts in the Profit and Loss Account related to continuing activities for all open Funds. Open Funds are investment vehicles that remain active and continue to accept new subscriptions or investments, and typically allow investors to redeem their holdings at any time based on the Fund's net asset value. The open Funds noted within note 1 are prepared on a going concern basis, with the exception of the below which are all prepared on a basis other than going concern:

- GAM Star Alpha Technology,
- GAM Star Asian Equity,
- GAM Star Global Dynamic Growth,
- GAM Star Flexible Global Portfolio,
- GAM Star Tactical Opportunities,
- GAM Star US All Cap Equity.

On 21 January 2025, GAM Star US All Cap Equity merged into GAM Star Global Equity.

On 24 January 2025, GAM Star Alpha Technology merged into Liontrust Global Funds - Global Alpha Long Short Fund.

2. Accounting policies, continued

(a) Basis of preparation of financial statements, continued

On 18 March 2025, GAM Star Global Dynamic Growth merged into GAM Star Global Aggressive.

On 25 March 2025, GAM Star Flexible Global Portfolio and GAM Star Tactical Opportunities merged into GAM Star Global Moderate.

It is planned that on 24 November 2025, GAM Star Asian Equity will merge into GAM Star China Equity.

In the opinion of the Directors, the financial statements disclose the information required by the Companies Act 2014.

The financial statements have been prepared for all open Funds under the historical cost convention, as modified by the revaluation of financial assets and financial liabilities (including derivative instruments) at fair value through profit or loss.

(b) Investments at fair value

Classification

This category has two sub-categories: financial assets and liabilities held for trading, and those designated at fair value through profit or loss at inception. Financial assets or liabilities held for trading are acquired or incurred principally for the purpose of selling or repurchasing in the short term. Derivatives are also categorised as held for trading, as the Company does not designate any derivatives as hedges in a hedging relationship.

Recognition/Derecognition

Purchases and sales are recognised on trade date – the date on which the Company commits to purchase or sell the asset. Investments are derecognised when the rights to receive cash flows from the investments have expired or the Company has transferred substantially all risks and rewards of ownership.

Measurement

Financial assets and liabilities are initially recognised at fair value, and transaction costs for all financial assets/liabilities carried at fair value through profit or loss are expensed as incurred. Subsequent to initial recognition, all financial assets and liabilities at fair value through profit or loss are measured at fair value.

The computation of realised gains and losses on sales of financial assets and liabilities at fair value through profit or loss is made on the basis of average cost and accounted for in the Profit and Loss

Gains and losses arising from changes in the fair value of the 'financial assets and financial liabilities at fair value through profit or loss' category are included in the Profit and Loss Account in the financial period in which they arise.

Fair value estimation

The fair value of financial instruments traded in active markets (such as publicly traded derivatives and trading securities) is based on quoted market prices at the balance sheet date. The quoted market price used for financial assets and liabilities held by the Company is the last traded price. GAM Star Cat Bond fund positions are fair valued using average of multiple broker quotes or single broker quote.

In the case of any security not listed, quoted or dealt with on a regulated market or for which no quotation or value is readily available which would provide a fair valuation, or in respect of which the price is unrepresentative, the fair value of such security is

determined by the Directors or other competent person appointed by the Directors and approved for the purpose by the Depositary, using the market approach which consists of estimating the fair value of these securities using a comparable multiple of revenue for similar guideline public companies.

Shares or units in any collective investment scheme which provides for those shares or units to be redeemed at the option of their holder out of the assets of the undertaking shall be valued at the last published unaudited NAV per share.

The Company may from time to time invest in financial instruments that are not traded in an active market (for example in over the counter derivatives). The fair value is determined by using valuation techniques. The Company uses a variety of methods and makes assumptions that are based on market conditions existing at each balance sheet date. Valuation techniques used include the use of comparable recent arm's length transactions, discounted cash flow analysis, option pricing models and other valuation techniques commonly used by market participants. Any such securities are disclosed in the portfolio statements.

Critical accounting estimates and assumptions

Management makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition seldom equal the actual related results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the financial year are Debt securities as noted below and Level 3 positions as disclosed in note 4 Fair value hierarchy.

Debt securities

Debt securities are valued on the basis of dealer supplied quotations or by using a pricing service selected by the Manager. The fair value of the instrument is estimated using valuation techniques if a quoted market price is not available from a broker/dealer or a third party pricing service. Valuation methods include the use of recent unaffiliated market transactions, reference to the current fair value of another instrument that is substantially the same, discounted cash flow techniques or any other valuation technique that provides a reliable estimate of prices obtained in actual market transactions.

Financial derivatives

Funds may hold derivatives for investment purposes and/or efficient portfolio management purposes as described in the relevant Supplement to the Prospectus.

When entering into a forward foreign currency exchange contract, the Funds agree to receive or deliver a fixed quantity of foreign currency for an agreed price upon an agreed future date. These contracts are valued daily at the forward rate and the Fund's equity therein, representing unrealised gains or losses on the contracts, is included in the Balance Sheet. The unrealised gain/(loss) on open forward exchange contracts is calculated by reference to the difference between the contracted rate and the rate to close out the contract. Realised and changes in unrealised gains and losses are included in the Profit and Loss Account.

2. Accounting policies, continued

(b) Investments at fair value, continued

Financial derivatives, continued

(ii) Futures contract

A futures contract obligates one party to sell and the other party to purchase a specific instrument for an agreed price on an agreed future date. Initial margin deposits made with respect to futures contacts are recognised as assets due from the Fund's broker agent in acquiring the futures position. Subsequent changes in the daily valuation of open contacts are recognised as changes in unrealised gains and losses. Variation margin payments are made or received on traded futures as appreciation or depreciation occurs. Futures contracts are valued using quoted daily settlement prices established by the exchange on which they trade. Realised gains or losses are recorded when a contract is closed and are included in the Profit and Loss Account. Futures contracts are included in Financial assets at fair value when the fair value is positive, and in Financial liabilities when the fair value is negative in the Balance Sheet.

(iii) Interest rate swaps

Interest rate swaps may be used as a substitute for a physical security or a less expensive or more liquid way of obtaining desired exposures. These are valued on the valuation date using either market vendors or central counterparty clearing house prices and any realised and changes in unrealised gains and losses are included in the Profit and Loss Account. Interest rate swaps are included in Financial assets at fair value when the fair value is positive, and in Financial liabilities when the fair value is negative in the Balance Sheet.

Some of the interest rate swaps are centrally cleared positions. In a centrally cleared swap, immediately following execution of the swap agreement, the swap contract is novated to a clearing counterparty and the Funds faces the clearing counterparty through a broker. Upon entering into a centrally cleared swap the Funds are required to deposit initial margin with the broker in the form of cash in an amount that varies depending on the size and risk profile of the swap.

(c) Income from Investments

Dividend income is recognised on the ex-dividend date. All dividends on investments quoted ex dividend up to the Balance Sheet date are included in the Profit and Loss Account.

Bank and other interest receivable is accrued up to this date. Income is shown gross of any non-recoverable withholding taxes, which is disclosed separately in the Profit and Loss Account, and net of attributable tax credits.

Bond interest income on investments on debt securities is recognised when earned using the effective interest method and is shown in the Profit and Loss Account. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument to the net carrying amount of the financial asset or liability.

Cash inflows relating to interest payments on swaps are treated as swap income and are shown in the Net gains/(losses) on investments at fair value in the Profit and Loss Account.

(d) Cross holdings

During the financial years ended 30 June 2025 and 30 June 2024, a number of the Funds invested in other Funds in the Company (the "Cross Investments"). The fair value of these investments as of 30 June 2025 is disclosed within each relevant Fund's Portfolio Statement. For the purposes of producing the combined financial statements these Cross Investments must be eliminated in order to prevent double counting. Further information regarding the Cross Investments is disclosed in note 14.

(e) Gains and losses on financial assets and financial liabilities

The net gains and losses from trading in financial assets and financial liabilities shown in the Profit and Loss Account are analysed in note 11 to the financial statements.

(f) Foreign Currency Translation – Functional currency and Presentation currency

The financial statements of the individual Funds are prepared in the functional currency of the respective Fund which is also the presentation currency. The functional currency of each Fund is listed in note 1. The functional currency of the Company is US dollar as this reflects the global exposure of the Funds, their shareholders and the markets in which the Funds are available.

The aggregated financial statements of the Company are prepared in the presentation currency of the Company, the US dollar. Amounts of the individual Funds in overseas currencies are translated for the purpose of the aggregation as follows:

- (i) Using average exchange rates (as an approximation of actual) for the financial year for the Profit and Loss Account.
- (ii) Using average exchange rates (as an approximation of actual) for the financial year for the proceeds and cost of issue and redemption of shares for the Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders.
- (iii) Using financial year end exchange rates for the Balance Sheet.

For the purposes of producing the aggregated financial statements, the notional currency gain or loss on the re-translation of the opening net assets attributable to redeemable participating shareholders into US dollar, the presentation currency of the Company, is included in the Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders. This figure also includes the notional gain or loss from use of average rates as noted above compared to the financial year end exchange rates for the Balance Sheet.

Transactions and balances

Foreign currency transactions are translated into the functional currency of the individual Funds using the average exchange rates (as an approximation of actual). Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at financial year end rates of monetary assets and liabilities denominated in foreign currencies are recognised in the Profit and Loss Account. Translation differences on non-monetary assets and liabilities are recognised in the Profit and Loss Account within net gains/(losses) on investments at fair value line.

(g) Fees and expenses

Fees and expenses are accounted for on an accruals basis and are charged against income and used in determining the distribution.

2. Accounting policies, continued

(h) Allocation of income

All the income of the Funds after deduction of expenses, will be allocated between holders of Accumulation Shares and holders of Income Shares in accordance with their respective interests.

(i) Equalisation

An equalisation account is maintained by each Fund so that the amount distributed is the same for all shares of the same type notwithstanding different dates of issue. A sum equal to that part of the price of a share which reflects the net income at the date of issue or redemption is booked to the equalisation account and added or deducted to/from the first dividend or accumulation in the same accounting period as that in which the shares are issued or redeemed.

(j) Redeemable participating shares

The issued redeemable participating share capital is at all times equal to the NAV of the Company. Redeemable participating shares are redeemable at the shareholders option and are classified as financial liabilities. Redeemable shares can be put back to the Company at any time for cash equal to a proportionate share of the Company's NAV. The redeemable share is carried at the redemption amount that is payable at the balance sheet date if the holder exercises the right to put the share back to the Company. The movement in the number of participating shares is set out in note 15. Each Fund's NAV per share is calculated by dividing the NAV of each Fund being the value of its assets less its liabilities by the numbers of shares of each Fund then in issue.

(k) Distributions

Dividend distributions to redeemable participating shareholders are classified as finance costs in the Profit and Loss Account in the financial year in which they are declared. Where both Income Shares and Accumulation Shares in a Fund are in issue, all income of a Fund after deduction of expenses will be allocated between holders of Accumulation Shares and holders of Income Shares in accordance with their respective interests.

(I) Sundry income

Sundry income includes amounts received by the Company in respect of litigation payments, fee rebates received and in respect of securities lending income. These amounts are recorded on an accruals basis.

(m) Taxes

Liabilities relating to uncertain tax positions are accrued only when such liabilities are probable and can be estimated with reasonable accuracy. These figures are recognised in the Balance Sheet within capital gains tax payable line.

The Organisation for Economic Co-operation and Development (OECD) released the Pillar Two model rules (the Global Anti-Base Erosion Proposal, or 'GloBE') to reform international corporate taxation. The Pillar Two legislation was enacted in Ireland and is effective for the financial year beginning 1 July 2024. The Company has assessed the impact of the OECD Pillar II GLoBE rules and concluded that the Company and the Funds meet the criteria for the Investment Fund exemption under Pillar II and are out of scope for the financial year ended 30 June 2025.

(n) Bond interest receivable on financial assets at fair value through profit or loss

Bond interest receivable on investments in debt securities is recognised when earned using the effective interest method.

(o) Bank interest expense

Bank interest expenses relate to a bank overdraft which is repayable on demand. These figures are recognised in the Profit and Loss Accounts within bank interest.

(p) Amounts receivable for subscriptions and payable for redemptions

Amounts receivable for subscriptions and payable for redemptions relates to subscriptions in the Company which are not yet paid by the investors and redemptions from the Company that are still to be paid by the Company to the investors.

(q) Amounts receivable from brokers for sales of securities and payable to brokers for purchases of securities

Amounts receivable from brokers for sales of securities and payable to brokers for purchases of securities represent amounts receivable and payable respectively, for transactions contracted for but not yet delivered at the end of the financial year. These amounts are included in the Balance Sheet.

(r) Cash and cash equivalents and bank overdraft

Cash and cash equivalents comprise deposits with banks and highly liquid financial assets with maturities of three months or less from the date of acquisition, that are subject to a significant risk of changes in their fair value and are used by the Funds in the management of short-term commitments, other than cash collateral provided in respect of derivatives and securities borrowing transactions.

3. Financial risk management

The investment objectives of the Funds may expose the Company to a variety of financial risks: market risk (including currency risk, interest rate risk and price risk), credit risk and liquidity risk (including cash flow risk) both directly through its own assets and liabilities and indirectly through the assets and liabilities of the funds ("investee funds") that some of the Funds invest in.

As outlined in the Prospectus, the Funds are subject to certain investment restrictions and may also use certain derivative financial instruments for both investment purposes and also in an attempt to moderate certain risk exposures. Further, the Board of Directors of the Company have the power to borrow on a temporary basis. Such borrowing will not exceed 10 per cent of a respective Fund's net assets.

Financial risk management of the Company has been delegated by the Board of Directors (which however remains ultimately responsible) to the Manager. The Board of Directors review the performance of the Company on a quarterly basis and can confirm that there have been no significant changes to risk management procedures since the prior financial year.

(a) Market price risk

The Funds' investments are susceptible to market price risk arising from uncertainties about future prices. It represents the potential loss the Company might suffer through holding market positions in the face of price movements caused by factors specific to the individual investment or factors affecting all instruments traded in the market.

For those Funds, which do not use the Value at Risk ("VaR") approach, the Co-Investment, and Delegate Investment Managers use the analysis of the Funds Investments by Strategy, Sector and Asset Type which show the concentrations of risk and are disclosed in the relevant Portfolio Statement of each Fund.

The Co-Investment Managers and Delegate Investment Managers manage market risk on an ongoing basis by implementing a set of procedures and controls, for those Funds which use the VaR approach, the purpose of which is to manage risk within defined parameters. The Co-Investment Manager regularly review and evaluate each Fund's VaR to assess exposure to market risk. Risk can be calculated using either the commitment approach or VaR method.

Market price sensitivity analysis

At 30 June 2025 and 30 June 2024, if the fair value of investments had changed by 10% with all other variables held constant, this would have resulted in a change of net assets attributable to holders of redeemable shares and would amount to the following:

	30 June 2025	30 June 2024
GAM Star Alpha Spectrum	€6,819,152	€7,378,695

Notes to the Financial Statements

3. Financial risk management, continued

(b) Currency risks

The Funds may hold assets and liabilities denominated in currencies other than their respective functional currency. Therefore they may be exposed to currency risk, as the value of the assets and liabilities denominated in other currencies may fluctuate due to changes in exchange rates

The Co-Investment Managers and Delegate Investment Managers monitor the currency exposure each dealing day whether used for hedging or investment purposes in accordance with the Prospectus. Currency exposure used for hedging techniques is normally done in order to remove or reduce currency risks within the relevant Fund where appropriate.

Currency risk sensitivity analysis

At 30 June 2025 and 30 June 2024, had the exchange rate between the functional currency and the non functional currencies arising from changes in the value of monetary assets/(liabilities) and hedging positions of the Funds changed by 5%, with all other variables held constant, the impact on net assets attributable to holders of redeemable shares would be as per the table below. Other Funds may not be listed below as they did not hold monetary assets/(liabilities) in non functional currencies at 30 June 2025 and 30 June 2024.

GAM Sustainable Climate Bond	€41,244	€33,610

¹ Merged into Liontrust Global Funds - Global Alpha Long Short Fund on 24 January 2025.

(c) Net currency hedging

The following tables sets out the Funds' exposure to foreign currency risk, the notional value of the forward foreign currency exchange contracts designed to hedge this exposure and the resulting net unhedged amounts invested in assets denominated in foreign currency.

In addition to currency risk on a Funds' assets, a class of shares of a Fund may be designated in a currency other than the functional currency of the Fund. Changes in the exchange rate between the functional currency and such designated currency may lead to a depreciation of the value of such shares as expressed in the designated currency. Depreciation of that nature may also occur as a result of changes in the exchange rate between the designated currency of a particular class and the currency of denomination of the assets of the Fund attributable to that class.

The Fund's Co-Investment Manager and Delegate Investment Manager may or may not try to mitigate these risks by using financial instruments such as forward foreign currency exchange contracts. Although hedging strategies may not necessarily be used in relation to each class of share within a Fund, the financial instruments used to implement such strategies shall be assets/liabilities of the Fund as a whole. However the gains/losses on and the costs of the relevant financial instruments will accrue solely to the relevant class of shares of the Fund.

² Merged into GAM Star Global Aggressive on 18 March 2025.

³ Merged into GAM Star Global Moderate on 25 March 2025.

3. Financial risk management, continued

(c) Net currency hedging, continued

For those Funds not shown below, all assets/liabilities are in the functional currency of the Fund and are therefore not subject to foreign currency risk

	-	672,198	(665,960)	6,238

(d) Interest rate risk

At 30 June 2025 and 30 June 2024 had the interest rates changed by +/-0.75%, with all other variables held constant, the impact on net asset attributable to holders of redeemable shares would be +/- US\$13,510,258 (2024: US\$18,969,388) of the total interest rate sensitivity gap figures presented in the tables below.

The Funds not included in the following tables did not hold interest bearing securities in their porfolios as at 30 June 2025 and therefore were not exposed to material interest rate risk at the financial year end.

The tables below show the expected maturity of Assets and Liabilities held as at 30 June 2025.

The majority of the assets of the other Funds are equity shares and other investments which neither pay interest nor have a maturity date. As a result, these Funds are not subject to significant amounts of risk due to fluctuations in the prevailing levels of market interest rates.

The majority of the cash positions of the Company were held with State Street Bank and Trust, earning interest rates which are based on current, most appropriate rates, less a spread as determined by the Depositary. This interest rate risk is not actively managed.

(e) Credit risk

The Company may be exposed to credit risk, which is the risk that a counterparty to a financial transaction with the Company will be unable to pay amounts in full when due.

For Funds which hold equities, transactions are in exchange traded securities and are settled/paid for upon delivery (DVP Trades) and the risk of default is considered minimal, as security delivery and payment are simultaneous. The trade will fail if either party fails to meet its obligation.

The Company, through the investment in investee funds, may also be exposed to any credit risk which these investee funds have at any point in time. The maximum credit risk which the Company may have in relation to these investments is the value of its investment in the Funds.

Investments in bonds and debt income securities are subject to risk (generally lower where securities are rated above investment grade) that payments may not be made by issuers on due dates or at all.

The Co-Investment Managers and Delegate Investment Managers manage credit risk for cash and derivatives by only using approved counterparties that belong to an internationally recognised financial services firm or alternatively command a high market share in a given market segment. The Company's intention would be to net its liabilities due to any counterparty against any asset due from the same counterparty. Details of investments and cash held with various brokers are disclosed in the relevant Portfolio Statement of each Fund and in note 13.

The Company participated in securities lending as disclosed in note 5. The Company ensures that collateral received in respect of securities lent must equal or exceed, in value, at all times, the value of the securities loaned.

The majority of the investments and cash held by each Fund are with the Depositary. Cash and bank balances and margin cash balances are unsecured balances held with the Depositary and counterparties as set out in note 13. Bankruptcy or insolvency of the Depositary or brokers it uses may cause the Company's rights with respect to its cash and investments held by the Depositary or brokers to be delayed or limited. Please refer to note 5 for amounts held as collateral for stock lending as 30 June 2025 and 30 June 2024.

The Company's investments held with the Depositary are held within segregated accounts. Any profit (net of margin held by the Company) on over the counter derivatives due from counterparties is unsecured. At 30 June 2025 and 30 June 2024, the credit rating of the Depositary was equal to A according to Standard & Poor's.

(f) Liquidity risk

The majority of Funds are exposed to daily cash redemptions of redeemable shares and therefore may be exposed to liquidity risk and cash flow risk which is the risk that they will encounter difficulty in liquidating assets to fund redemptions. However, as the Funds invest the majority of their assets in investments that are traded in active markets and can be readily disposed of, liquidity risk and cash flow risk is considered low. The Co-Investment Managers and Delegate Investment Managers manage liquidity risk and cash flow risk through the diversification of investments and investment strategies and through their overall investment approach.

The Directors are entitled to limit the number of Shares of a Fund redeemed on any Dealing Day to 10% of the total number of Shares of that Fund in issue or equal to 10% or more of the Net Asset Value of a particular Fund. In this event, the limitation will apply pro rata so that all Shareholders wishing to have their Shares of that Fund redeemed on that Dealing Day will realise the same proportion of such Shares for which a redemption request has been accepted by the Manager and any Shares not redeemed, but which would otherwise have been redeemed, will be carried forward to be

3. Financial risk management, continued

(f) Liquidity risk, continued

redeemed on the next Dealing Day. If requests for the redemption of Shares are so carried forward, the Directors will inform the Shareholders affected.

The Articles contain special provisions where redemption requests received from any one Shareholder would result in more than 5% of the Net Asset Value of Shares of the relevant Fund being redeemed by the Shareholders of the Company on any Dealing Day. In such a case, the Company may, without the consent of the Shareholder, satisfy the redemption request by a distribution of investments in specie and may, elect by notice in writing to the Shareholder to appropriate and transfer to him such assets in satisfaction or part satisfaction of the redemption price or any part of the said redemption price, provided that any such distribution will cause no material prejudice to the interests of remaining Shareholders. Where a notice of election is served on a Shareholder, the Shareholder may, by a further notice served on the Company, require the Company instead of transferring the assets in question to arrange for a sale of the assets on behalf of the Applicant after the repurchase has been effected in a method and at a price to be chosen at the Company's sole discretion and for payment to the Shareholder of the net proceeds of sale.

Termination of a Fund or Share Class

The Manager may close or terminate a Fund or a Share class of a Fund or a Series of Shares at its absolute discretion through the return of capital to the Shareholders in the circumstances set out in the Articles of Association which includes inter alia, where after the date of first issue of Shares in the Fund, Share class or Series, the Net Asset Value of the Fund or Share Class or Series is less than US\$ 50,000,000 (or its foreign currency equivalent).

Suspension of Determination of NAV and or issue, redemption and switching

The Directors may at any time declare a temporary suspension of the calculation of the Net Asset Value of any Fund and the issue/redemption of Shares of any Fund and the switching of Shares in one Fund for those of another or between classes or Series in the one Fund.

Any such suspension of the determination of the NAV of any Fund and/or issue, redemption and/or switching of the Shares shall be notified immediately (without delay) to the Central Bank and to the competent authorities in the Member States in which the relevant class of Shares or Series is marketed. It shall also be notified if applicable to Euronext Dublin and to Shareholders requesting the issue or redemption of Shares of the relevant class or Series by the Directors at the time of application or the making of the irrevocable request to redeem. Any such redemption request which is not withdrawn shall be dealt with on the first Dealing Day after the suspension is lifted at the relevant redemption price prevailing on that day.

Any such suspension of switching of Shares shall be notified to the Shareholders requesting such a switch and, where the relevant switch notice is not withdrawn, any such switch shall be dealt with on the first Dealing Day after such suspension is lifted.

Where the Directors declare a temporary suspension of the determination of the NAV of the Fund, no Shares will be issued (except where an application for Shares was previously received), redeemed or switched on any Dealing Day during the financial

period of suspension. Where the Directors only declare a temporary suspension of the issue, redemption and/or switching of Shares, the determination of the NAV of the relevant Fund, class of Shares and Series and the NAV per Share shall continue to be calculated.

The Company may from time to time invest in derivative contracts traded over the counter and certain other investments, which are not traded in an organised market and may be illiquid. As a result, the Company may not be able to liquidate quickly its investments in these instruments at an amount close to their fair value to meet its liquidity requirements or to respond to specific events such as deterioration in the credit worthiness of any particular issuer. Details of open derivative contracts are disclosed in the relevant Portfolio Statement of each Fund.

The tables overleaf analyses the Company's financial liabilities into relevant maturity groupings based on the remaining period at the balance sheet date to contractual maturity date. The amounts in the tables are the contractual undiscounted cash flows.

	. , , ,				

In the event of liquidity issues, the Company may borrow to meet redemptions. The Directors are also entitled to limit the number of shares of a Fund redeemed on any dealing day to 10% of the total number of shares of that Fund in issue.

4. Fair value hierarchy

The Company is required to classify fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The guidance establishes three levels of the fair value hierarchy as follows:

Level 1: Inputs that reflect unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access at the measurement date:

Level 2: Inputs other than quoted prices from active markets that are observable for the asset or liability either directly or indirectly, including inputs from markets that are not considered to be active;

Level 3: Inputs that are unobservable and are significant to the valuation.

The Company uses the "market approach" valuation technique to value its investments. A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. However, the determination of what constitutes "observable" may require significant judgement but can generally be considered as that market data which is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market. The categorisation of a financial instrument within the hierarchy is based upon the pricing transparency of the instrument and does not necessarily correspond to the risk of that instrument.

4. Fair value hierarchy, continued

Investments typically classified within level 1 include active listed equities, exchange traded derivatives and certain government bonds. Investments typically classified within level 2 include investments in corporate bonds, certain government bonds, certain listed equities and over the counter derivatives. Investment funds are also considered level 2 investments if there is evidence that redemptions occurred during the financial year and there were no restrictions preventing redemptions at the financial year end. As level 2 investments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be As at 30 June 2025

adjusted to reflect illiquidity and/or non-transferability. Such adjustments are generally based on available market information.

Investments typically classified within level 3 include positions priced by single broker quote, certain corporate bonds, private equities and investment funds that have suspended redemptions, created side pocket classes or imposed gates. Within level 3, the use of the market approach generally consists of using comparable market transactions.

³ Merged into GAM Star Global Moderate on 25 March 2025.

5. Securities lending, continued

The collateral noted above, consisted of sovereign bonds issued by the government of the Canada, Federal Republic of Germany, French Republic, Kingdom of Belgium, Kingdom of Denmark, Kingdom of Norway, Kingdom of Sweden, Kingdom of the Netherlands, Republic of Austria, Republic of Finland, State of Japan, United Kingdom of Great Britain and United States of America (30 June 2024: sovereign bonds issued by the governments of the United States of America).

Taxation

Under current Irish law and practice, the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997 (as amended). It is not chargeable to Irish tax on its income and gains. However, tax can arise on the happening of a "Chargeable Event" in the Company. A Chargeable Event includes any distribution payments to shareholders or any encashment, cancellation, redemption or transfer of shares.

No Irish tax will arise on the Company in respect of Chargeable Events in respect of a shareholder who is not an Irish Resident and not Ordinarily Resident for tax purposes in Ireland at the time of the Chargeable Event provided that the appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act 1997, (as amended), are held by the Company; and certain exempted Irish resident investors who have provided the Company with the necessary signed statutory declarations. Following changes introduced by Finance Act 2010, investment undertakings will no longer be required to obtain relevant declarations from shareholders who are neither Irish Resident nor Ordinarily Resident in Ireland where the investment undertaking is not actively marketed to Irish investors and the Irish Revenue have given the investment undertaking the appropriate approval. With effect from 3 April 2010 a chargeable event will not arise if at the time of the chargeable event appropriate equivalent measures have been put in place by the Company to ensure that shareholders in the Company are neither Irish Resident nor Ordinarily Resident in Ireland and the Company has received approval from the Irish Revenue Commissioners to this effect and the approval has not been withdrawn.

Dividends, interest and capital gains (if any) which the Company receives with respect to its investments may be subject to taxes, including withholding taxes, in the countries in which the issuers of the investments are located and such taxes may not be recoverable by the Company or its shareholders.

The Organisation for Economic Co-operation and Development (OECD) released the Pillar Two model rules (the Global Anti-Base Erosion Proposal, or 'GloBE') to reform international corporate taxation. The Pillar Two legislation was enacted in Ireland and is effective for the financial year beginning 1 July 2024. The Company has assessed the impact of the OECD Pillar II GLoBE rules and concluded that the Company and the Funds meet the criteria for the Investment Fund exemption under Pillar II and are out of scope for the financial year ended 30 June 2025.

7. Exchange rates

The average exchange rates used to convert the Statement of Comprehensive Income and Statement of Changes in Net Assets Attributable to Holders of Redeemable Share into US dollars were:

8. Use of derivatives for Efficient Portfolio Management

For UCITS which have engaged in efficient portfolio management techniques, disclosures are required under the Central Bank UCITS Regulations. Subject to the conditions and within the limits from time to time laid down by the Central Bank of Ireland, and except as otherwise stated in the investment objective and policies of a Fund, the Co-Investment Managers and/or Delegate Investment Managers may employ, for certain Funds, investment techniques and instruments such as futures, options, forward foreign currency exchange contracts and other derivatives for investment purposes or efficient portfolio management. Furthermore, new techniques and instruments may be developed which may be suitable for use by a Fund in the future, and a Fund may employ such techniques and instruments subject to the prior approval of, and any restrictions imposed by, the Central Bank of Ireland.

8. Use of derivatives for Efficient Portfolio Management, continued

The Co-Investment Managers and/or Delegate Investment Managers of the Funds have identified that all financial derivative instruments are transactions designed to deliver additional returns through efficient portfolio management.

Details of all open transactions at the financial year end are disclosed in the Portfolio of Investments.

Securities lending transactions

Certain Funds may also utilise stock lending agreements for efficient portfolio management purposes as described above. All revenues from these arrangements entered into by a Fund, net of direct and indirect operational costs, will be returned to the relevant Fund. In such transactions the Fund may temporarily transfer its securities to a borrower, with agreement by the borrower to return equivalent securities to the Fund at a pre-agreed time. The identities of the entities to which any direct and indirect costs and fees are paid are disclosed in note 5. For further information on securities lending please refer to note 5.

Significant agreements and transactions with related parties

The Company and the Directors

Deborah Reidy and Andrew Bates each received a fee at the annual rate of €30,000 (2024: €30,000) gross subject to income tax deductions for their services as Directors to the Company for the financial year ended 30 June 2025. Kishen Pattani (resigned 14 March 2025), Martin Jufer (appointed 28 February 2025) and David Richard John Kemp (appointed 14 March 2025) are employees of the Co-Investment Manager (GAM) and waived their fees for acting as a Directors of the Company.

See note 12(b) for directors fees incurred by the Company.

The Company and the Manager, the Global Distributor, the Investment Managers and the Transfer Agent

At the financial year end, accrued expenses included amounts owing to the Manager, the Global Distributor, the Co-Investment Managers and the Transfer Agent of US\$4,093,308 (2024: US\$5,005,395).

See note 12(b) for the Manager (including Transfer Agent Fee), the Global Distributor and the Investment Manager fees incurred by the Company and Funds.

During the year, GAM Star Cat Bond Fund sold securities to other entities managed by the former Delegate Investment Manager, Fermat Capital Management LLC, with sale proceeds of approximately US\$787 (2024: US\$80) million. The sale of the securities gave rise to a realised loss of US\$5.8 (2024: US\$0.2) million

During the year, GAM Star Cat Bond Fund purchased securities from another entity managed by the Co-Investment Manager, Swiss Re Insurance-Linked Investment Advisors Corporation, with a cost of approximately US\$13 million (2024: US\$Nil).

During the year, the following mergers were effected through the transfer of all assets, liabilities and investors between the Funds:

- GAM Star Global Dynamic Growth to GAM Star Global Aggressive on 18 March 2025;

- GAM Star Flexible Global Portfolio and GAM Star Tactical Opportunities to GAM Star Global Moderate on 25 March 2025;
- GAM Star US All Cap Equity to GAM Star Global Equity on 21 January 2025.

Any such transactions have been entered into the ordinary course of business

See note 10 for performance fees incurred by the Company and Funds.

The Company invests in other funds that are also managed by the Co-Investment Managers of the Company. There are no management fees charged on these investments at the Company level. During financial year ended 30 June 2025 and 30 June 2024 three GAM Star Funds (GAM Star Alpha Spectrum, GAM Star Composite Global Equity, GAM Star Flexible Global Portfolio) invested in another GAM Fund: GAM Multistock - Emerging Markets Equity. Please refer to Portfolio Statements for more details.

See note 14 for holdings in other GAM Star Funds.

The Directors are not aware of any other related party transactions except for those disclosed in these financial statements.

10. Performance fee

The Co-Investment Managers may be entitled to receive an annual performance fee on certain classes of some Funds. Any performance fee is accrued on each valuation day and paid annually in arrears at the end of June each financial year and is based on net realised and net unrealised gains and losses of the relevant classes subject to a high water mark only or a combination of high water mark and a benchmark where relevant. The performance fee rates applied to the Funds may differ within the range of 10% to 20%. Dividend distributions paid out shall not be deemed to impact the performance of the share classes within the Funds. Therefore the amount outstanding for the performance fee at the end of each financial year is the same as the amount expensed for that financial year.

Notes to the Financial Statements

10. Performance fee, continued

The following table discloses the list of Funds entitled to an annual performance fee. Details of Performance fees per share class are shown in Additional Information and Regulatory Requirements (Unaudited) Section of these Financial Statements.

15. Share capital

As at 30 June 2025

Authorised

The authorised share capital of the Company is \in 60,000 divided into 30,000 subscriber shares of \in 2.00 each and 10,000,000,000 shares of no par value initially designated as unclassified shares.

Subscriber shares

The issued share capital of the Company as at 30 June 2025 is €60,000 divided into 30,000 subscriber shares of €2.00 each, of which €9,529.70 has been paid up and which are beneficially owned by the Manager. The subscriber shares do not form part of the net asset value of the Company and are thus disclosed in the financial statements by way of this note only.

In the opinion of the Directors, this disclosure reflects the nature of the Company's business as an investment fund.

Redeemable participating shares

327,583,132 (2024: 463,557,083) redeemable participating shares of no par value designated in different classes in different Funds have been issued as shares at the discretion of the Manager. The issue price is payable in full on acceptance. The shares carry no preferential or pre-emptive rights.

The movement in the number of redeemable shares for the financial years ended 30 June 2025 and 30 June 2024 are as follow:

	Balance at 1 July 2024	Issued	Redeemed	Balance at 30 June 2025
GAM Star Alpha Spectrum Ordinary Shares

17. Dividend distribution

The tables below include Dividend distribution detail of each share class in each Fund as at 30 June 2025 and 30 June 2024. The declared dividend distributions with a record date of 30 June 2025 are accounted for within the Annual Report. The dates referred to in the table below relate to the next NAV calculation date per the prospectus. The columns "Gross Amount", "Income received", "Income deducted" and "Net Distribution" presented in the below tables disclose these amounts in each Fund's base currency.

	737,770	664,857	

¹ Figures are shown before Value Added Tax.

There were no other non audit services provided to the Company.

20. Soft commissions

There were no soft commissions agreement during the financial year.

21. Significant events during the financial year

Effective 19 July 2024, there has been a fourth addendum to the Prospectus issued on 15 December 2023.

Effective 29 July 2024, there has been a fifth addendum to the Prospectus issued on 15 December 2023.

Effective 25 September 2024, GAM Star Worldwide Equity has changed its name to GAM Star Global Equity. The investment policy of the Fund has been updated to permit up to 40% of Fund's NAV may be exposed to emerging markets. The benchmark has been transitioned from MSCI World/USD average 1 month deposit rate to the MSCI AR World NDR.

Effective 9 October 2024 a new Prospectus was issued.

Effective 31 October 2024, there has been a first addendum to the Prospectus issued on 9 October 2024 which include:

- The Delegate Registrar and Transfer Agent changed from GAM Fund Management Limited to Apex Fund Services (Ireland) Limited effective 31 October 2024.

Effective 1 November 2024:

- GAM Fund Management Limited became part of the Apex Group and is no longer a subsidiary of the GAM Holding AG Group.
- GAM Fund Management Limited has changed its registered address from Dockline, Mayor Street, IFSC, Dublin, D01 K8N7, Ireland to Percy Exchange, 8/34 Percy Place, Dublin, D04 P5K3, Ireland.

Effective 27 November 2024, there has been a second addendum to the Prospectus issued on 9 October 2024 which include the following fund name changes and the investment policies have been amended:

- GAM Star Global Balanced was renamed to GAM Star Global Flexible. The revised investment objective of the Fund is to "achieve capital preservation accompanied by stable returns via a dynamic asset allocation, using a flexible approach".
- GAM Star Global Growth was renamed to GAM Star Global Aggressive. The revised investment objective of the Fund is to "achieve capital preservation accompanied by stable returns via a dynamic asset allocation, using an aggressive approach".
- GAM Star Global Defensive was renamed to GAM Star Global Moderate. The revised investment objective of the Fund is to "achieve capital preservation accompanied by stable returns via a dynamic asset allocation, using a moderate approach".
- GAM Star Global Cautious has changed its investment policy. The revised investment objective of the Fund is to "achieve capital preservation accompanied by stable returns via a dynamic asset allocation, using a cautious approach".

Effective 23 December 2024, there has been a third addendum to the Prospectus issued on 9 October 2024 which include:

- The Manager and Global Distributor changed from GAM Fund Management Limited to Bridge Fund Management Limited effective 23 December 2024.

Effective 21 January 2025, GAM Star US All Cap Equity merged into GAM Star Global Equity.

Effective 22 January 2025, there has been a fourth addendum to the Prospectus issued on 9 October 2024, where GAM Star Global Equity had an amendment to its supplement which include:

- In the Fees Section: Additional wording in relation to Performance fee attributable to U and W Shares of the Fund.

Effective 24 January 2025, there has been a fifth addendum to the Prospectus issued on 9 October 2024 which include:

- Appendix I of the Prospectus titled 'Funds and Share Classes' - GAM Star Global Moderate additional share classes have been added.

21. Significant events during the financial year, continued

Effective 24 January 2025, GAM Star Alpha Technology merged into Liontrust Global Funds - Global Alpha Long Short Fund.

Martin Jufer was appointed as Director of the Company effective 28 February 2025.

Kishen Pattani resigned as Director and David Kemp was appointed as Director of the Company effective 14 March 2025.

Effective 18 March 2025, GAM Star Dynamic Growth merged into GAM Star Global Aggressive.

Effective 25 March 2025, GAM Star Flexible Global Portfolio and GAM Star Tactical Opportunities merged into GAM Star Global Moderate.

Effective 31 March 2025, there has been a sixth addendum to the Prospectus issued on 9 October 2024.

Effective 7 May 2025, there has been a seventh addendum to the Prospectus issued on 9 October 2024 which include:

- The Delegate Investment Manager changed from Fermat Capital Management LLC to Co-Investment Manager, Swiss Re Insurance-Linked Investment Advisors Corporation effective 7 May 2025.

Effective 14 May 2025, GAM Star Interest Trend was renamed to GAM Star Financial Credit.

Effective 21 May 2025 a new Prospectus was issued.

Effective 16 June 2025, there has been a first addendum to the Prospectus issued on 21 May 2025 which include:

- Gramercy Funds Management LLC was added as the Delegate Investment Manager to GAM Star Emerging Market Rates effective 16 June 2025.

Effective 30 June 2025, there has been a second addendum to the Prospectus issued on 21 May 2025 which include:

- GAM Hong Kong Limited was removed as Co-Investment Manager.

There were no other significant events affecting the Company during the financial year.

22. Events since financial year end

With effect from 1 August 2025, Deborah Reidy resigned as Company Director and Samantha McConnell was appointed as Company Director.

With effect from 1 October 2025, Andrew Bates resigned as Company Director and Raymond O'Neill was appointed as Company Director.

Effective from 1 October 2025, the SI USD Class in GAM Star Credit Opportunities USD has been de-listed from Euronext Dublin. The de-listing had no impact on the financial position or results of the Fund and Company for the reporting period.

On 24 November 2025, it is planned for GAM Star Asian Equity to merge into GAM Star China Equity.

There have been no other significant events affecting the Company since the financial year end.

23. Approval of Financial Statements

The financial statements were approved by the Board on 29 October 2025.

Statement of Depositary Responsibilities

The Depositary is required under the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended), and under the Central Bank (Supervision and Enforcement) Act, 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (together the "UCITS Regulations and the Central Bank UCITS Regulations") to:

- 1. ensure that the sale, issue, repurchase, redemption and cancellation of shares effected by or on behalf of the Company are carried out in accordance with the UCITS Regulations and Central Bank UCITS Regulations and in accordance with Constitution (the "Constitution").
- 2. ensure that the value of shares is calculated in accordance with the UCITS Regulations and Central Bank UCITS Regulations and the Constitution.
- 3. carry out the instructions of the Company unless they conflict with the UCITS Regulations and Central Bank UCITS Regulations or the Constitution.
- 4. ensure that in transactions involving the Company's assets, any consideration is remitted to it within time limits which are acceptable market practice in the context of a particular transaction.
- 5. ensure that the Company's income is applied in accordance with the UCITS Regulations and Central Bank UCITS Regulations and the Constitution.
- 6. enquire into the conduct of the Company in each annual accounting period and report thereon to the shareholders. The Depositary's report shall be delivered to the Company in good time to enable the Company to include a copy of the report in its Annual Report. The Depositary's Report shall state whether in the Depositary's opinion the Company has been managed in that financial period:
 - (i) in accordance with the limitations imposed on the investment and borrowing powers of the Company by the Constitution and the UCITS Regulations and Central Bank UCITS Regulations; and
 - (ii) otherwise in accordance with the provisions of the Constitution and the UCITS Regulations and Central Bank UCITS Regulations.
 - If the Company does not comply with (i) or (ii) above, the Depositary must state why this is the case and outline the steps which the Depositary has taken to rectify the situation.
- 7. notify the Central Bank of Ireland promptly of any material breach of the UCITS Regulations and Central Bank UCITS Regulations, conditions imposed by the Central Bank of Ireland or provisions of the prospectus with regard to the Company.

The duties provided for above may not be delegated by the Depositary to a third party. These duties must be carried out in the State.

The Depositary also takes into its custody or under its control all the assets of the Company and holds them in safekeeping for the shareholders.

Report of the Depositary to the Shareholders for the financial year ended 30 June 2025.

We have enquired into the conduct of GAM Star Fund p.l.c. ('the Company') for the financial year ended 30 June 2025, in our capacity as Depositary to the Company.

This report including the opinion has been prepared for and solely for the shareholders in the Company as a body, in accordance with Regulation 34, (1), (3) and (4) in Part 5 of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended, ('the UCITS Regulations'), and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

Responsibilities of the Depositary

Our duties and responsibilities are outlined in Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations. One of those duties is to enquire into the conduct of the Company in each annual accounting period and report thereon to the shareholders.

Our report shall state whether, in our opinion, the Company has been managed in that financial period in accordance with the provisions of the Company's Memorandum and Articles of Association (the "Constitution") and the UCITS Regulations. It is the overall responsibility of the Company to comply with these provisions. If the Company has not so complied, we as Depositary must state why this is the case and outline the steps which we have taken to rectify the situation.

Basis of Depositary Opinion

The Depositary conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations and to ensure that, in all material respects, the Company has been managed (i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of the Constitution and the UCITS Regulations and (ii) otherwise in accordance with the Company's constitutional documentation and the appropriate regulations.

Opinion

In our opinion, the Company has been managed during the financial year, in all material respects:

in accordance with the limitations imposed on the investment and borrowing powers of the Company by the Constitution, the UCITS Regulations and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 ('the Central Bank UCITS Regulations'); and

Push Kinsella

(ii) otherwise in accordance with the provisions of the Constitution, the UCITS Regulations and the Central Bank UCITS Regulations.

State Street Custodial Services (Ireland) Limited

78 Sir John Rogerson's Quay

Dublin 2

Ireland

Date: 29 October 2025

Independent auditors' report to the members of GAM Star Fund p.l.c.

Report on the audit of the financial statements

Opinion

In our opinion, GAM Star Fund p.l.c.'s financial statements:

- give a true and fair view of the Company's and Funds' assets, liabilities and financial position as at 30 June 2025 and of their results for the year then ended;
- have been properly prepared in accordance with Generally Accepted Accounting Practice in Ireland (accounting standards issued by the Financial Reporting Council of the UK, including Financial Reporting Standard 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" and Irish law); and
- have been properly prepared in accordance with the requirements of the Companies Act 2014 and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended).

We have audited the financial statements, included within the Annual Report and Audited Financial Statements, which comprise:

- the Balance Sheet as at 30 June 2025;
- the Profit and Loss Account for the year then ended;
- the Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders for the year then ended;
- the Portfolio Statement for each of the Funds as at 30 June 2025; and
- the notes to the financial statements for the Company and for each of its Funds, which include a description of the accounting policies.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) ("ISAs (Ireland)") and applicable law.

Our responsibilities under ISAs (Ireland) are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We remained independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in Ireland, which includes IAASA's Ethical Standard as applicable to listed entities, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

Emphasis of matter - financial statements prepared on a basis other than going concern

In forming our opinion on the financial statements, which is not modified, we draw attention to note 2(a) to the financial statements which describes the reasons why the financial statements of GAM Star Alpha Technology, GAM Star Asian Equity, GAM Star Global Dynamic Growth, GAM Star Flexible Global Portfolio, GAM Star Tactical Opportunities and GAM Star US All Cap Equity have been prepared on a basis other than going concern.

Our audit approach

Overview

Materiality

- Overall materiality: 50 basis points (2024: 50 basis points) of Net Assets Value ("NAV") at 30 June 2025 (2024: 30 June 2024) for each of the Company's Funds, 50 basis points of average NAV for the Company's Funds that merged and are no longer available for investment in the current year.
- Performance materiality: 75% of overall materiality.

Audit scope

• The Company is an open-ended investment Company with variable capital and engages Bridge Fund Management Limited (the "Manager") to manage certain duties and responsibilities with regards to the day-to-day management of the Company. We tailored the scope of our audit taking into account the types of investments within the Funds, the involvement of the third parties referred to overleaf, the accounting processes and controls, and the industry in which the Company operates. We look at each of the Funds at an individual level.

Key audit matters

- Valuation of financial assets at fair value and financial liabilities at fair value.
- Existence of financial assets at fair value and financial liabilities at fair value.

The scope of our audit

As part of designing our audit, we determined materiality and assessed the risks of material misstatement in the financial statements. In particular, we looked at where the directors made subjective judgements, for example the selection of pricing sources to value the investment portfolio. As in all of our audits, we also addressed the risk of management override of internal controls, including evaluating whether there was evidence of bias by the directors that represented a risk of material misstatement due to fraud.

Key audit matters

Key audit matters are those matters that, in the auditors' professional judgement, were of most significance in the audit of the financial statements of the current period and include the most significant assessed risks of material misstatement (whether or not due to fraud) identified by the auditors, including those which had the greatest effect on: the overall audit strategy; the allocation of resources in the audit; and directing the efforts of the engagement team. These matters, and any comments we make on the results of our procedures thereon, were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. This is not a complete list of all risks identified by our audit.

Key audit matter

Valuation of financial assets at fair value and financial liabilities at fair value

Refer to the Portfolio Statement for each of the Funds, the accounting policies set out in note 2, the financial risk management disclosures set out in note 3 and the Fair Value hierarchy set out in note 4.

The financial assets at fair value and financial liabilities at fair value included in the Balance Sheet of the Funds as at 30 June 2025 are valued at fair value in line with Generally Accepted Accounting Practice in Ireland.

We considered the valuation of financial assets at fair value and financial liabilities at fair value to be a key audit matter as it represents the principal element of the financial statements.

How our audit addressed the key audit matter

We obtained an understanding of the controls in place at the Company's Delegate Administrator in relation to the valuation of financial assets at fair value and financial liabilities at fair value.

We tested the valuation of the financial assets at fair value and financial liabilities at fair value as at 30 June 2025 to third party vendor sources where available.

In the absence of third party vendor sources being available, we tested the valuation of these investments by performing the following procedures:

For investments valued using multiple or single broker quotes, we independently obtained the broker quote and compared the fair value to the fund accounting records.

For Funds with investments in other underlying funds where a third party vendor price was not available, we compared the net asset value per share used by the Fund to the independently obtained audit confirmation from the underlying funds' administrators. Furthermore, we obtained the latest available audited financial statements for these underlying funds and considered the underlying

Key audit matter	How our audit addressed the key audit matter				
	independent auditors' report within the audited financial statements. For cross holdings in other funds of GAM Star Fund p.l.c., we audited the NAV per share of the underlying fund and reconciled to fund accounting records.				
	We tested the valuation of financial derivative instruments by obtaining vendor prices, independent counterparty confirmations or through the use of our internal valuation expert.				
	No material misstatements were noted from the performance of these procedures.				
Existence of financial assets at fair value and financial liabilities at fair value Refer to the Portfolio Statement for each of the Funds and	We obtained an understanding of the controls in place at the Company's Delegate Administrator in relation to the existence of financial assets at fair value and financial liabilities at fair value.				
the accounting policies set out in note 2. The financial assets at fair value and financial liabilities at fair value in the Balance Sheet of each Fund are held in each Fund's name as at 30 June 2025. We considered the existence of financial assets at fair value and financial liabilities at fair value to be a key audit matter as it represents the principal element of the financial statements.	We obtained independent confirmation of the existence of the investments from the Depositary or the counterparties of the investments held as at 30 June 2025, agreeing the amounts confirmed to the accounting records and resolving				
	any material reconciling items noted. In respect of open forward contracts held at the year end date, for material positions, we either obtained an independent confirmation from the counterparties or liquidated positions to post year end bank statements.				
	No material misstatements were noted from the performance of these procedures.				

How we tailored the audit scope

We tailored the scope of our audit to ensure that we performed enough work to be able to give an opinion on the financial statements as a whole, taking into account the structure of the Company, the accounting processes and controls, and the industry in which it operates.

As at 30 June 2025 there are 24 Funds operating. The Company's Balance sheet, Profit and Loss Account and Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders are an aggregation of the positions and results of the Funds.

The directors control the affairs of the Company and are responsible for the overall investment policy which is determined by them. The Company engages the Manager to manage certain duties and responsibilities with regards to the day to day management of the Company. The Manager has delegated certain responsibilities to the Co- Investment Managers and Delegate Investment Managers (the "Investment Manager") and to State Street Fund Services (Ireland) Limited (the "Delegate Administrator"). The financial statements, which remain the responsibility of the directors, are prepared on their behalf by the Delegate Administrator. The Company has appointed State Street Custodial Services (Ireland) Limited (the "Depositary") to act as Depositary of the Company's assets. In establishing the overall approach to our audit we assessed the risk of material misstatement at a Fund level, taking into account the nature, likelihood and potential magnitude of any misstatement. As part of our risk assessment, we considered the Company's interaction with the Delegate Administrator, and we assessed the control environment in place at the Delegate Administrator.

Materiality

The scope of our audit was influenced by our application of materiality. We set certain quantitative thresholds for materiality. These, together with qualitative considerations, helped us to determine the scope of our audit and the nature, timing and extent of our audit procedures on the individual financial statement line items and disclosures and in evaluating the effect of misstatements, both individually and in aggregate on the financial statements as a whole.

Based on our professional judgement, we determined materiality for the financial statements of each of the Company's Funds as follows:

Overall materiality and how we determined it	50 basis points (2024: 50 basis points) of Net Assets Value ("NAV") at 30 June 2025 (2024: 30 June 2024) for each of the Company's Funds, 50 basis points of average NAV for the Company's Funds that merged and are no longer available for investment in the current year.
Rationale for benchmark applied	We have applied this benchmark because the main objective of the Company and Funds is to provide investors with a total return taking account of the capital and income returns.

We use performance materiality to reduce to an appropriately low level the probability that the aggregate of uncorrected and undetected misstatements exceeds overall materiality. Specifically, we use performance materiality in determining the scope of our audit and the nature and extent of our testing of account balances, classes of transactions and disclosures, for example in determining sample sizes. Our performance materiality was 75% of overall materiality.

In determining the performance materiality, we considered a number of factors - the history of misstatements, risk assessment and aggregation risk and the effectiveness of controls - and concluded that an amount at the upper end of our normal range was appropriate.

We agreed with the Board of Directors that we would report to them misstatements identified during our audit above 5 basis points of each Fund's NAV, for NAV per share impacting differences (2024: 5 basis points of each Fund's NAV, for NAV per share impacting differences), 5 basis points of average NAV, for NAV per share impacting differences for the Company's Funds that merged and are no longer available for investment in the current year, as well as misstatements below that amount that, in our view, warranted reporting for qualitative reasons.

Conclusions relating to going concern

With the exception of GAM Star Alpha Technology, GAM Star Asian Equity, GAM Star Global Dynamic Growth, GAM Star Flexible Global Portfolio, GAM Star Tactical Opportunities and GAM Star US All Cap Equity where a basis of accounting other than going concern has been adopted as set out in the Emphasis of matter - financial statements prepared on a basis other than going concern above, our evaluation of the directors' assessment of the Company's and Funds' ability to continue to adopt the going concern basis of accounting included:

Obtaining an understanding of the key indicators that are monitored with respect to the going concern assumption and management's future plans for the Company and its Funds over the going concern period (being 12 months from the date of approval of the financial statements);

- Reviewing available board minutes during the period under audit and those available up to the date of this report;
- Considering post year end capital activity as recorded in the underlying accounting records;
- Making enquiries of management with respect to any planned significant redemptions of which they have been informed of; and
- Considering the liquidity risk management techniques which are available to the Company and Funds.

With the exception of GAM Star Alpha Technology, GAM Star Asian Equity, GAM Star Global Dynamic Growth, GAM Star Flexible Global Portfolio, GAM Star Tactical Opportunities and GAM Star US All Cap Equity where a basis of accounting other than going concern has been adopted as set out in the Emphasis of matter - financial statements prepared on a basis other than going concern above, based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Company or Funds' ability to continue as a going concern for a period of at least twelve months from the date on which the financial statements are authorised for issue.

With the exception of GAM Star Alpha Technology, GAM Star Asian Equity, GAM Star Global Dynamic Growth, GAM Star Flexible Global Portfolio, GAM Star Tactical Opportunities and GAM Star US All Cap Equity where a basis of accounting other than going concern has been adopted as set out in the Emphasis of matter - financial statements prepared on a basis other than going concern above, in auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

However, because not all future events or conditions can be predicted, this conclusion is not a guarantee as to the Company's and Funds' ability to continue as a going concern.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

Reporting on other information

The other information comprises all of the information in the Annual Report and Audited Financial Statements other than the financial statements and our auditors' report thereon. The directors are responsible for the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except to the extent otherwise explicitly stated in this report, any form of assurance thereon. In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify an apparent material inconsistency or material misstatement, we are required to perform procedures to conclude whether there is a material misstatement of the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report based on these responsibilities.

With respect to the Report of the Directors, we also considered whether the disclosures required by the Companies Act 2014 have been included.

Based on the responsibilities described above and our work undertaken in the course of the audit, ISAs (Ireland) and the Companies Act 2014 require us to also report certain opinions and matters as described below:

- In our opinion, based on the work undertaken in the course of the audit, the information given in the Report of the Directors for the year ended 30 June 2025 is consistent with the financial statements and has been prepared in accordance with applicable legal requirements.
- Based on our knowledge and understanding of the Company and its environment obtained in the course of the
 audit, we have not identified any material misstatements in the Report of the Directors.

Responsibilities for the financial statements and the audit

Responsibilities of the directors for the financial statements

As explained more fully in the Statement of Directors' Responsibilities set out on pages 2 and 3, the directors are responsible for the preparation of the financial statements in accordance with the applicable framework and for being satisfied that they give a true and fair view.

The directors are also responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the Company's and Funds' ability to continue as going concerns, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud, is detailed below.

Based on our understanding of the Company and it's Funds and the industry, we identified that the principal risks of non-compliance with laws and regulations related to breaches of the Central Bank of Ireland regulations applicable to the Company and its Funds and we considered the extent to which non-compliance might have a material effect on the financial statements. We also considered those laws and regulations that have a direct impact on the preparation of the financial statements such as the Companies Act 2014 and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended). We evaluated management's incentives and opportunities for fraudulent manipulation of the financial statements (including the risk of override of controls), and determined that the principal risks were related to risk of management override of control.

Audit procedures performed by the engagement team included:

- Enquiry of management to identify any instances of non-compliance with laws and regulations;
- Identifying and testing journal entries that met our specific risk based criteria;
- Testing accounting estimates and judgements and considered potential for management bias;
- Designing audit procedures to incorporate unpredictability around the nature, timing or extent of our testing;
 and
- Reviewing minutes of the meetings of the Board of Directors.

There are inherent limitations in the audit procedures described above. We are less likely to become aware of instances of non-compliance with laws and regulations that are not closely related to events and transactions reflected in the financial statements. Also, the risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion.

Our audit testing might include testing complete populations of certain transactions and balances, possibly using data auditing techniques. However, it typically involves selecting a limited number of items for testing, rather than testing complete populations. We will often seek to target particular items for testing based on their size or risk characteristics. In other cases, we will use audit sampling to enable us to draw a conclusion about the population from which the sample is selected.

A further description of our responsibilities for the audit of the financial statements is located on the IAASA website at:

https://www.iaasa.ie/getmedia/b2389013-1cf6-458b-9b8f-a98202dc9c3a/Description of auditors responsibilities for audit.pdf.

This description forms part of our auditors' report.

Use of this report

This report, including the opinions, has been prepared for and only for the Company's members as a body in accordance with section 391 of the Companies Act 2014 and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

Other required reporting

Companies Act 2014 opinions on other matters

- We have obtained all the information and explanations which we consider necessary for the purposes of our audit.
- In our opinion the accounting records of the Company were sufficient to permit the financial statements to be readily and properly audited.
- The financial statements are in agreement with the accounting records.

Companies Act 2014 exception reporting

Directors' remuneration and transactions

Under the Companies Act 2014 we are required to report to you if, in our opinion, the disclosures of directors' remuneration and transactions specified by sections 305 to 312 of that Act have not been made. We have no exceptions to report arising from this responsibility.

Andrew O'Callaghan

Remuneration Disclosures

Bridge Fund Management Limited ("Management Company")

The below disclosure is made in respect of the remuneration policies of Bridge Fund Management Limited ("Manager") in accordance with the UCITS regulations. This requires UCITS management companies to establish and apply remuneration policies and practices that promote sound and effective risk management, and do not encourage risk taking which is inconsistent with the risk profile of the UCITS.

The Manager has designated the following persons as Identified Staff:

- 1. Executive and Non-Executive members of the management body of the Manager e.g. CEO, Directors, Executive and Non-Executive partners;
- 2. Senior management;
- 3. Risk takers staff who can exert material influence on the Manager or on the UCITS or AIFs it manages;
- 4. Those in control functions: Operations, HR, Compliance, Finance where applicable;
- 5. Staff whose total remuneration takes them into the bracket of senior management and risk takers, whose professional activities have a material impact on the Manager's risk position or those of the UCITS and/or AIFs it manages and;
- 6. Categories of staff of the entities to which portfolio management or risk management activities have been delegated whose professional activities have a material impact on the Manager's risk position or those of the UCITS and/or AIFs it manages.

The Manager is required under UCITS regulations to make quantitative disclosures of remuneration. Disclosures are provided in relation to Identified Staff who are employed directly by the Manager and Identified Staff who have the ability to materially impact the risk profile of the UCITS including individuals who, although not directly employed by the Manager, are assigned by their employer to carry out services directly by the Manager.

All remuneration paid to Identified Staff can be divided into:

- Fixed remuneration (payments or benefits without consideration of any performance criteria); and
- Variable remuneration (additional payments or benefits depending on performance or, in certain cases, other contractual criteria) which is not based on the performance of the UCITS.

The Manager's annual remuneration details for the year ended 31 December 2024 are disclosed below:

Description	Number of beneficiaries	Total remuneration paid	Fixed remuneration paid	Variable remunerarion paid
Total Staff Remuneration	62	€4,315,711	€3,349,915	€965,796
Senior Management (including executives), risk takers and other identified staff	15	€1,920,967	€1,274,081	€646,886

Details of the Remuneration Policy, including, but not limited to, a description of how remuneration and benefits are calculated and the identity of persons responsible for awarding the remuneration and benefits is available at the following website: https://bridgefundservices.com/remuneration-policy/

Additional Market Risk Notes

Market Risk

i) Funds which calculate risk using VaR

The VaR model is an estimate of the maximum loss each Fund may experience over any 20 day period, with a probability of 99%. The VaR is calculated by an external service provider using the historical simulation method using three years of weekly historical price data for the underlying securities. The VaR of the portfolio is stress tested on a fortnightly basis by running the VaR using current holdings against historical events. The VaR cannot take into account the fact that future market price movements may bear no relation to historical patterns as future market conditions could vary significantly from those experienced in the past.

VaR is an estimate of the maximum loss a Fund may suffer over a defined period and calculated with a specified confidence level. It is calculated for the investment pool of each Fund.

As at 30 June 2025

	Value at Risk (over 20 day period with 99% confidence level)				Utilisa	tion of VaR Limi	t

Additional Market Risk Notes, continued

Market Risk, continued

i) Funds which calculate risk using VaR, continued

The level of leverage may be calculated in a number of ways:

Sum of the notionals

This calculation has been disclosed in accordance with Central Bank requirements but it does not take into account any netting and hedging arrangements that a fund has in place. It is a "simple and easy to compute" formula of adding notional amounts without taking account of whether each derivative is used for risk reduction or otherwise, the disclosed sum of the notional amounts represents, in many cases, an inflated figure that fails to indicate the risk levels in a fund. For example, positions that economically offset risk, such as currency hedges, are required to be included in the gross notional calculation even though such transactions would reduce risk in a portfolio, thereby increasing the gross notional amount but actually creating a less risky product for the investor.

10 year equivalents

This is more relevant for fixed income funds and has been provided as a more appropriate leverage calculation for those type of funds. It measures the marginal impact on position value of a small change in interest rates such as a 1 basis point ("bp") move, and then to express that impact in terms of the quantity of the current 10–year note that would have the same sensitivity to rate moves.

Effective 9 September 2025:

AMENDMENTS TO THE SUPPLEMENT - GAM Star Continental European Equity & GAM Star European Equity

- Changes to the SFDR Appendix - no changes to the investment policy

Securities Financing Transactions

Article 13 of Regulation (EU) 2015/2365 on transparency of securities financing transactions ("SFTs") and of reuse and amending Regulation (EU). No. 648/2012, requires UCITS investment companies to provide the following information on the use made of SFTs.

Securities lending

The below table details the value of securities on loan as a proportion of the Funds' total lendable assets and NAV as at 30 June 2025 and the income/returns earned for the financial year ended 30 June 2025. Total lendable assets are those assets held within the portfolio of the Funds that utilise security lending.

	Securities on loan					
Fund	Currency	% of lendable assets	% of NAV			
GAM Star Alpha Spectrum	€	3.51	2.53			
GAM Star Asian Equity	US\$	3.87	2.12			
GAM Star China Equity	US\$	1.34	1.04			
GAM Star Composite Global Equity	US\$	9.08	6.21			
GAM Star Japan Leaders	¥	15.08	14.22			
GAM Star Disruptive Growth	US\$	3.24	2.82			

Please refer to note 5 for details on how the total income earned on securities lending transactions is split between the Company and the Securities Lending Agent and how much income was earned by each party during the financial year ended 30 June 2025.

The following tables detail the value of securities on loan and associated collateral received, analysed by borrowing counterparty as at 30 June 2025:

GAM Star Alpha Spectrum

Counterparty	Country of establishment	Securities on loan €	Non-cash Collateral received €
Barclays Bank	United Kingdom	259,424	273,106
JP Morgan Securities Plc	United States	1,668,735	1,746,427
Merrill Lynch International	United States	2,770	2,912
		1 930 929	2 022 445

GAM Star Asian Equity

Counterparty	Country of establishment	Securities on loan US\$	Non-cash Collateral received US\$

Additional Information and Regulatory Requirements (Unaudited) (continued) Securities Financing Transactions, continued

GAM Star Disruptive Growth

Counterparty	Country of establishment	Securities on loan US\$	Non-cash Collateral received US\$
Barclays Bank	United Kingdom	3,019,410	3,167,700
		3,019,410	3,167,700

Barclays Bank, JP Morgan Securities Plc, Merrill Lynch International and Morgan Stanley and Co International were the counterparties in use for securities lending purposes as at 30 June 2025. All securities lending contracts are settled on a bi-lateral basis. Non-cash collateral received in relation to securities lending transactions cannot be sold, re-invested or pledged.

The following table provides an analysis of the type, quality and maturity tenor of non-cash collateral received and posted by the Funds in respect of securities lending transactions as at 30 June 2025.

Fund	Collateral type	Currency	Less than one year	One to five years	Greater than five years	Total
GAM Star Alpha Spectrum	Sovereign debt	€	540	722,791	1,299,114	2,022,445
GAM Star Asian Equity	Sovereign debt	US\$	10,303	47,072	283,545	340,920
GAM Star China Equity	Sovereign debt	US\$	42,550	423,391	480,615	946,556
GAM Star Composite Global Equity	Sovereign debt	US\$	3,791	4,453,869	5,029,863	9,487,523
GAM Star Japan Leaders	Sovereign debt	¥	5,653,027	108,183,990	731,632,225	845,469,242
GAM Star Disruptive Growth	Sovereign debt	US\$	58,231	440,556	2,668,913	3,167,700

The maturity tenor analysis for Sovereign Debt securities received as collateral is based on the contractual maturity date. All non-cash collateral received by the Funds is held by the Depositary (or through its delegates) as at 30 June 2025.

The following table lists the ten largest issuers¹ by value of non-cash collateral received by the Funds across securities lending transactions as at 30 June 2025.

Fund	Collateral issuer	Value	% of NAV
GAM Star Alpha Spectrum	United States, France, United Kingdom, the Netherlands, Canada, Germany Belgium, Sweden	2,022,445	2.65
GAM Star Asian Equity	United States, France, United Kingdom, the Netherlands, Canada, Germany Belgium, Sweden	340,920	2.26
GAM Star China Equity	United States, France, United Kingdom, the Netherlands, Canada, Germany Belgium, Sweden	946,556	1.11
GAM Star Composite Global Equity	United States, France, United Kingdom, the Netherlands, Canada, Germany Belgium, Sweden	9,487,523	6.52
GAM Star Japan Leaders	United States, France, United Kingdom, the Netherlands, Canada, Germany Belgium, Sweden	845,469,242	14.93
GAM Star Disruptive Growth	United States, France, United Kingdom, the Netherlands, Canada, Germany Belgium, Sweden	3,167,700	2.96

¹There were no other issuers of non-cash collateral as at 30 June 2025.

All derivative instruments are entered into by the Funds under an International Swaps and Derivatives Associations, Inc. Agreement ("ISDA Agreement") or similar agreement. An ISDA Agreement is a bilateral agreement between the Funds and a counterparty that governs all derivative instruments entered into by the parties. The parties' exposures under the ISDA Agreement are netted and collateralised together, therefore any collateral disclosures provided are in respect of all derivative instruments entered into by the Funds under the ISDA Agreement. All collateral received/posted by the Funds in relation to the ISDA Agreement is cash as at 30 June 2025. All of the cash balances have an open maturity. The cash collateral received and disclosed above is custodied with the depositary. Cash collateral received may be reinvested in accordance with the requirements of the Central Bank at the discretion of the Investment Manager.

General Information

The Company

GAM Star Fund p.l.c. (the "Company"), an investment company with variable capital and segregated liability between Funds, is authorised by the Central Bank of Ireland ("the Central Bank") as an undertaking for collective investment in transferable securities ("UCITS") under the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (S.I. No. 211 of 2011) as amended and under the Central Bank (Supervision and Enforcement) Act, 2013 (Section 48(1) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019).

The Manager

The Manager of the Company is Bridge Fund Management Limited.

Dealing days

Shares may be purchased or sold on any day which is a business day in Dublin or alternatively such business day as stated in the Prospectus. In the case of all Funds, dealing will be at least twice a month. The Net Asset Value per share of each Fund will be determined on each Dealing Day at 23:00 hours (UK time) or such other time as the Manager may determine in the base currency of the relevant Fund.

Application for shares

All applications should be made directly to the Manager or via the German information and distribution agent of the Company, the Austrian paying agent of the Company, or via the Swiss representative of the Company. Shares will be purchased on the relevant Dealing Day and a contract note will be sent to the purchaser. Prospective shareholders should note that the price of shares may go down as well as up.

Redemption of shares

Requests for redemption of shares and requests for the switch of shares can be submitted via the German paying agent of the Company, the Austrian paying agent of the Company, the Swiss representative of the Company or directly to the Manager. This should be done in writing by post, by facsimile, by email or by telephone.

Income distributions

Income distributions are normally made within two months of year end.

Availability of Prices

Prices are available on www.gam.com.

Reports

Annual and semi-annual reports are issued.

Purchases and Sales

Please contact the Manager, the Swiss representative or other local GAM Contacts to obtain a complete list of all purchases and sales for any Fund free of charge.

Prospectus

Further details concerning the Funds are contained in the Prospectus and Prospectus Addendum, the Key Investor Information Documents of the Company and the Articles of Incorporation. Copies of these, as well as copies of the annual and semi–annual reports, are available on application to the Manager, to the UK facilities agent, the German and Austrian information agent as well as to the Swiss representative free of charge.

Place of performance and forum in Switzerland

In the case of shares which are distributed in Switzerland or from Switzerland, the place of performance and the forum are at the domicile of the Swiss representative of the Fund in Zürich.

Reporting Fund Status (relevant to UK Shareholders only)

It is the policy of the Company to apply to HM Revenue and Customs ("HMRC") for certification of all Share classes (with the exception of GAM Star Alpha Spectrum and the non UK RFS Classes of the relevant Funds) as reporting funds as defined in the Offshore Funds (Tax) Regulations 2009.

Product name: GAM Star Asian Equity (the "Fund" or "Financial Product")

Legal entity identifier: 549300WNU0GQXM1IPO65

Environmental and/or social characteristics

Did	this financial product have a sustainable	investment objective?
•	Yes	● No
	in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective
	It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments

All data presented in the annex which follows has been calculated based on the portfolio holdings of the Fund as at 30 June 2025 and constitutes unaudited information which has not been subject to any assurance provided by the Auditors or any third party.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and social characteristics:

- 1) Exclusion of companies involved in specific activities considered to cause negative environmental and/or social impact, as described in the Sustainability Exclusion Criteria detailed in the Fund Prospectus (the "Prospectus").,
- 2) Assessed adherence to generally accepted international norms and standards set by the United Nations Global Compact (UNGC),
- 3) Consideration of Principal Adverse Impacts ("PAIs") on sustainability factors as detailed in Table 1 of Annex I of the Commission Delegated Regulation (EU) 2022/ 1288 (the "SFDR Delegated Act")
- 4) Investments in companies assessed to follow good governance practices, and
- 5) Engagement with investee companies on environmental, social and governance issues as described in the Prospectus.

The environmental and social characteristics were promoted in line with the binding elements of the investment strategy of the Fund, as outlined in the Prospectus. There were no breaches of the exclusion criteria.

No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation

list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

does not lay down a

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The following sustainability indicators are used to measure the environmental and/or social characteristics of the Fund.

1) Indicators relating to Sustainability Exclusion Criteria

Involvement in the following activities, beyond the revenue threshold specified, result in the investment being ineligible (other than where outlined in the GAM Sustainability Exclusions Policy). No exceptions were made during the reporting period

Sustainability Indicator	Units	Data source ¹⁰	Date ¹	Data coverage ²	Data estimated ³	Output ⁴
Involvement in controversial weapons: share of investments in investee companies involved in the manufacture or selling of controversial weapons.	% of Fund	MSCI	30 June 2025	100%	0%	0%
Involvement in weapons manufacturing or weapons component manufacturing: share of investments in investee companies involved in the manufacture of military weapons systems, and/or tailor-made components of these weapons systems, and/or tailor-made products or services that support military weapons systems (above 10% revenue threshold).	% of Fund	Sustainalytics	30 June 2025	100%	0%	0%

¹ Data snapshot taken at the Fund's year end. Sustainalytics and MSCI data as at 30th June 2025.

² Calculated as the proportion of investments (by NAV) for which data is available. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. Where there is less than 100% coverage, this would be due to the third party provider not covering the issuer. We engage with service providers and companies directly with the objective of increasing data coverage and disclosure. More information about MSCI's coverage can be found here. More information about Sustainalytics coverage can be found here.

³ Calculated as the proportion of investments (by NAV) for which data is estimated. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. MSCI data methodology can be found here. Information on Sustainalytics product involvement can be found here.

⁴ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus.

¹⁰ Whilst only one data source is listed, we may use further data providers to support our analysis. Please refer to our <u>Sustainability Exclusion Policy</u> for further details.

Involvement in assault weapons for civilian customers: share of investments in investee companies involved in the manufacture and sale of assault weapons to civilian customers (above 10% revenue threshold).	% of Fund	Sustainalytics	30 June 2025	100%	0%	0%
Involvement in tobacco manufacturing: share of investments in investee companies involved in the manufacture of tobacco products (above 5% revenue threshold).	% of Fund	Sustainalytics	30 June 2025	100%	0%	0%
Involvement in tobacco retail and distribution: share of investments in investee companies involved in the distribution and/or retail sale of tobacco products (above 25% revenue threshold).	% of Fund	Sustainalytics	30 June 2025	100%	0%	0%
Involvement in oil sands extraction: share of investments in companies involved in oil sands extraction (above 25% revenue threshold).	% of Fund	Sustainalytics	30 June 2025	100%	0%	0%
Involvement in thermal coal: Share of investments in companies involved in mining thermal coal or from generating electricity from thermal coal (above 25% revenue threshold).	% of Fund	Sustainalytics	30 June 2025	100%	0%	0%

Investee companies are expected to adhere to minimum international norms and standards as defined by the UN Global Compact (as defined in the Prospectus). Investee companies assessed as having seriously breached the UN Global Compact are excluded, unless the issuer is considered to have taken substantial and adequate steps to have addressed the allegations.

No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source	Date	Data covera ge	Data estimated	Output ⁵
Violations of UN Global Compact principles (also related to Principal Adverse Impacts): share of investments in investee companies that have been involved in violations of the UNGC principles.	% of Fund	MSCI	30 June 2025	100%	0%	0%

3) Indicators relating to Principal Adverse Impacts

The Investment Manager applied an internal framework to consider and, where considered appropriate, take action to mitigate principal adverse impacts on sustainability factors.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁶
Scope 1 & Scope 2 Greenhouse gas (GHG) emissions: Absolute greenhouse gas emissions associated with a portfolio, expressed in tons CO2 equivalent	tons CO2 equivalent	MSCI	30 June 2025	95.86%	0%	418.4
Investments in companies active in fossil fuel sector: share of investments in companies active in the fossil fuel sector.	% of Fund	MSCI	30 June 2025	95.86%	0%	2.67%
Gender diversity on the Board (also related to good governance): percentage of board	Weighted average %	MSCI	30 June 2025	93.38%	0%	23.12%

⁵ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. We use MSCI data to determine adherence to the UN Global Compact. For this data point, we are specifically looking at whether a company is deemed to 'Fail' adhering to the underlying principles. More information on MSCI's approach can be found https://example.com/here/.

⁶ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus.

members who are female. For companies with a two-tier board, the calculation is based on members of the Supervisory Board only.	
---	--

4) Indicators relating to good governance

The investment strategy incorporates a principles-based approach when assessing good governance. The assessment informs investment decisions and is used by the Investment Manager to satisfy itself that good governance practices are in place when selecting investments for the Fund. In addition, the assessment is conducted on an ongoing basis to inform voting decisions and engagement activity.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁷
Board independence: the percentage of board members that meet GAM's criteria for independent management, as measured by a third-party data provider. For companies with a two-tier board, the calculation is based on members of the Supervisory Board only.	Weighted average %	MSCI	30 June 2025	92.89%	0%	66.14%

5) Indicators relating to engagement activities

The investment strategy includes engagement activities with investee companies on environmental, social and governance issues as part of interactions with management, including engagements following sustainability controversies, PAI review and/or thematic engagement.

Sustainability	Units	Data	Date	Data	Data	Output ⁸

⁷ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus.

⁸This output is the total number of companies that the Investment Team engaged with that were held in the portfolio as at 30 June 2025. The Investment Team may have engaged with companies i) on more than one occasion, ii) for pre-investment due diligence, iii) throughout the reporting period which were sold prior to the 30 June 2025 and therefore will not be reflected here. There could also be cases when companies within the portfolio were engaged with by other investments teams that are part of GAM Holding AG where there is a cross-holding, these are also not reflected in this output.

Engagement activity: Number of ESG-related engagement activities the Investment Manager was involved in as part of regular interactions with management, such as engagements following sustainability controversies and thematic engagement relating to the Fund ¹¹ . What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable

 $^{\rm 11}\text{GAM}\xspace$ definition of engagement can be found in our Engagement Policy on our website.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

In accordance with the provisions of the Prospectus, the Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

Fund consideration

The actions taken in relation to the PAI indicators considered are summarised in the table below:

Indicators applicable to investments in investee companies

Adverse sustainability indicator

Greenhouse	1. GHG emissions 2. Carbon footprint 3. GHG Intensity of investee companies 4. Exposure to companies active in the fossil fuel sector 5. Share of non-renewable	A range of indicators in relation to company GHG emissions and carbon emission reduction initiatives (including Scope 1 & Scope 2 GHG emissions among others) were reviewed as part of the investment process, and were primarily addressed in a qualitative way, for example through engagement with selected investee companies on reduction targets and initiatives or voting on resolutions to support greater transparency on climate-related risks. Investee companies assessed to derive over 25% of revenue from thermal coal mining or electricity generation from thermal coal were excluded from the Fund.

SM Entertainment Co. Ltd.	Entertainment	1.94	Korea
AIA Group Ltd.	Insurance	1.91	Hong Kong

The table above provides a snapshot of the largest investments as at 30 June 2025. This snapshot is reflective of the general portfolio composition throughout the reporting period.

The Global Industry Classification Standard is used to determine economic sectors.

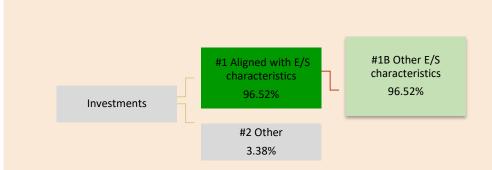

What was the proportion of sustainability-related investments?

N/A. Information on the proportion of the Fund which promoted environmental/social characteristics during the reference period is provided below.

What was the asset allocation?

All assets excluding cash/cash equivalent instruments and/or certain derivatives are aligned with environmental/social characteristics of the Fund. As at 30 June 2025 (snapshot at year-end), 96.52% of the Fund attained the environmental and social characteristics promoted by the Fund, while 3.38% was in assets categorised as #2 Other in accordance with the Prospectus. Further details in relation to such assets is set out in the section entitled "What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?" below.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Allocation
Financials	26.92 %
Communication Services	24.73 %
Information Technology	20.81 %
Consumer Discretionary	12.01 %
Industrials	5.56 %
Energy	2.54 %
Real Estate	1.48 %
Utilities	1.37 %
Health Care	1.19 %

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund promotes environmental and social characteristics within the meaning of Article 8 of the SFDR, it does not currently commit to investing in a minimum level of "sustainable investments" within the meaning of the SFDR and it does not currently commit to a minimum level of investments taking into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. As such, any investments that contribute to environmentally sustainable economic activities for the purposes of the Taxonomy Regulation, including investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, are held on an incidental basis and is currently estimated to be <10% based on available data.

Taxonomy-aligned activities are expressed as a share of:

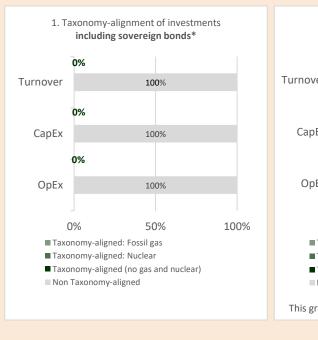

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, , e.g.
 relevant for a
 transition to a
 green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

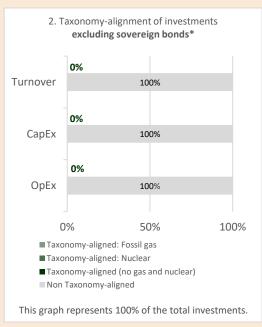

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional** activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best

performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy⁹?

Yes

In fossil gas

In nuclear energy

No

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

⁹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Other investments of the Fund included [cash / cash equivalents and / or certain derivatives] for liquidity and efficient management of the Fund. An assessment of minimum environmental and social safeguards is deemed not to be relevant for cash and cash equivalents by nature of the asset class, nor derivatives where full look through is not possible.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

1. Actions relating to Sustainability Exclusion Criteria

The Sustainability Exclusion Criteria were assessed, on a best-efforts basis, as part of investment controlling, using Sustainalytics. There were no breaches of the Sustainability Exclusion Criteria during the reporting period

2. Actions relating to international norms and standards

UN Global Compact compliance was assessed, on a best-efforts basis, as part of investment controlling. The Investment Manager used third-party data providers' frameworks and data to categorise serious breaches, which were intended to identify credible allegations of a violation of global norms, supplemented by internal research where third-party data coverage was unavailable. There were no breaches of the UN Global Compact compliance during the period.

3. Actions relating to Principal Adverse Impacts on sustainability factors

The Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

Greenhouse gas emissions and involvement in fossil fuel sector – a range of indicators in relation to company GHG emissions and carbon emission reduction initiatives (including Scope 1 & Scope 2 GHG emissions among others) were reviewed as part of the investment process, and were primarily addressed in a qualitative way, for example through engagement with selected companies on reduction targets and initiatives or voting on resolutions to support greater transparency on climate-related risks. Companies assessed to derive over 25% of revenue from thermal coal mining or electricity generation from thermal coal were excluded from the Fund.

Biodiversity, water & waste – indicators in relation to a company's impact on biodiversity, including deforestation, water and waste, were reviewed as part of the investment process and were primarily addressed in a qualitative way, for example through engagement with selected companies

Social and employee matters – a range of PAI indicators were reviewed as part of the investment process. Companies assessed as severely violating UN Global Compact principles or assessed as having exposure to controversial weapons are excluded from the Fund. Board gender diversity was considered primarily within engagement and voting decisions.

4. Actions relating to good governance

The investment Manager incorporated a principles-based approach when assessing good governance. The assessment informed investment decisions and was used by the Investment Manager to satisfy itself that good governance practices were in place when selecting investments for the Fund. In addition, the assessment was conducted on an ongoing basis to inform voting decisions and engagement activity. This included consideration of board structure and independence, alignment of remuneration, transparency of ownership and control, audit and accounting. Good governance was assessed in a qualitative and/or quantitative way dependent on the relevance of the specific indicator. This included:

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- Sound management structures including Board independence, Board diversity and audit committee independence
- Employee relations in particular any serious breaches of UN Global Compact principles are excluded
- Remuneration of staff
- Tax compliance in particular any companies flagged for significant tax violations

In addition, good governance was supported by ensuring companies adhere to minimum standards as defined by the ten principles of the United Nations Global Compact, which cover anti-corruption (Principle 10) and labour rights (Principles 3-6) and well as environmental governance (Principles 7-9).

5. Actions relating to engagement

Engagement was made on behalf of the Fund with investee companies on environmental, social and governance issues in line with their investment and due diligence process. Throughout the 12 month period, from 01/07/2024 to 30/06/2025, the investment team engaged with 6 companies relating to ESG and sustainability concerns or opportunities.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: GAM STAR CAT BOND (the "Fund") Legal entity identifier: 549300YA8HHODUOIOX41

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental

objective might be

aligned with the

Taxonomy or not.

Did th	is finar	ncial product have a sustainable	inves	tment	objective?
••	Y	⁄es	•	×	No
		in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy		char while inves	comoted Environmental/Social (E/S) racteristics and e it did not have as its objective a sustainable estment, it had a proportion of 0% of sustainable estments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective
		sustainable investments with lobjective: 0%	×		moted E/S characteristics, but did not make any ainable investments

All data presented in the annex which follows has been calculated based on the portfolio holdings of the Fund as at 30 June 2025 (unless otherwise referenced), and constitutes unaudited information which has not been subject to any assurance provided by the Auditors or any third party.

Please note that due to the appointment of Swiss Re Insurance-Linked Investment Advisors Corporation (SRILIAC) as Co-Investment Manager of the Fund as of May 7th, 2025, the sustainability approach followed by the Fund under Article 8 SFDR was updated. Therefore, certain sustainability indicators are only calculated and referred to during the timeframe SRILIAC was a Co-Investment Manager of the Fund, and references to previous periods are not applicable, as indicated.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and/or social characteristics:

- 1) Societal and economic resilience from natural catastrophes, including the potential negative impacts of climate change, via investments in CAT Bonds.
- 2) Exclusion of CAT Bond sponsors involved in specific activities considered to cause negative environmental and social impact, as described in the Sustainability Exclusion Criteria.
- Assessed adherence to generally accepted international norms and standards set by the United Nations Global Compact (UN Global Compact), by exclusion of CAT Bond sponsors that violate these principles.

The environmental and social characteristics were promoted in line with the binding elements of the Investment Strategy of the Fund, as outlined in the Fund's Prospectus, and there were no breaches of the exclusion criteria or significant adverse impacts during the year.

No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How did the sustainability indicators perform?

The following sustainability indicators are used to measure the environmental and/or social characteristics of the Fund.

6) Minimum allocation of CAT Bonds transferring natural catastrophe risks

It is intended that in selecting investments for the Fund that at least 75% of the Net Asset Value of the Fund (measured at each Valuation Point) will be invested in CAT Bonds that transfer natural catastrophe risks. The indicator below is calculated as an average across each valuation point, from 7 May 2025 through 30 June 2025. The indicator below is only reported since 7 May 2025 since this date reflects the appointment of Swiss Re Insurance-Linked Investment Advisors (SRILIAC) as Co-Investment Manager of the Fund where the previous proprietary rating indicator was replaced with the investments in natural catastrophe CAT bonds indicator.

No exceptions were made during the reporting period

Sustainability Indicator	Units	Date ¹⁰	Data coverage ¹¹	Proportion of data estimated ¹²	Output ¹³
Investments in natural catastrophe CAT bonds: proportion of securities within the Fund invested in CAT Bonds that transfer natural catastrophe risks.	% of Fund	7 May 2025 through 30 June 2025	100%	Not applicable	88%

7) Indicators relating to Sustainability Exclusion Criteria

Involvement by the sponsor in the following activities, beyond the revenue threshold specified, would result in the investment being ineligible (other than where outlined in the Sustainability Exclusion Criteria within the Prospectus). This assessment is conducted at the sponsor level and reported as % of the Fund's investment sponsored by entities failing the criteria.

No exceptions were made during the reporting period.

Given the nature of sponsors in the ILS market, which are predominantly (re)insurance entities and where a large percentage of sponsors are privately held companies or government-related entities, product involvement assessments are based on internal research drawing on information made available by the sponsors as well as from public third-party sources.

social characteristics promoted by the financial product are attained.

Involvement in controversial weapons: share of investments in ILS sponsored by companies involved in the manufacture or selling of controversial weapons.	% of Fund	Internal research	30 June 2025	100%	Not applicable	0%
Involvement in weapons manufacturing or weapons component manufacturing: share of investments in ILS sponsored by companies involved in the manufacture of military weapons systems, and/or tailor-made components of these weapons systems, and/or tailor-made products or services that support military weapons systems (above 10% revenue threshold).	% of Fund	Internal research	30 June 2025	100%	Not applicable	0%
Involvement in tobacco manufacturing: share of investments in ILS sponsored by companies involved in the manufacture of tobacco products (above 5% revenue threshold).	% of Fund	Internal research	30 June 2025	100%	Not applicable	0%
Involvement in tobacco retail and distribution: share of investments in ILS sponsored by companies involved in the distribution and/or retail sale of tobacco products (above 5% revenue threshold).	% of Fund	Internal research	30 June 2025	100%	Not applicable	0%
Involvement in oil sands extraction: share of investments in ILS sponsored by companies involved in oil sands extraction (above 25% revenue threshold).	% of Fund	Internal research	30 June 2025	100%	Not applicable	0%

¹⁴ Data snapshot taken at the Fund's year end.

 $^{^{15}}$ Calculated as the proportion of ILS investments (by NAV) from ILS sponsors that are assessed under the Sustainability Exclusion Criteria. The calculation does not include non-ILS assets defined under "#2 Other" in the Prospectus.

¹⁶ Not applicable as compliance with the Sustainability Exclusion Criteria is assessed internally by the Delegate Investment Manager.

¹⁷ Calculated as the proportion of ILS investments (by NAV) from ILS sponsors that fail the criteria. The calculation does not include non-ILS assets defined under "#2 Other" in the Prospectus.

Involvement in thermal coal mining: Share of investments in ILS sponsored by companies involved in mining thermal coal or from generating electricity from thermal coal (above 25% revenue threshold).	% of Fund	Internal research	30 June 2025	100%	Not applicable	0%
	Sovereign sponsored ILS					
"Not Free" Sovereign Sponsors: share of investments in ILS sponsored by countries which have been assessed as "Not Free" by the Freedom House Global Freedom Score.	% of Fund	Freedom House	30 June 2025	100%	Not applicable	0%

8) <u>Indicators relating to international norms and standards ILS sponsored by non-sovereigns</u>

Sponsors are expected to adhere to minimum standards as defined by the UN Global Compact and international treaties governing the use of weapons. Sponsors assessed as having seriously breached the UN Global Compact are excluded, unless the sponsor is considered to have taken substantial and adequate steps to have addressed the allegations. This assessment is conducted at the sponsor level and reported as % of the Fund's investment sponsored by entities failing the criteria.

No exceptions were made during the reporting period.

Independent ESG ratings providers are used to assess severe UN Global Compact violations of sponsors. If a sponsor is not covered by any third-party data provider, internal research based on other third-party data sources and engagement with the sponsor, if appropriate, are used to form an assessment.

Sustainability Indicator	Units	Data source	Date 18	Data coverage	Proportion of data estimated 20	Output ²¹
Violations of UN Global Compact principles (also related to Principal Adverse Impacts): share of investments in investee companies that have been involved in violations of the UNGC principles.	% of Fund	Independent ESG ratings providers	30 June 2025	89.2%	10.8%	0%

¹⁹ Calculated as the proportion of ILS investments (by NAV) from sponsors that are covered by at least one third-party ESG data provider. The calculation does not include non-ILS assets defined under "#2 Other" in the Prospectus.

¹⁸ Data snapshot taken at the Fund's year end.

²⁰ Calculated as the proportion of ILS investments (by NAV) from ILS sponsors that are not covered by at least one third-party data provider. The calculation does not include non-ILS assets defined under "#2 Other" in the Prospectus.

²¹ Calculated as the proportion of ILS investments (by NAV) from ILS sponsors that fail the criteria. The calculation does not include non-ILS assets defined under "#2 Other" in the Prospectus.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

— How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Not applicable.

The change to the data coverage and output under the "Investments in natural catastrophe CAT bonds" sustainability indicator is due to the change in Co-Investment Manager on 7 May 2025 and its related methodology update. Therefore, the indicator is not applicable to 2024.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered the principal adverse impacts (PAIs)—as detailed in Table 1, and noting the additional indicators in Tables 2 and 3, of Annex 1 of the SFDR Delegated Act—on sustainability factors in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

Fund Considerations

The actions taken in relation to the PAI indicators considered are summarised in the table below:

Non-Sovereign Issuers

Adverse Sustainability Indicator

	,				
Table 1					
Social & Employee Matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	No investments in the Fund were sponsored by entities that violate any of the UN Global Compact principles, including or social and employee matters, throughout the reporting period.			
	14. Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons, and biological weapons)	No investments in the Fund were sponsored by entities that have any direct involvement in controversial weapons throughout the reporting period.			
	Table 2	2			
Emissions	Investments in companies without carbon emission reduction initiatives	If an ILS sponsor is involved in the generation of energy from thermal coal with a revenue level above the Sustainability Exclusion Criteria threshold, then an			
Energy performance	5. Breakdown of energy consumption by type of non-renewable sources of energy	investment can only be made if the sponsor is involved in credible carbon emission reduction initiatives to bring the sponsor in line with the Sustainability Exclusion Criteria in a reasonable timeframe.			
		No investments in the Fund were sponsored by entities that have revenue			

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

	above the stated threshold with respect to thermal coal.
Water, waste and material emissions	Considered only if sponsor actions in this area leads to a UN Global Compact violation. No investments in the Fund were sponsored by entities that violate any of the UN Global Compact principles, including on environmental matters, throughout the reporting period.
'	Table 3
Social and employee matters	Considered only if sponsor actions in this area leads to a UN Global Compact violation. No investments in the Fund were sponsored by entities that violate any of the UN Global Compact principles, including on labor standards matters, throughout the reporting period.
Human Rights	Considered only if sponsor actions in this area leads to a UN Global Compact violation. No investments in the Fund were sponsored by entities that violate any of the UN Global Compact principles, including on human rights matters, throughout the reporting period.
Anti-corruption and anti-bribery	Considered only if sponsor actions in this area leads to a UN Global Compact violation. No investments in the Fund were sponsored by entities that violate any of the UN Global Compact principles, including on anti-corruption and anti-bribery matters, throughout the reporting period.

Sovereign Issuers

Adve	rse sustainability indicator	Fund Considerations
	Table	· 1
Social	16. Investee countries subject to social violations	Considered only to the extent it is covered by the Freedom House Global Freedom Score. ILS from sovereign sponsors that receive a "Not Free" score on the Freedom House Global Freedom Score are not eligible for investment, unless this sovereign is working through an international organization—such as the World Bank, the United Nations, regional development bank or other body with robust ESG safeguards that contributes to and is actively involved in the deal—to access the ILS market within the construct of an initiative that upholds principles of freedom: namely encouraging improved transparency and accountability of sovereign sponsors to their citizens.

	Table	All sovereign ILS sponsors in the Fund were assessed as "Free" or "Partly Free" by the Freedom House Global Freedom Score, throughout the reporting period.
Social	19. Average freedom of expression score	Considered only to the extent it is covered by the Freedom House Global Freedom Score. All sovereign ILS sponsors in the Fund were assessed as "Free" or "Partly Free" by the Freedom House Global Freedom Score throughout the reporting period.
Human Rights	20. Average human rights performance	Considered only to the extent it is covered by the Freedom House Global Freedom Score. In addition, to be eligible investments, ILS from sovereigns with human rights allegations would be expected to work through an international organization—such as the World Bank, the United Nations, regional development bank or other body with robust ESG safeguards that contributes to and is actively involved in the deal—to access the ILS market within the construct of an initiative that upholds principles of human rights: namely encouraging improved transparency and accountability of sovereign sponsors to their citizens in times of disaster All sovereign ILS sponsors in the Fund were assessed as "Free" or "Partly Free" by the Freedom House Global Freedom Score throughout the reporting period.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 30 June 2025

Largest Investments	Sector	% Assets	Country
U.S. Treasury Bills 0% 2025-08-05	Cash Equivalent	4.92	United States

The table above provides a snapshot of the largest investments as at 30 June 2025. This snapshot is reflective of the general portfolio composition throughout the reporting period.

Investments typically support the (re)insurance industry, the sponsor type (e.g. insurer, reinsurer, corporate, government) is reflected in the columns "Sector" as this is most appropriate for the Fund. Government sponsors of ILS within the Fund include local municipalities, transit authorities, state insurance entities and residual insurance pools formed by statute, national insurance programs (that can be classified as sovereign) and public-private reinsurance pools, as well as international organizations (that can also facilitate ILS issuance for sovereigns). During the reporting period there were six ILS sovereign sponsors within in the Fund.

What was the proportion of sustainability-related investments?

N/A. Information on the proportion of the Fund which promoted environmental/social characteristics during the reference period is provided below.

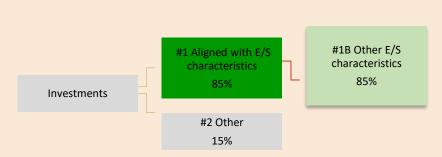

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- reflecting the share of revenue from green activities of investee companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, , e.g.
 relevant for a
 transition to a
 green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

What was the asset allocation?

All assets excluding ILS that are not aligned to transferring natural catastrophe risk, cash, cash, equivalents, and/or certain derivatives are aligned with environmental/social characteristics of the Fund. As at 30 June 2025 (snapshot at year-end) 85% of the Fund was aligned with E/S characteristics, while 15% was in assets categorised as #2 Other in accordance with the Prospectus. Further details in

- **#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

relation to such assets is set out in the section entitled "What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?" below.

In which economic sectors were the investments made?

Investments typically support sponsors in the (re)insurance industry and the sponsor type (e.g. re/insurer, corporate, government) is reflected in the table below as it is most appropriate for the asset class. Allocations are shown as a % ILS-only NAV of the Fund as at 30 June 2025.

Sponsor Type	Allocation
Re/Insurer	71.8%
Corporate	1.2%
Government	27.0%

Sponsors are classified as an re/insurer, corporate or government by the Co- Investment Manager on a best-efforts basis. Government sponsors of ILS within the Fund include local municipalities, transit authorities, state insurance entities and residual insurance pools formed by statute, national insurance programs (that can be classified as sovereign) and public-private reinsurance pools, as well as international organizations.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund promotes environmental and social characteristics within the meaning of Article 8 of the SFDR, it does not currently commit to investing in a minimum level of "sustainable investments" within the meaning of the SFDR and it does not currently commit to a minimum level of investments taking into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. As such, the minimum proportion of the Fund's investments that contribute to environmentally sustainable economic activities for the purposes of the Taxonomy Regulation, including investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, is 0%.

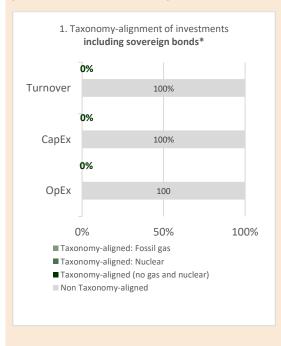

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional** activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

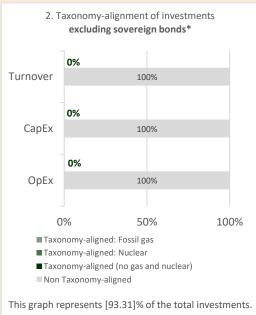

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy²³?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all ILS sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

²³ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The following investments were included under "2 Other":

- ILS not transferring natural catastrophe risk
- Cash equivalents (including US Treasury Bills)
- Currency hedges for non-US dollar assets
- ILS repo positions

The non-ILS "other" investments listed above were used for currency and cash management purposes for the Fund.

Reference benchmarks are

indexes to

the financial product attains the

social

measure whether

environmental or

characteristics that

they promote.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

1. Actions relating to analysis of natural catastrophe risks

The Fund invested in ILS aligned to transferring natural catastrophe risk (which is determined based on the explicit covered perils covered by a Cat Bond's structure). This assessment was conducted at the instrument-level.

2. Actions relating to Sustainability Exclusion Criteria

The Sustainability Exclusion Criteria were assessed, on a best-efforts basis, as part of investment controlling, using internal research drawing on information from sponsors, independent ESG rating providers where available and other recognised public third-party sources. There were no breaches of the Sustainability Exclusion Criteria during the reporting period.

3. Indicators relating to international norms and standards

UN Global Compact compliance was assessed, on a best-efforts basis, as part of investment controlling. The Co-Investment Manager used third-party data providers' data to categorise serious breaches, which were intended to identify credible allegations of a violation of global norms. This was also supplemented by internal research where third-party data coverage was unavailable. There were no breaches of the UN Global Compact compliance during the reference period.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: GAM Star China Equity (the "Fund" or "Financial Product")

Legal entity identifier: 5493003USMRCW7XRBC44

Environmental and/or social characteristics

Did this financial product have a sustainable	investment objective?
Yes	No X No
in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
It made sustainable investments with a social objective:%	with a social objective It promoted E/S characteristics, but did not make any sustainable investments

All data presented in the annex which follows has been calculated based on the portfolio holdings of the Fund as at 30 June 2025 and constitutes unaudited information which has not been subject to any assurance provided by the Auditors or any third party.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and social characteristics:

- 6) Exclusion of companies involved in specific activities considered to cause negative environmental and/or social impact, as described in the Sustainability Exclusion Criteria detailed in the Fund Prospectus (the "Prospectus").,
- 7) Assessed adherence to generally accepted international norms and standards set by the United Nations Global Compact (UNGC),
- 8) Consideration of Principal Adverse Impacts ("PAIs") on sustainability factors as detailed in Table 1 of Annex I of the Commission Delegated Regulation (EU) 2022/ 1288 (the "SFDR Delegated Act"),
- 9) Investments in companies assessed to follow good governance practices, and
- 10) Engagement with investee companies on environmental, social and governance issues as described in the Prospectus.

The environmental and social characteristics were promoted in line with the binding elements of the investment strategy of the Fund, as outlined in the Prospectus. There were no breaches of the exclusion criteria.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities.

That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How did the sustainability indicators perform?

The following sustainability indicators are used to measure the environmental and/or social characteristics of the Fund.

9) Indicators relating to Sustainability Exclusion Criteria

Involvement in the following activities, beyond the revenue threshold specified, result in the investment being ineligible (other than where outlined in the GAM Sustainability Exclusions Policy). No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source ¹⁰	Date ²⁴	Data coverage 25	Data estimated ²⁶	Output ²⁷
Involvement in controversial weapons: share of investments in investee companies involved in the manufacture or selling of controversial weapons.	% of Fund	MSCI	30 June 2025	100%	0%	0%
Involvement in weapons manufacturing or weapons component manufacturing: share of investments in investee companies involved in the manufacture of military weapons systems, and/or tailor-made components of these weapons systems, and/or tailor-made products or services that support military	% of Fund	Sustainalytics	30 June 2025	100%	0%	0%

²⁴ Data snapshot taken at the Fund's year end. Sustainalytics and MSCI data as at 30th June 2025.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

²⁵ Calculated as the proportion of investments (by NAV) for which data is available. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. Where there is less than 100% coverage, this would be due to the third party provider not covering the issuer. We engage with service providers and companies directly with the objective of increasing data coverage and disclosure. More information about MSCI's coverage can be found here. More information about Sustainalytics coverage can be found here.

²⁶ Calculated as the proportion of investments (by NAV) for which data is estimated. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. MSCI data methodology can be found here. Information on Sustainalytics product involvement can be found here.

²⁷ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus.

¹⁰Whilst only one data source is listed, we may use further data providers to support our analysis. Please refer to our Sustainability Exclusion Policy for further details.

		I		ı		
weapons systems (above 10% revenue threshold).						
Involvement in assault weapons for civilian customers: share of investments in investee companies involved in the manufacture and sale of assault weapons to civilian customers (above 10% revenue threshold).	% of Fund	Sustainalytics	30 June 2025	100%	0%	0%
Involvement in tobacco manufacturing: share of investments in investee companies involved in the manufacture of tobacco products (above 5% revenue threshold).	% of Fund	Sustainalytics	30 June 2025	100%	0%	0%

²⁸ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. We use MSCI data to determine adherence to the UN Global Compact. For this data point, we are specifically looking at whether a company is deemed to 'Fail' adhering to the underlying principles. More information on MSCI's approach can be found here.

 $^{^{29}}$ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus..

percentage of board members who are female. For companies with a two-tier board, the calculation is based on members of the Supervisory Board only.				
---	--	--	--	--

12) Indicators relating to good governance

The investment strategy incorporates a principles-based approach when assessing good governance. The assessment informs investment decisions and is used by the Investment Manager to satisfy itself that good governance practices are in place when selecting investments for the Fund. In addition, the assessment is conducted on an ongoing basis to inform voting decisions and engagement activity.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ³⁰
Board independence: the percentage of board members that meet GAM's criteria for independent management, as measured by a third-party data provider. What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

— How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

In accordance with the provisions of the Prospectus, the Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

The actions taken in relation to the PAI indicators considered are summarised in the table below:

Indicators applicable to investments in investee companies

Adverse sust	ainability indicator	Fund consideration		
	1. GHG emissions	A range of indicators in relation to company GHG		
	Carbon footprint	emissions and carbon emission reduction		
	3. GHG Intensity of investee	initiatives (including Scope 1 & Scope 2 GHG		
	companies	emissions among others) were reviewed as part		
	4. Exposure to companies active	of the investment process, and were primarily		
	in the fossil fuel sector	addressed in a qualitative way, for example		
Greenhouse	5. Share of non-renewable	through engagement with selected investee		
gas	energy consumption and	companies on reduction targets and initiatives or		
emissions	production	voting on resolutions to support greater transparency on climate-related risks. Investeee		
	Energy consumption intensity per high impact climate sector	companies assessed to derive over 25% of revenue from thermal coal mining or electricity generation from thermal coal were excluded from the Fund.		
Biodiversity	7. Activities negatively affecting biodiversity-sensitive areas	Indicators in relation to an investee company's impact on biodiversity, including deforestation,

The table above provides a snapshot of the largest investments as at 30 June 2025. This snapshot is reflective of the general portfolio composition throughout the reporting period.

The Global Industry Classification Standard is used to determine economic sectors.

What was the proportion of sustainability-related investments?

1

N/A. Information on the proportion of the Fund which promoted environmental/social characteristics during the reference period is provided below.

What was the asset allocation?

All assets excluding cash/cash equivalent instruments and/or certain derivatives are aligned with environmental/social characteristics of the Fund. As at 30 June 2025 (snapshot at year-end), 97.15% of the Fund attained the environmental and social characteristics promoted by the Fund, while 2.85% was in assets categorised as #2 Other in accordance with the Prospectus. Further details in relation to such

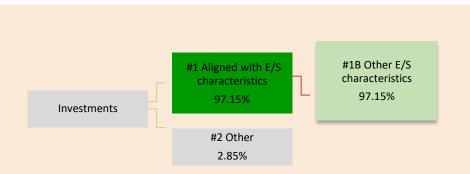

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional** activities are

experiorure (CapEx) showing the green investments made by investee companies, , e.g. relevant for a transition to a green economy.

 operational expenditure (OpEx) reflecting the green operational activities of investee companies. assets is set out in the section entitled "What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?" below.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Allocation
Consumer Discretionary	28.44 %
Communication Services	24.95 %
Financials	19.11 %
Information Technology	12.07 %
Industrials	4.76 %
Health Care	2.90 %
Consumer Staples	1.92 %
Real Estate	1.75 %
Utilities	1.26 %

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund promotes environmental and social characteristics within the meaning of Article 8 of the SFDR, it does not currently commit to investing in a minimum level of "sustainable investments" within the meaning of the SFDR and it does not currently commit to a minimum level of investments taking into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. As such, any investments that contribute to environmentally sustainable economic activities for the purposes of the Taxonomy Regulation, including investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, are held on an incidental basis and is currently estimated to be <10% based on available data.

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy³²?

³² Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

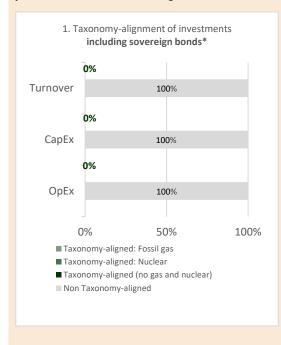

Yes

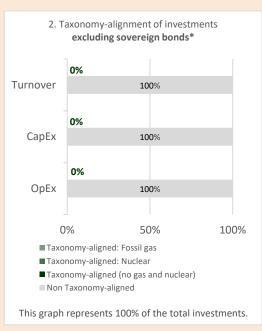

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities

under Regulation

(EU) 2020/852.

Other" invvestments of the Fund included [cash / cash equivalents and / or certain derivatives] for liquidity and efficient management of the Fund. An assessment of minimum environmental and social safeguards is deemed not to be relevant for cash and cash equivalents by nature of the asset class, nor derivatives where full look through is not possible.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

1. Actions relating to Sustainability Exclusion Criteria

The Sustainability Exclusion Criteria were assessed, on a best-efforts basis, as part of investment controlling, using Sustainalytics. There were no breaches of the Sustainability Exclusion Criteria during the reporting period

2. Actions relating to international norms and standards

UN Global Compact compliance was assessed, on a best-efforts basis, as part of investment controlling. The Investment Manager used third-party data providers' frameworks and data to categorise serious breaches, which were intended to identify credible allegations of a violation of global norms, supplemented by internal research where third-party data coverage was unavailable. There were no breaches of the UN Global Compact compliance during the period.

3. Actions relating to Principal Adverse Impacts on sustainability factors

The Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

Greenhouse gas emissions and involvement in fossil fuel sector – a range of indicators in relation to company GHG emissions and carbon emission reduction initiatives (including Scope 1 & Scope 2 GHG emissions among others) were reviewed as part of the investment process, and were primarily addressed in a qualitative way, for example through engagement with selected companies on reduction targets and initiatives or voting on resolutions to support greater transparency on climate-related risks. Companies assessed to derive over 25% of revenue from thermal coal mining or electricity generation from thermal coal were excluded from the Fund.

Biodiversity, water & waste – indicators in relation to a company's impact on biodiversity, including deforestation, water and waste, were reviewed as part of the investment process and were primarily addressed in a qualitative way, for example through engagement with selected companies

Social and employee matters – a range of PAI indicators were reviewed as part of the investment process. Companies assessed as severely violating UN Global Compact principles or assessed as having exposure to controversial weapons are excluded from the Fund. Board gender diversity was considered primarily within engagement and voting decisions.

4. Actions relating to good governance

The investment Manager incorporated a principles-based approach when assessing good governance. The assessment informed investment decisions and was used by the Investment Manager to satisfy itself that good governance practices were in place when selecting investments for the Fund. In addition, the assessment was conducted on an ongoing basis to inform voting decisions and engagement activity. This included consideration of board structure and independence, alignment of remuneration, transparency of ownership and control, audit and accounting. Good governance was assessed in a qualitative and/or quantitative way dependent on the relevance of the specific indicator. This included:

- Sound management structures including Board independence, Board diversity and audit committee independence
- Employee relations in particular any serious breaches of UN Global Compact principles are excluded
- Remuneration of staff
- Tax compliance in particular any companies flagged for significant tax violations

In addition, good governance was supported by ensuring companies adhere to minimum standards as defined by the ten principles of the United Nations Global Compact, which cover anti-corruption (Principle 10) and labour rights (Principles 3-6) and well as environmental governance (Principles 7-9).

5. Actions relating to engagement

Engagement was made on behalf of the Fund with investee companies on environmental, social and governance issues in line with their investment and due diligence process. Throughout the 12 month period, from 01/07/2024 to 30/06/2025, the investment team engaged with 5 companies relating to ESG and sustainability concerns or opportunities.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: GAM Star Continental European Equity (the "Fund" or "Financial Product")

Legal entity identifier: 549300YSCWDIOZ2LA130

Environmental and/or social characteristics

Did this financial product have a sustainable	investment objective?
Yes	● ○ 🗶 No
It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments

All data presented in the annex which follows has been calculated based on the portfolio holdings of the Fund as at 30 June 2025 and constitutes unaudited information which has not been subject to any assurance provided by the Auditors or any third party.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and social characteristics:

- 11) Exclusion of companies involved in specific activities considered to cause negative environmental and/or social impact, as described in the Sustainability Exclusion Criteria detailed in the Fund Prospectus (the "Prospectus").,
- 12) Assessed adherence to generally accepted international norms and standards set by the United Nations Global Compact (UNGC),
- 13) Consideration of Principal Adverse Impacts ("PAIs") on sustainability factors as detailed in Table 1 of Annex I of the Commission Delegated Regulation (EU) 2022/ 1288 (the "SFDR Delegated Act"),
- 14) Investments in companies assessed to follow good governance practices, and
- 15) Engagement with investee companies on environmental, social and governance issues as described in the Prospectus.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation

does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

The environmental and social characteristics were promoted in line with the binding elements of the

investment strategy of the Fund, as outlined in the Prospectus. There were no breaches of the exclusion criteria.

No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How did the sustainability indicators perform?

The following sustainability indicators are used to measure the environmental and/or social characteristics of the Fund.

14) Indicators relating to Sustainability Exclusion Criteria

Involvement in the following activities, beyond the revenue threshold specified, result in the investment being ineligible (other than where outlined in the GAM Sustainability Exclusions Policy). No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source ¹⁰	Date ³³	Data coverage	Data estimated ³⁵	Output ³⁶
Involvement in controversial weapons: share of investments in investee companies involved in the manufacture or selling of controversial weapons.	% of Fund	MSCI	30 June 2025	100%	0%	0%
Involvement in weapons manufacturing or weapons component manufacturing: share of investments in investee companies involved in the manufacture of military weapons systems, and/or tailor-made components of these weapons systems, and/or tailor-made	% of Fund	Sustainalytics	30 June 2025	100%	0%	0%

³³ Data snapshot taken at the Fund's year end. Sustainalytics and MSCI data as at 30th June 2025.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

.

³⁴ Calculated as the proportion of investments (by NAV) for which data is available. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. Where there is less than 100% coverage, this would be due to the third party provider not covering the issuer. We engage with service providers and companies directly with the objective of increasing data coverage and disclosure. More information about MSCI's coverage can be found here. More information about Sustainalytics coverage can be found here.

³⁵ Calculated as the proportion of investments (by NAV) for which data is estimated. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. MSCI data methodology can be found here. Information on Sustainalytics product involvement can be found here.

³⁶ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus.

¹⁰Whilst only one data source is listed, we may use further data providers to support our analysis. Please refer to our Sustainability Exclusion Policy for further details.

products or services that support military weapons systems (above 10% revenue threshold).						
Involvement in assault weapons for civilian customers: share of investments in investee companies involved in the manufacture and sale of assault weapons to civilian customers (above 10% revenue threshold).	% of Fund	Sustainalytics	30 June 2025	100%	0%	0%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

— How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

— Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and anti-

bribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

In accordance with the provisions of the Prospectus, the Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

The actions taken in relation to the PAI indicators considered are summarised in the table below:

Indicators applicable to investments in investee companies

The table above provides a snapshot of the largest investments as at 30 June 2025. This snapshot is reflective of the general portfolio composition throughout the reporting period.

The Global Industry Classification Standard is used to determine economic sectors.

Asset allocation describes the snare or investments in specific assets.

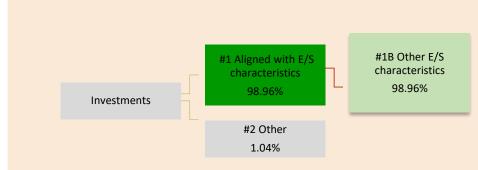

What was the proportion of sustainability-related investments?

N/A. Information on the proportion of the Fund which promoted environmental/social characteristics during the reference period is provided below.

What was the asset allocation?

All assets excluding cash/cash equivalent instruments and/or certain derivatives are aligned with environmental/social characteristics of the Fund. As at 30 June 2025 (snapshot at year-end), 98.96% of the Fund attained the environmental and social characteristics promoted by the Fund, while 1.04% was in assets categorised as #2 Other in accordance with the Prospectus. Further details in relation to such assets is set out in the section entitled "What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?" below

- **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2** Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Allocation

Financials	20.59 %
Information Technology	15.00 %
Health Care	12.92 %
Communication Services	7.13 %
Consumer Staples	5.65 %
Energy	4.90 %
Materials	4.47 %
Consumer Discretionary	2.32 %
Utilities	1.56 %

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund promotes environmental and social characteristics within the meaning of Article 8 of the SFDR, it does not currently commit to investing in a minimum level of "sustainable investments" within the meaning of the SFDR and it does not currently commit to a minimum level of investments taking into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. As such, any investments that contribute to environmentally sustainable economic activities for the purposes of the Taxonomy Regulation, including investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, are held on an incidental basis and is currently estimated to be <10% based on available data.

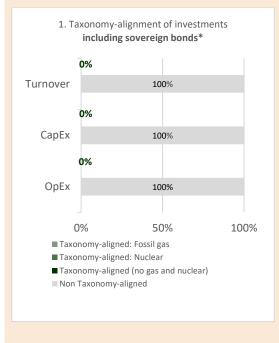

Taxonomy-aligned activities are expressed as a share of:

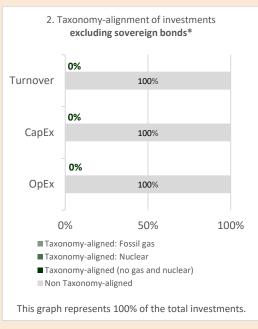

- reflecting the share of revenue from green activities of investee companies.
- expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, , e.g.
 relevant for a
 transition to a
 green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional** activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy⁴¹?

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Other" invvestments of the Fund included [cash / cash equivalents and / or certain derivatives] for liquidity and efficient management of the Fund. An assessment of minimum environmental and social safeguards is deemed not to be relevant for cash and cash equivalents by nature of the asset class, nor derivatives where full look through is not possible.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

1. Actions relating to Sustainability Exclusion Criteria

The Sustainability Exclusion Criteria were assessed, on a best-efforts basis, as part of investment controlling, using Sustainalytics. There were no breaches of the Sustainability Exclusion Criteria during the reporting period

2. Actions relating to international norms and standards

UN Global Compact compliance was assessed, on a best-efforts basis, as part of investment controlling. The Investment Manager used third-party data providers' frameworks and data to categorise serious breaches, which were intended to identify credible allegations of a violation of global norms, supplemented by internal research where third-party data coverage was unavailable. There were no breaches of the UN Global Compact compliance during the period.

3. Actions relating to Principal Adverse Impacts on sustainability factors

The Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

Greenhouse gas emissions and involvement in fossil fuel sector – a range of indicators in relation to company GHG emissions and carbon emission reduction initiatives (including Scope 1 & Scope 2 GHG emissions among others) were reviewed as part of the investment process, and were primarily addressed in a qualitative way, for example through engagement with selected companies on reduction targets and initiatives or voting on resolutions to support greater transparency on climate-related risks. Companies assessed to derive over 25% of revenue from thermal coal mining or electricity generation from thermal coal were excluded from the Fund.

Biodiversity, water & waste – indicators in relation to a company's impact on biodiversity, including deforestation, water and waste, were reviewed as part of the investment process and were primarily addressed in a qualitative way, for example through engagement with selected companies

Social and employee matters – a range of PAI indicators were reviewed as part of the investment process. Companies assessed as severely violating UN Global Compact principles or assessed as having exposure to controversial weapons are excluded from the Fund. Board gender diversity was considered primarily within engagement and voting decisions.

4. Actions relating to good governance

The investment Manager incorporated a principles-based approach when assessing good governance. The assessment informed investment decisions and was used by the Investment Manager to satisfy itself that good governance practices were in place when selecting investments for the Fund. In addition, the assessment was conducted on an ongoing basis to inform voting decisions and engagement activity. This included consideration of board structure and independence, alignment of remuneration, transparency of ownership and control, audit and accounting. Good governance was assessed in a qualitative and/or quantitative way dependent on the relevance of the specific indicator. This included:

- Sound management structures including Board independence, Board diversity and audit committee independence
- Employee relations in particular any serious breaches of UN Global Compact principles are excluded
- Remuneration of staff
- Tax compliance in particular any companies flagged for significant tax violations

In addition, good governance was supported by ensuring companies adhere to minimum standards as defined by the ten principles of the United Nations Global Compact, which cover anti-corruption (Principle 10) and labour rights (Principles 3-6) and well as environmental governance (Principles 7-9).

5. Actions relating to engagement

Engagement was made on behalf of the Fund with investee companies on environmental, social and governance issues in line with their investment and due diligence process. Throughout the 12 month period, from 01/07/2024 to 30/06/2025, the investment team engaged with 7 companies relating to ESG and sustainability concerns or opportunities.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: GAM Star Credit Opportunities (EUR) (the "Fund" or "Financial Product")

Legal entity identifier: 549300Q7O671NUXGIL66

Environmental and/or social characteristics

Did this financial product have a susta	ainable investment objective?
Yes	● ○ 🗶 No
in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that not qualify as environmentally sustainable under the EU Taxonomy	characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
It made sustainable investments a social objective:%	with a social objective With It promoted E/S characteristics, but did not make any sustainable investments

All data presented in the annex which follows has been calculated based on the portfolio holdings of the Fund as at 30 June 2025 and constitutes unaudited information which has not been subject to any assurance provided by the Auditors or any third party.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and social characteristics:

- 1) Exclusion of companies involved in specific activities considered to cause negative environmental and/or social impact, as described in the Sustainability Exclusion Criteria detailed in the Fund Prospectus (the "Prospectus").,
- 2) Assessed adherence to generally accepted international norms and standards set by the United Nations Global Compact (UNGC),
- 3) Consideration of Principal Adverse Impacts ("PAIs") on sustainability factors as detailed in Table 1 of Annex I of the Commission Delegated Regulation (EU) 2022/ 1288 (the "SFDR Delegated Act"),
- 4) Investments in companies assessed to follow good governance practices, and
- 5) Engagement with investee companies on environmental, social and governance issues as described in the Prospectus.

The environmental and social characteristics were promoted in line with the binding elements of the investment strategy of the Fund, as outlined in the Prospectus. There were no breaches of the exclusion criteria.

No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation

does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The following sustainability indicators are used to measure the environmental and/or social characteristics of the Fund.

1) Indicators relating to Sustainability Exclusion Criteria

Involvement in the following activities, beyond the revenue threshold specified, result in the investment being ineligible (other than where outlined in the GAM Sustainability Exclusions Policy). No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source ¹⁰	Date ¹	Data coverage ²	Data estimated ³	Output ⁴
Involvement in controversial weapons: share of investments in investee companies involved in the manufacture or selling of controversial weapons.	% of Fund	MSCI	30 June 2025	100%	0%	0%
Involvement in weapons manufacturing or weapons component manufacturing: share of investments in investee companies involved in the manufacture of military weapons systems, and/or tailor-made components of these weapons systems, awnd/or tailor-made products or services that support military weapons systems (above 10% revenue threshold).	% of Fund	Sustainalytics	30 June 2025	100%	0%	0%

¹ Data snapshot taken at the Fund's year end. Sustainalytics and MSCI data as at 30 June 2025.

² Calculated as the proportion of investments (by NAV) for which data is available. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. Where there is less than 100% coverage, this would be due to the third party provider not covering the issuer. We engage with service providers and companies directly with the objective of increasing data coverage and disclosure. More information about MSCI's coverage can be found here. More information about Sustainalytics coverage can be found <a href=here.

³ Calculated as the proportion of investments (by NAV) for which data is estimated. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. MSCI data methodology can be found here. Information on Sustainalytics product involvement can be found <a href=here.

⁴ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus.

¹⁰Whilst only one data source is listed, we may use further data providers to support our analysis. Please refer to our Sustainability Exclusion Policy for further details.

Involvement in assault weapons for civilian customers: share of investments in investee companies involved in the manufacture and sale of assault weapons to civilian customers (above 10% revenue threshold).	% of Fund	Sustainalytics	30 June 2025	100%	0%	0%
Involvement in tobacco manufacturing: share of investments in investee companies involved in the manufacture of tobacco products (above 5% revenue threshold).	% of Fund	Sustainalytics	30 June 2025	100%	0%	0%
Involvement in tobacco retail and distribution: share of investments in investee companies involved in the distribution and/or retail sale of tobacco products (above 25% revenue threshold).	% of Fund	Sustainalytics	30 June 2025	100%	0%	0%
Involvement in oil sands extraction: share of investments in companies involved in oil sands extraction (above 25% revenue threshold).	% of Fund	Sustainalytics	30 June 2025	100%	0%	0%
Involvement in thermal coal: Share of investments in companies involved in mining thermal coal or from generating electricity from thermal coal (above 25% revenue threshold).	% of Fund	Sustainalytics	30 June 2025	100%	0%	0%

2) Indicators relating to international norms and standards

Investee companies are expected to adhere to minimum international norms and standards as defined by the UN Global Compact (as defined in the Prospectus). Investee companies assessed as having seriously breached the UN Global Compact are excluded, unless the issuer is considered to have taken substantial and adequate steps to have addressed the allegations.

No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁵
Violations of UN Global Compact principles (also related to Principal Adverse Impacts): share of investments in investee companies that have been involved in violations of the UNGC principles.	% of Fund	MSCI	30 June 2025	100%	0%	0%

3) Indicators relating to Principal Adverse Impacts

The Investment Manager applied an internal framework to consider and, where considered appropriate, take action to mitigate principal adverse impacts on sustainability factors.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁶
Scope 1 & Scope 2 Greenhouse gas (GHG) emissions: Absolute greenhouse gas emissions associated with a portfolio, expressed in tons CO2 equivalent	tons CO2 equivalent	MSCI	30 June 2025	97.40%	0%	243.2

⁸This output is the total number of companies that the Investment Team engaged with that were held in the portfolio as at 30th June 2025. The Investment Team may have engaged with companies i) on more than one occasion, ii) for pre-investment due diligence, iii) throughout the reporting period which were sold prior to the 30th June 2025 and therefore will not be reflected here. There could also be cases when companies within the portfolio were engaged with by other investments teams that are part of GAM Holding AG where there is a cross-holding, these are also not reflected in this output.

 $^{^{11}{}m GAM's}$ definition of engagement can be found in our Engagement Policy on our website.

Board Independence	84.03%	84.04%	81.26%	84.68%
Engagement Activity	100%	30	100%	22

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and anti-

bribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

In accordance with the provisions of the Prospectus, the Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

The actions taken in relation to the PAI indicators considered are summarised in the table below:

Indicators applicable to investments in investee companies

Adverse sust	ainability indicator	Fund consideration				
	1. GHG emissions	A range of indicators in relation to company GHG

The table above provides a snapshot of the largest investments as at 30 June 2025. This snapshot is reflective of the general portfolio composition throughout the reporting period.

The Global Industry Classification Standard is used to determine economic sectors.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

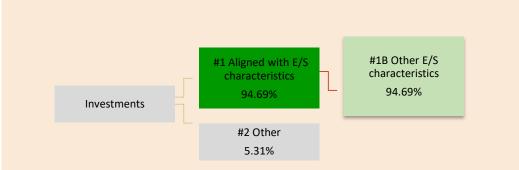

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, , e.g.
 relevant for a
 transition to a
 green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

What was the proportion of sustainability-related investments?

N/A. Information on the proportion of the Fund which promoted environmental/social characteristics during the reference period is provided below.

What was the asset allocation?

All assets excluding cash/cash equivalent instruments and/or certain derivatives are aligned with environmental/social characteristics of the Fund. As at 30 June 2025 (snapshot at year-end), 94.69% of the Fund attained the environmental and social characteristics promoted by the Fund, while 5.31% was in assets categorised as #2 Other in accordance with the Prospectus. Further details in relation to such assets is set out in the section entitled "What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?" below.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

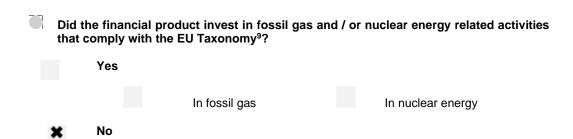

Sector	Allocation
Financials	94.69%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

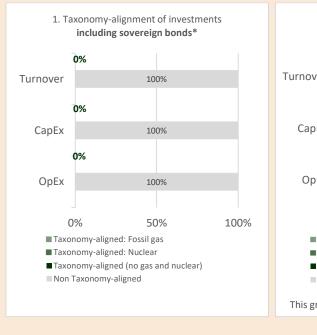

While the Fund promotes environmental and social characteristics within the meaning of Article 8 of the SFDR, it does not currently commit to investing in a minimum level of "sustainable investments" within the meaning of the SFDR and it does not currently commit to a minimum level of investments taking into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. As such, any investments that contribute to environmentally sustainable economic activities for the purposes of the Taxonomy Regulation, including investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, are held on an incidental basis and is currently estimated to be <10% based on available data.

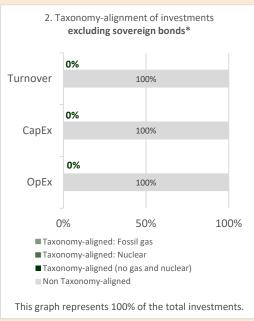

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional** activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The aphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomyalignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

⁹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Other" invvestments of the Fund included [cash / cash equivalents and / or certain derivatives] for liquidity and efficient management of the Fund. An assessment of minimum environmental and social safeguards is deemed not to be relevant for cash and cash equivalents by nature of the asset class, nor derivatives where full look through is not possible.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

1. Actions relating to Sustainability Exclusion Criteria

The Sustainability Exclusion Criteria were assessed, on a best-efforts basis, as part of investment controlling, using Sustainalytics. There were no breaches of the Sustainability Exclusion Criteria during the reporting period

2. Actions relating to international norms and standards

UN Global Compact compliance was assessed, on a best-efforts basis, as part of investment controlling. The Investment Manager used third-party data providers' frameworks and data to categorise serious breaches, which were intended to identify credible allegations of a violation of global norms, supplemented by internal research where third-party data coverage was unavailable. There were no breaches of the UN Global Compact compliance during the period.

3. Actions relating to Principal Adverse Impacts on sustainability factors

The Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

Greenhouse gas emissions and involvement in fossil fuel sector – a range of indicators in relation to company GHG emissions and carbon emission reduction initiatives (including Scope 1 & Scope 2 GHG emissions among others) were reviewed as part of the investment process, and were primarily addressed in a qualitative way, for example through engagement with selected companies on reduction targets and initiatives or voting on resolutions to support greater transparency on climate-related risks. Companies assessed to derive over 25% of revenue from thermal coal mining or electricity generation from thermal coal were excluded from the Fund.

Biodiversity, water & waste – indicators in relation to a company's impact on biodiversity, including deforestation, water and waste, were reviewed as part of the investment process and were primarily addressed in a qualitative way, for example through engagement with selected companies

Social and employee matters – a range of PAI indicators were reviewed as part of the investment process. Companies assessed as severely violating UN Global Compact principles or assessed as having exposure to controversial weapons are excluded from the Fund. Board gender diversity was considered primarily within engagement and voting decisions.

4. Actions relating to good governance

The investment Manager incorporated a principles-based approach when assessing good governance. The assessment informed investment decisions and was used by the Investment Manager to satisfy itself that good governance practices were in place when selecting investments for the Fund. In addition, the assessment was conducted on an ongoing basis to inform voting decisions and engagement activity. This included consideration of board structure and independence, alignment of remuneration, transparency of ownership and control, audit and accounting. Good governance was assessed in a qualitative and/or quantitative way dependent on the relevance of the specific indicator. This included:

- Sound management structures including Board independence, Board diversity and audit committee independence
- Employee relations in particular any serious breaches of UN Global Compact principles are excluded
- · Remuneration of staff
- Tax compliance in particular any companies flagged for significant tax violations

In addition, good governance was supported by ensuring companies adhere to minimum standards as defined by the ten principles of the United Nations Global Compact, which cover anti-corruption (Principle 10) and labour rights (Principles 3-6) and well as environmental governance (Principles 7-9).

5. Actions relating to engagement

Engagement was made on behalf of the Fund with investee companies on environmental, social and governance issues in line with their investment and due diligence process. Throughout the 12 month period, from 01/07/2024 to 30/06/2025, the investment team engaged with 22 companies relating to ESG and sustainability concerns or opportunities.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: GAM Star Credit Opportunities (GBP) (the "Fund" or "Financial Product")

Legal entity identifier: 549300DRHJ355WDGEG06

Environmental and/or social characteristics

Did this financial product have a sustainable	investment objective?
Yes	No X No
in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
It made sustainable investments with a social objective:%	with a social objective It promoted E/S characteristics, but did not make any sustainable investments

All data presented in the annex which follows has been calculated based on the portfolio holdings of the Fund as at 30 June 2025 and constitutes unaudited information which has not been subject to any assurance provided by the Auditors or any third party.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and social characteristics:

- 21) Exclusion of companies involved in specific activities considered to cause negative environmental and/or social impact, as described in the Sustainability Exclusion Criteria detailed in the Fund Prospectus (the "Prospectus").,
- 22) Assessed adherence to generally accepted international norms and standards set by the United Nations Global Compact (UNGC),
- 23) Consideration of Principal Adverse Impacts ("PAIs") on sustainability factors as detailed in Table 1 of Annex I of the Commission Delegated Regulation (EU) 2022/ 1288 (the "SFDR Delegated Act"),
- 24) Investments in companies assessed to follow good governance practices, and
- 25) Engagement with investee companies on environmental, social and governance issues as described in the Prospectus.

The environmental and social characteristics were promoted in line with the binding elements of the investment strategy of the Fund, as outlined in the Prospectus. There were no breaches of the exclusion criteria.

No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities.

That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The following sustainability indicators are used to measure the environmental and/or social characteristics of the Fund.

24) Indicators relating to Sustainability Exclusion Criteria

Involvement in the following activities, beyond the revenue threshold specified, result in the investment being ineligible (other than where outlined in the GAM Sustainability Exclusions Policy). No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source ¹⁰	Date ⁵¹	Data coverage	Data estimated ⁵³	Output ⁵⁴
Involvement in controversial weapons: share of investments in investee companies involved in the manufacture or selling of controversial weapons.	% of Fund	MSCI	30 June 2025	100%	0%	0%
Involvement in weapons manufacturing or weapons component manufacturing: share of investments in investee companies involved in the manufacture of military weapons systems, and/or tailor-made components of these weapons systems, and/or tailor-made products or services that support military weapons systems	% of Fund	Sustainalytics	30 June 2025	100%	0%	0%

⁵¹ Data snapshot taken at the Fund's year end. Sustainalytics and MSCI data as at 30 June 2025.

⁵² Calculated as the proportion of investments (by NAV) for which data is available. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. Where there is less than 100% coverage, this would be due to the third party provider not covering the issuer. We engage with service providers and companies directly with the objective of increasing data coverage and disclosure. More information about MSCI's coverage can be found here. More information about Sustainalytics coverage can be found here.

⁵³ Calculated as the proportion of investments (by NAV) for which data is estimated. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. MSCI data methodology can be found here. Information on Sustainalytics product involvement can be found here.

⁵⁴ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus.

¹⁰Whilst only one data source is listed, we may use further data providers to support our analysis. Please refer to our Sustainability Exclusion Policy for further details.

(above 10%						
revenue threshold).						
Involvement in assault weapons for civilian customers: share of investments in investee companies involved in the manufacture and sale of assault weapons to civilian customers (above 10% revenue threshold).	% of Fund	Sustainalytics	30 June 2025	100%	0%	0%

25) Indicators relating to international norms and standards

Investee companies are expected to adhere to minimum international norms and standards as defined by the UN Global Compact (as defined in the Prospectus). Investee companies assessed as having seriously breached the UN Global Compact are excluded, unless the issuer is considered to have taken substantial and adequate steps to have addressed the allegations.

No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁵⁵
Violations of UN Global Compact principles (also related to Principal Adverse Impacts): share of investments in investee companies that have been involved in violations of the UNGC principles.	% of Fund	MSCI	30 June 2025	100%	0%	0%

26) Indicators relating to Principal Adverse Impacts

The Investment Manager applied an internal framework to consider and, where considered appropriate, take action to mitigate principal adverse impacts on sustainability factors.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁵⁶
Scope 1 & Scope 2 Greenhouse gas (GHG) emissions: Absolute greenhouse gas emissions associated with a portfolio, expressed in tons CO2 equivalent	tons CO2 equiv alent	MSCI	30 June 2025	97.19%	0%	255.92

⁵⁵ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. We use MSCI data to determine adherence to the UN Global Compact. For this data point, we are specifically looking at whether a company is deemed to 'Fail' adhering to the underlying principles. More information on MSCI's approach can be found https://example.com/here/.

⁵⁶ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus.

female. For companies with a two-tier board, the calculation is based on members of the Supervisory Board only.				
---	--	--	--	--

27) Indicators relating to good governance

The investment strategy incorporates a principles-based approach when assessing good governance. The assessment informs investment decisions and is used by the Investment Manager to satisfy itself that good governance practices are in place when selecting investments for the Fund. In addition, the assessment is conducted on an ongoing basis to inform voting decisions and engagement activity.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁵⁷
Board independence: the percentage of board members that meet GAM's criteria for independent management, as measured by a third-party data provider. For companies with a two-tier board, the calculation is based on members of the Supervisory Board only.	Weighted average %	MSCI	30 June 2025	86.16%	0%	83.16%

28) Indicators relating to engagement activities

The investment strategy includes engagement activities with investee companies on environmental, social and governance issues as part of interactions with management, including engagements following sustainability controversies, PAI review and/or thematic engagement.

Sustainability Indicator	Units	Data sourc e	Date	Data coverage	Data estimated	Output ⁵⁸

⁵⁷ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus.

⁵⁸This output is the total number of companies that the Investment Team engaged with that were held in the portfolio as at 30 June 2025. The Investment Team may have engaged with companies i) on more than one occasion, ii) for pre-investment due diligence, iii) throughout the reporting period which were sold prior to the 30 June 2025 and therefore will not be reflected here. There could also be cases when companies within the portfolio were engaged with by other investments teams that are part of GAM Holding AG where there is a cross-holding, these are also not reflected in this output.

¹¹GAM's definition of engagement can be found in our Engagement Policy on our website.

·					

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

— Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

In accordance with the provisions of the Prospectus, the Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

The actions taken in relation to the PAI indicators considered are summarised in the table below:

Indicators applicable to investments in investee companies

The table above provides a snapshot of the largest investments as at 30 June 2025. This snapshot is reflective of the general portfolio composition throughout the reporting period.

The Global Industry Classification Standard is used to determine economic sectors.

What was the proportion of sustainability-related investments?

N/A. Information on the proportion of the Fund which promoted environmental/social characteristics during the reference period is provided below.

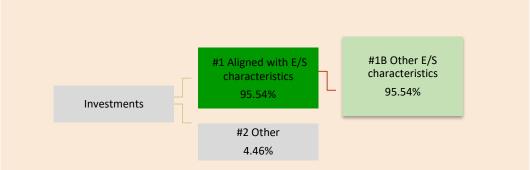

as pu

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- expenditure
 (CapEx) showing the green investments made by investee companies, , e.g. relevant for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

What was the asset allocation?

All assets excluding cash/cash equivalent instruments and/or certain derivatives are aligned with environmental/social characteristics of the Fund. As at 30 June 2025 (snapshot at year-end), 95.54% of the Fund attained the environmental and social characteristics promoted by the Fund, while 4.46% was in assets categorised as #2 Other in accordance with the Prospectus. Further details in relation to such assets is set out in the section entitled "What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?" below.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Allocation
Financials	95.54%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund promotes environmental and social characteristics within the meaning of Article 8 of the SFDR, it does not currently commit to investing in a minimum level of "sustainable investments" within the meaning of the SFDR and it does not currently commit to a minimum level of investments taking into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. As such, any investments that contribute to environmentally sustainable economic activities for the purposes of the Taxonomy Regulation, including investments in

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional** activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

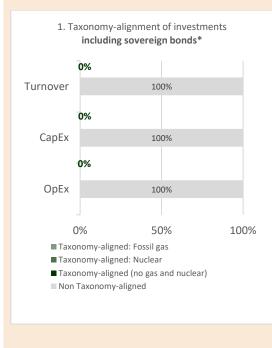

fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, are held on an incidental basis and is currently estimated to be <10% based on available data.

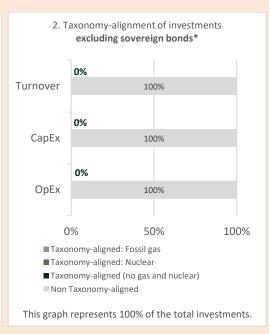

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy⁵⁹?

Yes

The paphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomyalignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

⁵⁹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Other" investments of the Fund included [cash / cash equivalents and / or certain derivatives] for liquidity and efficient management of the Fund. An assessment of minimum environmental and social safeguards is deemed not to be relevant for cash and cash equivalents by nature of the asset class, nor derivatives where full look through is not possible.

1. Actions relating to Sustainability Exclusion Criteria

The Sustainability Exclusion Criteria were assessed, on a best-efforts basis, as part of investment controlling, using Sustainalytics. There were no breaches of the Sustainability Exclusion Criteria during the reporting period

2. Actions relating to international norms and standards

UN Global Compact compliance was assessed, on a best-efforts basis, as part of investment controlling. The Investment Manager used third-party data providers' frameworks and data to categorise serious breaches, which were intended to identify credible allegations of a violation of global norms, supplemented by internal research where third-party data coverage was unavailable. There were no breaches of the UN Global Compact compliance during the period.

3. Actions relating to Principal Adverse Impacts on sustainability factors

The Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

Greenhouse gas emissions and involvement in fossil fuel sector – a range of indicators in relation to company GHG emissions and carbon emission reduction initiatives (including Scope 1 & Scope 2 GHG emissions among others) were reviewed as part of the investment process, and were primarily addressed in a qualitative way, for example through engagement with selected companies on reduction targets and initiatives or voting on resolutions to support greater transparency on climate-related risks. Companies assessed to derive over 25% of revenue from thermal coal mining or electricity generation from thermal coal were excluded from the Fund.

Biodiversity, water & waste – indicators in relation to a company's impact on biodiversity, including deforestation, water and waste, were reviewed as part of the investment process and were primarily addressed in a qualitative way, for example through engagement with selected companies

Social and employee matters – a range of PAI indicators were reviewed as part of the investment process. Companies assessed as severely violating UN Global Compact principles or assessed as having exposure to controversial weapons are excluded from the Fund. Board gender diversity was considered primarily within engagement and voting decisions.

4. Actions relating to good governance

The investment Manager incorporated a principles-based approach when assessing good governance. The assessment informed investment decisions and was used by the Investment Manager to satisfy itself

that good governance practices were in place when selecting investments for the Fund. In addition, the assessment was conducted on an ongoing basis to inform voting decisions and engagement activity. This included consideration of board structure and independence, alignment of remuneration, transparency of ownership and control, audit and accounting. Good governance was assessed in a qualitative and/or quantitative way dependent on the relevance of the specific indicator. This included:

- Sound management structures including Board independence, Board diversity and audit committee independence
- Employee relations in particular any serious breaches of UN Global Compact principles are excluded
- · Remuneration of staff
- Tax compliance in particular any companies flagged for significant tax violations

In addition, good governance was supported by ensuring companies adhere to minimum standards as defined by the ten principles of the United Nations Global Compact, which cover anti-corruption (Principle 10) and labour rights (Principles 3-6) and well as environmental governance (Principles 7-9).

5. Actions relating to engagement

Engagement was made on behalf of the Fund with investee companies on environmental, social and governance issues in line with their investment and due diligence process. Throughout the 12 month period, from 01/07/2024 to 30/06/2025, the investment team engaged with 20 companies relating to ESG and sustainability concerns or opportunities.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

- How did this financial product perform compared with the reference benchmark?

 Not applicable.
- How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: GAM Star Credit Opportunities (USD) (the "Fund" or "Financial Product")

Legal entity identifier: 5493004R2B7PEULBN196

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes It made sustainable investments with It promoted Environmental/Social (E/S) characteristics and an environmental objective: % while it did not have as its objective a sustainable investment, it had a proportion of 0% of sustainable in economic activities that investments qualify as environmentally sustainable under the EU with an environmental objective in economic Taxonomy activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally with an environmental objective in economic sustainable under the EU activities that do not qualify as Taxonomy environmentally sustainable under the EU Taxonomy with a social objective It promoted E/S characteristics, but did not make any It made sustainable investments with sustainable investments a social objective: %

All data presented in the annex which follows has been calculated based on the portfolio holdings of the Fund as at 30 June 2025 and constitutes unaudited information which has not been subject to any assurance provided by the Auditors or any third party.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and social characteristics:

- 26) Exclusion of companies involved in specific activities considered to cause negative environmental and/or social impact, as described in the Sustainability Exclusion Criteria detailed in the Fund Prospectus (the "Prospectus").,
- 27) Assessed adherence to generally accepted international norms and standards set by the United Nations Global Compact (UNGC).
- 28) Consideration of Principal Adverse Impacts ("PAIs") on sustainability factors as detailed in Table 1 of Annex I of the Commission Delegated Regulation (EU) 2022/ 1288 (the "SFDR Delegated Act"),
- 29) Investments in companies assessed to follow good governance practices, and
- 30) Engagement with investee companies on environmental, social and governance issues as described in the Prospectus.

The environmental and social characteristics were promoted in line with the binding elements of the investment strategy of the Fund, as outlined in the Prospectus. There were no breaches of the exclusion criteria.

No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation

does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The following sustainability indicators are used to measure the environmental and/or social characteristics of the Fund.

29) Indicators relating to Sustainability Exclusion Criteria

Involvement in the following activities, beyond the revenue threshold specified, result in the investment being ineligible (other than where outlined in the GAM Sustainability Exclusions Policy). No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source ¹⁰	Date ⁶⁰	Data coverage 61	Data estimated ⁶²	Output ⁶³

30) Indicators relating to international norms and standards

Investee companies are expected to adhere to minimum international norms and standards as defined by the UN Global Compact (as defined in the Prospectus). Investee companies assessed as having seriously breached the UN Global Compact are excluded, unless the issuer is considered to have taken substantial and adequate steps to have addressed the allegations.

No exceptions were made during the reporting period.

⁶⁷This output is the total number of companies that the Investment Team engaged with that were held in the portfolio as at 30 June 2025. The Investment Team may have engaged with companies i) on more than one occasion, ii) for pre-investment due diligence, iii) throughout the reporting period which were sold prior to the 30 June 2025 and therefore will not be reflected here. There could also be cases when companies within the portfolio were engaged with by other investments teams that are part of GAM Holding AG where there is a cross-holding, these are also not reflected in this output.

^{*}GAM's definition of engagement can be found in our Engagement Policy on our website.

Engagement Activity	100%	23	100%	19

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

— How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

— Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

In accordance with the provisions of the Prospectus, the Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

The actions taken in relation to the PAI indicators considered are summarised in the table below:

Indicators applicable to investments in investee companies

Adverse sust	ainability indicator	Fund consideration
Greenhouse gas emissions	1. GHG emissions 2. Carbon footprint 3. GHG Intensity of investee companies 4. Exposure to companies active in the fossil fuel sector 5. Share of non-renewable energy consumption and production 6. Energy consumption intensity per high impact climate sector	A range of indicators in relation to company GHG emissions and carbon emission reduction initiatives (including Scope 1 & Scope 2 GHG emissions among others) were reviewed as part of the investment process, and were primarily addressed in a qualitative way, for example through engagement with selected investee companies on reduction targets and initiatives or voting on resolutions to support greater transparency on climate-related risks. Investeee companies assessed to derive over 25% of revenue from thermal coal mining or electricity generation from thermal coal were excluded from the Fund.
Biodiversity	7. Activities negatively affecting biodiversity-sensitive areas	Indicators in relation to an investee company's impact on biodiversity, including deforestation,
Water	8. Emissions to water	water and waste, were reviewed as part of the
Waste	9. Hazardous waste and radioactive waste ratio	investment process and were primarily

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

		addressed in a qualitative way, for example through engagement with selected companies.
Social and employee matters	10. Violations of UNGC principles and OECD Guidelines for Multinational Enterprises 11. Lack of processes and compliance mechanisms to monitor compliance with UNGC priniples and OECD Guidelines for Multinational Enterprises 12. Unadjusted gender pay gap 13. Board gender diversity 14. Exposure to controversial weapons (anti- personnel mines, cluster munitions, chemical weapons and biological weapons)	A range of PAI indicators were reviewed as part of the investment process. Investee companies assessed as severely violating UN Global Compact principles or assessed as having exposure to controversial weapons are excluded from the Fund. Board gender diversity was considered primarily within engagement and voting decisions.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 30 June 2025

The table above provides a snapshot of the largest investments as at 30 June 2025. This snapshot is reflective of the general portfolio composition throughout the reporting period.

The Global Industry Classification Standard is used to determine economic sectors.

Asset allocation describes the share of investments in

specific assets.

Taxonomy-aligned activities are expressed as a share of:

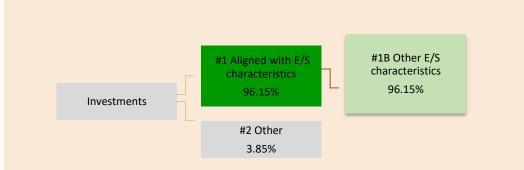

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, , e.g.
 relevant for a
 transition to a
 green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

What was the proportion of sustainability-related investments?

N/A. Information on the proportion of the Fund which promoted environmental/social characteristics during the reference period is provided below.

What was the asset allocation?

All assets excluding cash/cash equivalent instruments and/or certain derivatives are aligned with environmental/social characteristics of the Fund. As at 30 June 2025 (snapshot at year-end), 96.15% of the Fund attained the environmental and social characteristics promoted by the Fund, while 3.85% was in assets categorised as #2 Other in accordance with the Prospectus. Further details in relation to such assets is set out in the section entitled "What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?" below.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Allocation
Financials	96.15%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund promotes environmental and social characteristics within the meaning of Article 8 of the SFDR, it does not currently commit to investing in a minimum level of "sustainable investments" within the meaning of the SFDR and it does not currently commit to a minimum level of investments taking into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. As such, any investments that contribute to environmentally sustainable economic activities for the purposes of the Taxonomy Regulation, including investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, are held on an incidental basis and is currently estimated to be <10% based on available data.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional** activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

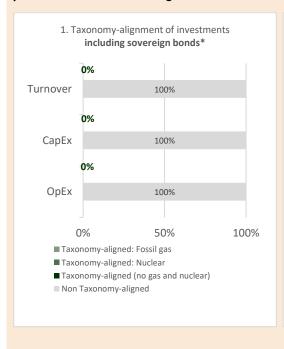

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy⁶⁸?

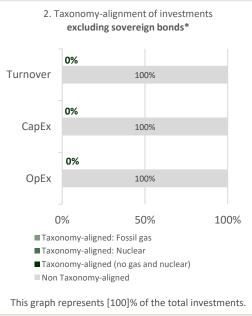

Yes

In fossil gas

In nuclear energy

The s. aphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomyalignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

⁶⁸ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Other" invvestments of the Fund included [cash / cash equivalents and / or certain derivatives] for liquidity and efficient management of the Fund. An assessment of minimum environmental and social safeguards is deemed not to be relevant for cash and cash equivalents by nature of the asset class, nor derivatives where full look through is not possible.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

1. Actions relating to Sustainability Exclusion Criteria

The Sustainability Exclusion Criteria were assessed, on a best-efforts basis, as part of investment controlling, using Sustainalytics. There were no breaches of the Sustainability Exclusion Criteria during the reporting period

2. Actions relating to international norms and standards

UN Global Compact compliance was assessed, on a best-efforts basis, as part of investment controlling. The Investment Manager used third-party data providers' frameworks and data to categorise serious breaches, which were intended to identify credible allegations of a violation of global norms, supplemented by internal research where third-party data coverage was unavailable. There were no breaches of the UN Global Compact compliance during the period.

3. Actions relating to Principal Adverse Impacts on sustainability factors

The Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

Greenhouse gas emissions and involvement in fossil fuel sector – a range of indicators in relation to company GHG emissions and carbon emission reduction initiatives (including Scope 1 & Scope 2 GHG emissions among others) were reviewed as part of the investment process, and were primarily addressed in a qualitative way, for example through engagement with selected companies on reduction targets and initiatives or voting on resolutions to support greater transparency on climate-related risks. Companies assessed to derive over 25% of revenue from thermal coal mining or electricity generation from thermal coal were excluded from the Fund.

Biodiversity, water & waste – indicators in relation to a company's impact on biodiversity, including deforestation, water and waste, were reviewed as part of the investment process and were primarily addressed in a qualitative way, for example through engagement with selected companies

Social and employee matters – a range of PAI indicators were reviewed as part of the investment process. Companies assessed as severely violating UN Global Compact principles or assessed as having exposure to controversial weapons are excluded from the Fund. Board gender diversity was considered primarily within engagement and voting decisions.

4. Actions relating to good governance

The investment Manager incorporated a principles-based approach when assessing good governance. The assessment informed investment decisions and was used by the Investment Manager to satisfy itself that good governance practices were in place when selecting investments for the Fund. In addition, the assessment was conducted on an ongoing basis to inform voting decisions and engagement activity. This included consideration of board structure and independence, alignment of remuneration, transparency of ownership and control, audit and accounting. Good governance was assessed in a qualitative and/or quantitative way dependent on the relevance of the specific indicator. This included:

- Sound management structures including Board independence, Board diversity and audit committee independence
- Employee relations in particular any serious breaches of UN Global Compact principles are excluded
- · Remuneration of staff
- Tax compliance in particular any companies flagged for significant tax violations

In addition, good governance was supported by ensuring companies adhere to minimum standards as defined by the ten principles of the United Nations Global Compact, which cover anti-corruption (Principle 10) and labour rights (Principles 3-6) and well as environmental governance (Principles 7-9).

5. Actions relating to engagement

Engagement was made on behalf of the Fund with investee companies on environmental, social and governance issues in line with their investment and due diligence process. Throughout the 12 month period, from 01/07/2024 to 30/06/2025, the investment team engaged with 19 companies relating to ESG and sustainability concerns or opportunities.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

Mow did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: GAM Star Disruptive Growth (the "Fund" or "Financial Product")

Legal entity identifier: 54930013EICUYP4RZ214

Environmental and/or social characteristics

Did this financial product have a sustainable	investment objective?
Yes	● No
in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
It made sustainable investments with a social objective:%	with a social objective It promoted E/S characteristics, but did not make any sustainable investments

All data presented in the annex which follows has been calculated based on the portfolio holdings of the Fund as at 30 June 2025 and constitutes unaudited information which has not been subject to any assurance provided by the Auditors or any third party.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and social characteristics:

- 31) Exclusion of companies involved in specific activities considered to cause negative environmental and/or social impact, as described in the Sustainability Exclusion Criteria detailed in the Fund Prospectus (the "Prospectus").,
- 32) Assessed adherence to generally accepted international norms and standards set by the United Nations Global Compact (UNGC),
- 33) Consideration of Principal Adverse Impacts ("PAIs") on sustainability factors as detailed in Table 1 of Annex I of the Commission Delegated Regulation (EU) 2022/ 1288 (the "SFDR Delegated Act"),
- 34) Investments in companies assessed to follow good governance practices, and
- 35) Engagement with investee companies on environmental, social and governance issues as described in the Prospectus.

The environmental and social characteristics were promoted in line with the binding elements of the investment strategy of the Fund, as outlined in the Prospectus. There were no breaches of the exclusion criteria.

No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation

That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The following sustainability indicators are used to measure the environmental and/or social characteristics of the Fund.

34) Indicators relating to Sustainability Exclusion Criteria

Involvement in the following activities, beyond the revenue threshold specified, result in the investment being ineligible (other than where outlined in the GAM Sustainability Exclusions Policy). No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source ¹⁰	Date ⁶⁹	Data coverage	Data estimated ⁷¹	Output ⁷²

therefore will not be reflected here. There could also be cases when companies within the portfolio were engaged with by other investments teams that are part of GAM Holding AG where there is a cross-holding, these are also not reflected in this output.

 $^{^{\}rm 11}\text{GAM}\xspace$ definition of engagement can be found in our Engagement Policy on our website.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

— How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

In accordance with the provisions of the Prospectus, the Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

The actions taken in relation to the PAI indicators considered are summarised in the table below:

Indicators applicable to investments in investee companies Adverse sustainability indicator Fund consideration

Adverse susta	ainability indicator	Fund consideration
	1. GHG emissions	A range of indicators in relation to company GHG
	2. Carbon footprint	emissions and carbon emission reduction
	3. GHG Intensity of investee	initiatives (including Scope 1 & Scope 2 GHG
	companies	emissions among others) were reviewed as part
	4. Exposure to companies active	of the investment process, and were primarily
	in the fossil fuel sector	addressed in a qualitative way, for example
Greenhouse	5. Share of non-renewable	through engagement with selected investee
gas .	energy consumption and	companies on reduction targets and initiatives or
emissions	production	voting on resolutions to support greater
	6. Energy consumption intensity per high impact climate sector	transparency on climate-related risks. Investee companies assessed to derive over 25% of revenue from thermal coal mining or electricity generation from thermal coal were excluded from the Fund.
Biodiversity	7. Activities negatively affecting	Indicators in relation to an investee company's
	biodiversity-sensitive areas	impact on biodiversity, including deforestation,
Water	8. Emissions to water	water and waste, were reviewed as part of the

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Waste	Hazardous waste and radioactive waste ratio	investment process and were primarily addressed in a qualitative way, for example through engagement with selected companies.
Social and employee matters	10. Violations of UNGC principles and OECD Guidelines for Multinational Enterprises 11. Lack of processes and compliance mechanisms to monitor compliance with UNGC priniples and OECD Guidelines for Multinational Enterprises 12. Unadjusted gender pay gap 13. Board gender diversity 14. Exposure to controversial weapons (anti- personnel mines, cluster munitions, chemical weapons and biological weapons)	A range of PAI indicators were reviewed as part of the investment process. Investee companies assessed as severely violating UN Global Compact principles or assessed as having exposure to controversial weapons are excluded from the Fund. Board gender diversity was considered primarily within engagement and voting decisions.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 30 June 2025

What were the top investments of this financial product?

Largest Investments	Sector	% Assets	Country
Microsoft Corp	Software	9.74	United States
NVIDIA Corp	Semiconductors	8.33	United States
Alphabet, Inc	Internet	5.18	United States
Broadcom, Inc	Semiconductors	4.78	United States
Sony Group Corp	Home Furnishings	4.16	Japan
Visa, Inc	Diversified Financial Services	3.61	United States
Amazon.com, Inc	Internet	3.57	United States
ASM International NV	Semiconductors	3.45	Netherlands
Lam Research Corp	Semiconductors	3.08	United States
BYD Co. Ltd	Auto Manufacturers	2.91	China
Applied Materials, Inc	Semiconductors	2.76	United States
Apple, Inc	Computers	2.67	United States

The table above provides a snapshot of the largest investments as at 30 June 2025. This snapshot is reflective of the general portfolio composition throughout the reporting period.

The Global Industry Classification Standard is used to determine economic sectors.

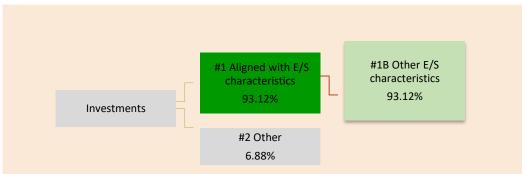

What was the proportion of sustainability-related investments?

Not applicable. Information on the proportion of the Fund which promoted environmental/social characteristics during the reference period is provided below.

What was the asset allocation?

All assets excluding cash/cash equivalent instruments and/or certain derivatives are aligned with environmental/social characteristics of the Fund. As at 30 June 2025 (snapshot at year-end), 93.12% of the Fund attained the environmental and social characteristics promoted by the Fund, while 6.88% was in assets categorised as #2 Other in accordance with the Prospectus. Further details in relation to such assets is set out in the section entitled "What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?" below.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Allocation
Information Technology	46.34 %
Consumer Discretionary	14.78 %
Communication Services	12.86 %
Industrials	7.84 %
Health Care	6.32 %
Financials	3.61 %
Consumer Staples	1.37 %

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund promotes environmental and social characteristics within the meaning of Article 8 of the SFDR, it does not currently commit to investing in a minimum level of "sustainable investments" within the meaning of the SFDR and it does not currently commit to a minimum level of investments taking into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. As such, any investments that contribute to environmentally sustainable economic activities for the purposes of the Taxonomy Regulation, including investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, are held on an incidental basis and is currently estimated to be <10% based on available data.

Asset allocation describes the share of investments in specific assets.

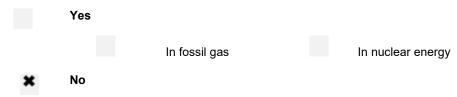

Taxonomy-aligned activities are expressed as a share of:

- reflecting the share of revenue from green activities of investee companies.
- expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, , e.g.
 relevant for a
 transition to a
 green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

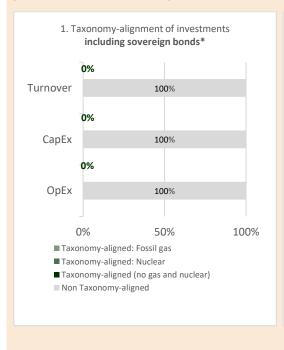

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional** activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

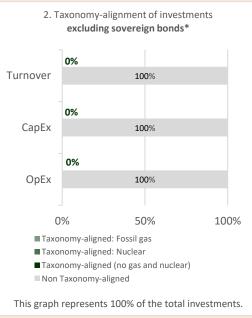

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy⁷⁷?

The graphs below show in green the percentage of investments that were aligned with the EU T^xonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

⁷⁷ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Other" investments of the Fund included [cash / cash equivalents and / or certain derivatives] for liquidity and efficient management of the Fund. An assessment of minimum environmental and social safeguards is deemed not to be relevant for cash and cash equivalents by nature of the asset class, nor derivatives where full look through is not possible.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

1. Actions relating to Sustainability Exclusion Criteria

The Sustainability Exclusion Criteria were assessed, on a best-efforts basis, as part of investment controlling, using Sustainalytics. There were no breaches of the Sustainability Exclusion Criteria during the reporting period

2. Actions relating to international norms and standards

UN Global Compact compliance was assessed, on a best-efforts basis, as part of investment controlling. The Investment Manager used third-party data providers' frameworks and data to categorise serious breaches, which were intended to identify credible allegations of a violation of global norms, supplemented by internal research where third-party data coverage was unavailable. There were no breaches of the UN Global Compact compliance during the period.

3. Actions relating to Principal Adverse Impacts on sustainability factors

The Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

Greenhouse gas emissions and involvement in fossil fuel sector – a range of indicators in relation to company GHG emissions and carbon emission reduction initiatives (including Scope 1 & Scope 2 GHG emissions among others) were reviewed as part of the investment process, and were primarily addressed in a qualitative way, for example through engagement with selected companies on reduction targets and initiatives or voting on resolutions to support greater transparency on climate-related risks. Companies assessed to derive over 25% of revenue from thermal coal mining or electricity generation from thermal coal were excluded from the Fund.

Biodiversity, water & waste – indicators in relation to a company's impact on biodiversity, including deforestation, water and waste, were reviewed as part of the investment process and were primarily addressed in a qualitative way, for example through engagement with selected companies

Social and employee matters – a range of PAI indicators were reviewed as part of the investment process. Companies assessed as severely violating UN Global Compact principles or assessed as having exposure to controversial weapons are excluded from the Fund. Board gender diversity was considered primarily within engagement and voting decisions.

4. Actions relating to good governance

The investment Manager incorporated a principles-based approach when assessing good governance. The assessment informed investment decisions and was used by the Investment Manager to satisfy itself that good governance practices were in place when selecting investments for the Fund. In addition, the assessment was conducted on an ongoing basis to inform voting decisions and engagement activity. This included consideration of board structure and independence, alignment of remuneration, transparency of ownership and control, audit and accounting. Good governance was assessed in a qualitative and/or quantitative way dependent on the relevance of the specific indicator. This included:

- Sound management structures including Board independence, Board diversity and audit committee independence
- Employee relations in particular any serious breaches of UN Global Compact principles are excluded
- Remuneration of staff
- Tax compliance in particular any companies flagged for significant tax violations

In addition, good governance was supported by ensuring companies adhere to minimum standards as defined by the ten principles of the United Nations Global Compact, which cover anti-corruption (Principle 10) and labour rights (Principles 3-6) and well as environmental governance (Principles 7-9).

5. Actions relating to engagement

Engagement was made on behalf of the Fund with investee companies on environmental, social and governance issues in line with their investment and due diligence process. Throughout the 12 month period, from 01/07/2024 to 30/06/2025, the investment team engaged with 5 companies relating to ESG and sustainability concerns or opportunities.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: GAM Star European Equity (the "Fund" or "Financial Product")

Legal entity identifier: 549300TME4JJDOP4H631

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes It made sustainable investments with It promoted Environmental/Social (E/S) characteristics and an environmental objective: ____% while it did not have as its objective a sustainable investment, it had a proportion of 0% of sustainable in economic activities that investments qualify as environmentally sustainable under the EU with an environmental objective in economic Taxonomy activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally with an environmental objective in economic sustainable under the EU activities that do not qualify as Taxonomy environmentally sustainable under the EU Taxonomy with a social objective It promoted E/S characteristics, but did not make any It made sustainable investments with sustainable investments a social objective: ____%

All data presented in the annex which follows has been calculated based on the portfolio holdings of the Fund as at 30 June 2025 and constitutes unaudited information which has not been subject to any assurance provided by the Auditors or any third party.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and social characteristics:

- 1) Exclusion of companies involved in specific activities considered to cause negative environmental and/or social impact, as described in the Sustainability Exclusion Criteria detailed in the Fund Prospectus (the "Prospectus").,
- 2) Assessed adherence to generally accepted international norms and standards set by the United Nations Global Compact (UNGC),
- Consideration of Principal Adverse Impacts ("PAIs") on sustainability factors as detailed in Table 1 of Annex I of the Commission Delegated Regulation (EU) 2022/ 1288 (the "SFDR Delegated Act"),
- 4) Investments in companies assessed to follow good governance practices, and
- 5) Engagement with investee companies on environmental, social and governance issues as described in the Prospectus.

The environmental and social characteristics were promoted in line with the binding elements of the investment strategy of the Fund, as outlined in the Prospectus. There were no breaches of the exclusion criteria.

No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

Sustainable **investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a

list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The following sustainability indicators are used to measure the environmental and/or social characteristics of the Fund.

1) Indicators relating to Sustainability Exclusion Criteria

Involvement in the following activities, beyond the revenue threshold specified, result in the investment being ineligible (other than where outlined in the GAM Sustainability Exclusions Policy). No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source ¹⁰	Date ¹	Data coverage ²	Data estimated ³	Output ⁴
Involvement in controversial weapons: share of investments in investee companies involved in the manufacture or selling of controversial weapons.	% of Fund	MSCI	30 June 2025	100%	0%	0%
Involvement in weapons manufacturing or weapons component manufacturing: share of investments in investee companies involved in the manufacture of military weapons systems, and/or tailor-made components of these weapons systems, and/or tailor-made products or services that support military weapons systems	% of Fund	Sustainalytics	30 June 2025	100%	0%	0%

¹ Data snapshot taken at the Fund's year end. Sustainalytics and MSCI data as at 30 June 2025.

² Calculated as the proportion of investments (by NAV) for which data is available. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. Where there is less than 100% coverage, this would be due to the third party provider not covering the issuer. We engage with service providers and companies directly with the objective of increasing data coverage and disclosure. More information about MSCI's coverage can be found here.

³ Calculated as the proportion of investments (by NAV) for which data is estimated. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. MSCI data methodology can be found here. Information on Sustainalytics product involvement can be found <a href=here.

⁴ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus.

¹⁰Whilst only one data source is listed, we may use further data providers to support our analysis. Please refer to our <u>Sustainability Exclusion Policy</u> for further details.

(above 10%						
revenue threshold).						
Involvement in assault weapons for civilian customers: share of investments in investee companies involved in the manufacture and sale of assault weapons to civilian customers (above 10% revenue threshold).	% of Fund	Sustainalytics	30 June 2025	100%	0%	0%
Involvement in tobacco manufacturing: share of investments in investee companies involved in the manufacture of tobacco products (above 5% revenue threshold).	% of Fund	Sustainalytics	30 June 2025	100%	0%	0%
Involvement in tobacco retail and distribution: share of investments in investee companies involved in the distribution and/or retail sale of tobacco products (above 25% revenue threshold).	% of Fund	Sustainalytics	30 June 2025	100%	0%	0%
Involvement in oil sands extraction: share of investments in companies involved in oil sands extraction (above 25% revenue threshold).	% of Fund	Sustainalytics	30 June 2025	100%	0%	0%
Involvement in thermal coal: Share of investments in companies involved in mining thermal coal or from generating electricity from thermal coal (above 25% revenue threshold).	% of Fund	Sustainalytics	30 June 2025	100%	0%	0%

2) Indicators relating to international norms and standards

Investee companies are expected to adhere to minimum international norms and standards as defined by the UN Global Compact (as defined in the Prospectus). Investee companies assessed as having seriously breached the UN Global Compact are excluded, unless the issuer is considered to have taken substantial and adequate steps to have addressed the allegations.

No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁵
Violations of UN Global Compact principles (also related to Principal Adverse Impacts): share of investments in investee companies that have been involved in violations of the UNGC principles.	% of Fund	MSCI	30 June 2025	100%	0%	0%

3) Indicators relating to Principal Adverse Impacts

The Investment Manager applied an internal framework to consider and, where considered appropriate, take action to mitigate principal adverse impacts on sustainability factors.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁶
Scope 1 & Scope 2 Greenhouse gas (GHG) emissions: Absolute greenhouse gas emissions associated with a portfolio, expressed in tons CO2 equivalent	tons CO2 equiv alent	MSCI	30 June 2025	100%	0%	18,512.4
Investments in companies active in fossil fuel sector: share of investments in companies active in the fossil fuel sector.	% of Fund	MSCI	30 June 2025	100%	0%	7.52%
Gender diversity on the Board (also related to good	Weig hted	MSCI	30 June 2025	100%	0%	43.93%

⁵ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. We use MSCI data to determine adherence to the UN Global Compact. For this data point, we are specifically looking at whether a company is deemed to 'Fail' adhering to the underlying principles. More information on MSCI's approach can be found https://example.com/here/.

⁶ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus.

governance): percentage of board members who are female. For companies with a two-tier board, the calculation is based on members of the Supervisory Board only.	avera ge %		
--	---------------	--	--

4) Indicators relating to good governance

The investment strategy incorporates a principles-based approach when assessing good governance. The assessment informs investment decisions and is used by the Investment Manager to satisfy itself that good governance practices are in place when selecting investments for the Fund. In addition, the assessment is conducted on an ongoing basis to inform voting decisions and engagement activity.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁷
Board independence: the percentage of board members that meet GAM's criteria for independent management, as measured by a third-party data provider. For companies with a two-tier board, the calculation is based on members of the Supervisory Board only.	Weig hted avera ge %	MSCI	30 June 2025	100%	0%	85.26%

5) Indicators relating to engagement activities

The investment strategy includes engagement activities with investee companies on environmental, social and governance issues as part of interactions with management, including engagements following sustainability controversies, PAI review and/or thematic engagement.

Sustainability Indicator	Units	Dat a	Date	Data cover	Data estimated	Output ⁸
		sou		age		
		rce				

⁷ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus.

⁸This output is the total number of companies that the Investment Team engaged with that were held in the portfolio as at 30 June 2025. The Investment Team may have engaged with companies i) on more than one occasion, ii) for pre-investment due diligence, iii) throughout the reporting period which were sold prior to the 30 June 2025 and therefore will not be reflected here. There could also be cases when companies within the portfolio were engaged with by other investments teams that are part of GAM Holding AG where there is a cross-holding, these are also not reflected in this output.

¹¹GAM's definition of engagement can be found in our Engagement Policy on our website.

Engagement activity: Number of ESG-related engagement activities the Investment Manager was involved in as part of regular interactions with management, such as engagements following sustainability controversies and thematic engagement relating to the Fund ¹¹ . What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

In accordance with the provisions of the Prospectus, the Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

The actions taken in relation to the PAI indicators considered are summarised in the table below:

Indicators applicable to investments in investee companies

The table above provides a snapshot of the largest investments as at 30 June 2025. This snapshot is reflective of the general portfolio composition throughout the reporting period.

The Global Industry Classification Standard is used to determine economic sectors.

What was the proportion of sustainability-related investments?

N/A. Information on the proportion of the Fund which promoted environmental/social characteristics during the reference period is provided below.

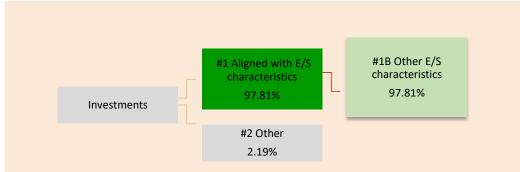

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, , e.g.
 relevant for a
 transition to a
 green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

What was the asset allocation?

All assets excluding cash/cash equivalent instruments and/or certain derivatives are aligned with environmental/social characteristics of the Fund. As at 30 June 2025 (snapshot at year-end), 97.81% of the Fund attained the environmental and social characteristics promoted by the Fund, while 2.19% was in assets categorised as #2 Other in accordance with the Prospectus. Further details in relation to such assets is set out in the section entitled "What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?" below.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Allocation
Industrials	24.13 %
Financials	19.00 %
Health Care	12.22 %
Information Technology	11.81 %
Consumer Discretionary	7.04 %
Communication Services	6.56 %
Energy	5.64 %
Consumer Staples	5.47 %
Materials	4.23 %
Utilities	1.72 %

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

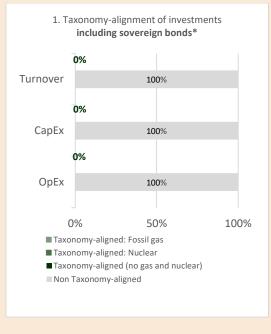

While the Fund promotes environmental and social characteristics within the meaning of Article 8 of the SFDR, it does not currently commit to investing in a minimum level of "sustainable investments" within the meaning of the SFDR and it does not currently commit to a minimum level of investments taking into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. As such, any investments that contribute to environmentally sustainable economic activities for the purposes of the Taxonomy Regulation, including investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, are held on an incidental basis and is currently estimated to be <10% based on available data.

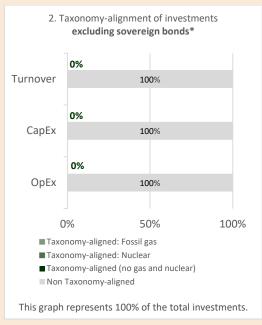

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional** activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy⁹?

Yes

In fossil gas

In nuclear energy

No

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

⁹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Other" invvestments of the Fund included [cash / cash equivalents and / or certain derivatives] for liquidity and efficient management of the Fund. An assessment of minimum environmental and social safeguards is deemed not to be relevant for cash and cash equivalents by nature of the asset class, nor derivatives where full look through is not possible.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

1. Actions relating to Sustainability Exclusion Criteria

The Sustainability Exclusion Criteria were assessed, on a best-efforts basis, as part of investment controlling, using Sustainalytics. There were no breaches of the Sustainability Exclusion Criteria during the reporting period

2. Actions relating to international norms and standards

UN Global Compact compliance was assessed, on a best-efforts basis, as part of investment controlling. The Investment Manager used third-party data providers' frameworks and data to categorise serious breaches, which were intended to identify credible allegations of a violation of global norms, supplemented by internal research where third-party data coverage was unavailable. There were no breaches of the UN Global Compact compliance during the period.

3. Actions relating to Principal Adverse Impacts on sustainability factors

The Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

Greenhouse gas emissions and involvement in fossil fuel sector – a range of indicators in relation to company GHG emissions and carbon emission reduction initiatives (including Scope 1 & Scope 2 GHG emissions among others) were reviewed as part of the investment process, and were primarily addressed in a qualitative way, for example through engagement with selected companies on reduction targets and initiatives or voting on resolutions to support greater transparency on climate-related risks. Companies assessed to derive over 25% of revenue from thermal coal mining or electricity generation from thermal coal were excluded from the Fund.

Biodiversity, water & waste – indicators in relation to a company's impact on biodiversity, including deforestation, water and waste, were reviewed as part of the investment process and were primarily addressed in a qualitative way, for example through engagement with selected companies

Social and employee matters – a range of PAI indicators were reviewed as part of the investment process. Companies assessed as severely violating UN Global Compact principles or assessed as having exposure to controversial weapons are excluded from the Fund. Board gender diversity was considered primarily within engagement and voting decisions.

4. Actions relating to good governance

The investment Manager incorporated a principles-based approach when assessing good governance. The assessment informed investment decisions and was used by the Investment Manager to satisfy itself that good governance practices were in place when selecting investments for the Fund. In addition, the assessment was conducted on an ongoing basis to inform voting decisions and engagement activity. This included consideration of board structure and independence, alignment of remuneration, transparency of ownership and control, audit and accounting. Good governance was assessed in a qualitative and/or quantitative way dependent on the relevance of the specific indicator.

This included:

- Sound management structures including Board independence, Board diversity and audit committee independence
- Employee relations in particular any serious breaches of UN Global Compact principles are excluded
- Remuneration of staff
- Tax compliance in particular any companies flagged for significant tax violations

In addition, good governance was supported by ensuring companies adhere to minimum standards as defined by the ten principles of the United Nations Global Compact, which cover anti-corruption (Principle 10) and labour rights (Principles 3-6) and well as environmental governance (Principles 7-9).

5. Actions relating to engagement

Engagement was made on behalf of the Fund with investee companies on environmental, social and governance issues in line with their investment and due diligence process. Throughout the 12 month period, from 01/07/2024 to 30/06/2025, the investment team engaged with 8 companies relating to ESG and sustainability concerns or opportunities.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: GAM Star Global Rates (the "Fund") Legal entity identifier: ZVIMWIFXTC2J79D70175

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities.

That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did th	is financial product have a sustainable	investment objective?
••	Yes	● No
	It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective
	t made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments

All data presented in the annex which follows has been calculated based on the portfolio holdings of the Fund as at 30 June 2025 and constitutes unaudited information which has not been subject to any assurance provided by the Auditors or any third party.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

- 1) Environmental characteristics a minimum threshold as measured by the Yale Environmental Performance Index (EPI) which assesses factors, including:
 - Climate change (relating to mitigation efforts);
 - Environmental health (including waste management; heavy metals; sanitation and drinking water; air quality);
 - Ecosystem vitality (biodiversity and habitat; ecosystem services; fisheries; acid rain; agriculture; water resources).

More information on the Yale Environmental Performance Index (EPI) can be found on https://epi.yale.edu/

- 2) Social characteristics a minimum threshold as measured by the Freedom House Global Freedom Score, which assesses factors including:
 - Political rights (including electoral process; political pluralism and participation; functioning of government);
 - civil liberties (including freedom of expression and belief; associational and organisational rights; rule of law; personal autonomy and individual rights).

More information on the Freedom House Global Freedom Score can be found on https://freedomhouse.org/

- 3) Social characteristics a minimum threshold as measured by the Social Progress Index, which assess factors including:
 - Health (including nutrition and basic medical care; water and sanitation; shelter; and personal safety);
 - Foundations of wellbeing (including access to basic knowledge; access to information & communications; health & wellness; and environmental quality);
 - Opportunity (including personal rights; personal freedom & choice; inclusiveness; access to advanced education).

More information on the Social Progress Index can be found on https://www.socialprogress.org/

4) Governance – a minimum threshold as measured by the Financial Action Task Force, which assesses adherence to internationally recognized and approved standards to counter money laundering and terrorist financing at a country level.

More information on the Financial Action Task Force can be found on fatf-gafi.org

5) Consideration of Principal Adverse Impacts on sustainability factors relevant to sovereigns and supranationals from selected indicators outlined in Table 1 of Annex I of the Commission Delegated Regulation (EU) 2022/ 1288 (the "SFDR Delegated Act").

The environmental and social characteristics were promoted in line with the binding elements of the Investment Strategy of the Fund, as outlined in the Fund's Prospectus, and there were no breaches of the exclusion criteria or significant adverse impacts during the year.

No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How did the sustainability indicators perform?

The following sustainability indicators are used to measure the environmental and/or social characteristics of the Fund.

44) Indicators relating to the Exclusion Criteria

The Exclusion Criteria were programmed, on a best-efforts basis, into the investment controls, using information from independent ESG rating providers, NGO sources and recognised third party sources. There were no breaches of the Exclusion Criteria during the year. No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source	Date ⁸⁷	Data coverage 88	Data estimated ⁸⁹	Output ⁹⁰
Performance Index >= 35: Proportion of investments from countries with an	% of Fund	Yale Environmental Performance Index (EPI)	30 June 2025	100%	0%	100%

⁸⁷ Data snapshot taken at the Fund's year end. Sustainalytics and MSCI data as at 17th July 2025.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

⁸⁸ Calculated as the proportion of investments (by NAV) for which data is available. The calculation does not include assets defined under "#2 Other" in the Prospectus. Where there is less than 100% coverage, this would be due to the third party provider not covering the issuer. We engage with service providers and companies directly with the objective of increasing data coverage and disclosure. More information about MSCI's coverage can be found here. More information about Sustainalytics coverage can be found here.

⁸⁹ Calculated as the proportion of investments (by NAV) for which data is estimated. The calculation does not include assets defined under "#2 Other" in the Prospectus. MSCI data methodology can be found here. Information on Sustainalytics product involvement can be found here.

⁹⁰ The calculation does not include assets defined under "#2 Other" in the Prospectus. Calculations are performed based on net positive exposure to each sovereign, by combining fixed income and global currency exposures on a re-weighted basis to 100% of the portfolio meaning that net negative currency and sovereign fixed income exposure is not reflected in the data reported. Global currencies are mapped to the relevant sovereign (e.g. BRL currency exposure is mapped to the Brazil sovereign)

Environmental Performance Index >= 35						
Global Freedom Score (Total Score & Status) >= 10: Proportion of investments from countries with a Global Freedom Score (Total Score & Status) >= 10	% of Fund	Freedom House Global Freedom Score	30 June 2025	100%	0%	100%
Social Progress Index Tier < Tier 6: Proportion of investments from countries with a Social Progress Index Tier < Tier 6	% of Fund	Social Progress Index	30 June 2025	100%	0%	100%
Non-FATF compliance: countries that are FATF compliant	% of Fund	Financial Action Task Force	30 June 2025	100%	0%	100%
FATF Watch List: countries on the FATF Watch List	% of Fund	Financial Action Task Force	30 June 2025	100%	0%	0%

45) Indicators relating to Principal Adverse Impacts

The Fund takes into account principal adverse impacts (PAIs), as detailed in Table 1, and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, on sustainability factors in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data. The Fund's performance against the following PAI indicators are reported quantitatively.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output
GHG Intensity: weighted average GHG intensity of investee countries	t/EUR millio n	MSCI	30 June 2025	60.83%	0%	165.03
Investee countries subject to social violations: Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law.	% of Fund	MSCI	30 June 2025	60.83%	0%	0

Average political stability score: assessment of the stability and peace in a region looking at political stability and the absence of violence / terrorism and the global peace index. Scores range between 0 and 10. Lower scores indicates high political instability, violence and conflict.	Nume ric value (scor e)	MSCI	30 June 2025	100%	0%	7.56
Average corruption score: a measure of the degree to which public sector corruption is perceived to exist in different countries around the world. Scores range between 0 and 100. Countries with lower score are perceived to be more corrupt.	Nume ric value (scor e)	MSCI	30 June 2025	60.83%	0%	81.06

...and compared to previous periods?

Average corruption score	83.91%	76.83	60.83%	81.06

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

— How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

——Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Not applicable

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered the principal adverse impacts (PAIs), as detailed in Table 1 and 3 of Annex 1 of the SFDR Delegated Act, on sustainability factors in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

An assessment of the PAI indciators was conducted quarterly between the Investment Team and Governance and Responsible Investment team within GAM. The indicators are assessed against a set of internally developed thresholds, constructed to flag where investments may be involved in material adverse impacts and prioritise appropriate action.

The actions taken in relation to the PAI indicators considered are summarised in the table below:

Adverse sustainability indicator		Actions				
		Table 1				
Environmental	15. GHG Intensity	A range of indicators in relation to country-level GHG emissions and GHG intensity are embedded into the EPI Index (including projected GHG emissions in 2050; CO2 Growth Rate; CH4 Growth Rate; CO2 from Land Cover; GHG Intensity Trend; F-Gas Growth Rate; Black Carbon Growth Rate; GHG Emissions per Capita; and N2O Growth Rate). These indicators contribute to the EPI score for each country which is used in the selection of eligible countries for the Financial Product. In addition, investments were monitored against a set of internally developed thresholds constructed to flag excessive GHG Intensity levels. No investments were flagged during the year.				
Social	16. Investee countries subject to social violations	A range of issues in relation to potential social violations are embedded in the Freedom House Global Freedom Score (including safeguards against corruption; protection of civil liberties; equity of opportunity; freedom from economic exploitation; rule of law). In addition, investments were monitored against a set of internally developed thresholds constructed to flag material				

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-

corruption and anti-

bribery matters.

		instances of countries subject to social violations. No investments were flagged during the year. Table 3
Governance	21. Average corruption score	Corruption is integrated within the Freedom House Global Freedom Score. Sovereign issuers that receive a "Not Free" score on the Freedom House Global Freedom Score are not eligible for investment. Supranational institutions, such as the World Bank, the United Nations, a regional development bank or another body with robust and transparent sustainability safeguards are considered based on the issuing entity. In addition, investments were monitored against a set of internally developed thresholds constructed to flag instances where a country's corruption score is deemed to be excessively low.
Governance	23. Average political stability score	Political stability is integrated with the Freedom House Global Freedom Score. Sovereign issuers that receive a "Not Free" score on the Freedom House Global Freedom Score are not eligible for investment. Supranational institutions, such as the World Bank, the United Nations, a regional development bank or another body with robust and transparent sustainability safeguards are considered based on the issuing entity. In addition, investments were monitored against a set of internally developed thresholds constructed to flag instances where a country's political score is deemed to be excessively low.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 30 June 2025

What were the top investments of this financial product?

Largest Investments	Sector	% Assets	Country
NOK - Norwegian Krone		51.09%	Norway
EUR - Euro		39.17%	European Union
NZD – New Zealand Dollar		9.26%	New Zealand
BRL – Brazilian Real		0.29%	Brazil
CAD – Canadian Dollar		0.19%	Canada

The table above provides a snapshot of the largest investments as at 30 June 2025. This snapshot is reflective of the general portfolio composition throughout the reporting period.

The largest investments are calculated on the basis of reweighted net positive currency exposure.

What was the proportion of sustainability-related investments?

N/A. Information on the proportion of the Fund which promoted environmental/social characteristics during the reference period is provided below.

What was the asset allocation?

All assets are aligned with the environmental and social characteristics of the Fund since all investments, including cash and currency allocations, are subject to country-level binding elements of the investment strategy to promote environmental and social characteristics. During the period, investments aligned with E/S characteristics remained at 100% as all investments, including cash, are aligned with these characteristics.

Taxonomy-aligned activities are expressed as a share of:

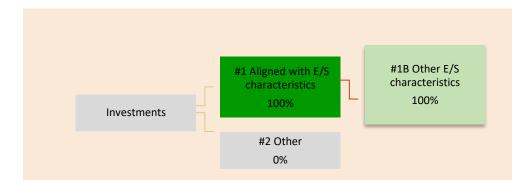

Asset allocation describes the

investments in

specific assets.

share of

- reflecting the share of revenue from green activities of investee companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, , e.g.
 relevant for a
 transition to a
 green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

- **#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or
 - In which economic sectors were the investments made?

Sector	Allocation
Sovereign	100%

The Fund invested in government bonds, cash, interest rate swaps, interest rates options, interest rate futures, and forward foreign exchange contracts during the year. We disclosure asset type rather than sector as this is most relevant to the Fund.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund promotes environmental and social characteristics within the meaning of Article 8 of the SFDR, it does not currently commit to investing in a minimum level of "sustainable investments" within the meaning of the SFDR and it does not currently commit to a minimum level of investments taking into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. As such, any investments that contribute to environmentally sustainable economic activities for the purposes of the Taxonomy Regulation, including investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, are held on an incidental basis and is currently estimated to be <10% based on available data.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional** activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy⁹¹?

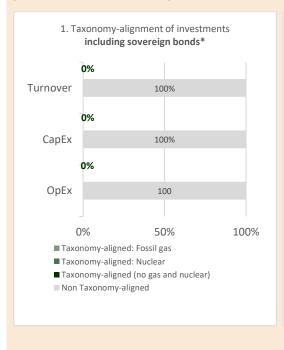

Yes

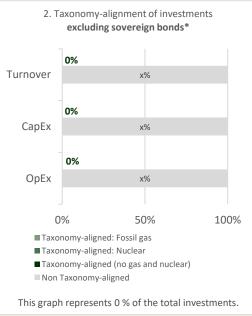

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomyalignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

⁹¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Not applicable.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

1) Actions relating to the Exclusion Criteria

The Exclusion Criteria are programmed, on a best-efforts basis, into the investment controls, using information from independent ESG rating providers, NGO sources and recognised third party sources. These data sources and outputs are reviewed and/or updated at least quarterly. There were no breaches of the Exclusion Criteria during the year.

2) Indicators relating to Principal Adverse Impacts

The indicators are assessed quarterly against a set of internally developed thresholds, constructed to flag where investments may be involved in material adverse impacts and prioritise appropriate action.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How does the reference benchmark differ from a broad market index?

Not applicable.

chai

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: GAM Star Japan Leaders (the "Fund" or "Financial Product")

Legal entity identifier: 549300WSXYGYCMCU1B08

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes It made sustainable investments with It promoted Environmental/Social (E/S) characteristics and an environmental objective: % while it did not have as its objective a sustainable investment, it had a proportion of 0% of sustainable in economic activities that investments qualify as environmentally sustainable under the EU with an environmental objective in economic Taxonomy activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally with an environmental objective in economic sustainable under the EU activities that do not qualify as Taxonomy environmentally sustainable under the EU Taxonomy with a social objective It made sustainable investments with It promoted E/S characteristics, but did not make any sustainable investments a social objective: %

All data presented in the annex which follows has been calculated based on the portfolio holdings of the Fund as at 30 June 2025 and constitutes unaudited information which has not been subject to any assurance provided by the Auditors or any third party.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and social characteristics:

- 41) Exclusion of companies involved in specific activities considered to cause negative environmental and/or social impact, as described in the Sustainability Exclusion Criteria detailed in the Fund Prospectus (the "Prospectus").,
- 42) Assessed adherence to generally accepted international norms and standards set by the United Nations Global Compact (UNGC),
- 43) Consideration of Principal Adverse Impacts ("PAIs") on sustainability factors as detailed in Table 1 of Annex I of the Commission Delegated Regulation (EU) 2022/ 1288 (the "SFDR Delegated Act"),
- 44) Investments in companies assessed to follow good governance practices, and
- 45) Engagement with investee companies on environmental, social and governance issues as described in the Prospectus.

The environmental and social characteristics were promoted in line with the binding elements of the investment strategy of the Fund, as outlined in the Prospectus. There were no breaches of the exclusion criteria.

No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a

sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

list of socially

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The following sustainability indicators are used to measure the environmental and/or social characteristics of the Fund.

46) Indicators relating to Sustainability Exclusion Criteria

Involvement in the following activities, beyond the revenue threshold specified, result in the investment being ineligible (other than where outlined in the GAM Sustainability Exclusions Policy). No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source ¹⁰	Date ⁹²	Data coverage	Data estimated ⁹⁴	Output ⁹⁵
Involvement in controversial weapons: share of investments in investee companies involved in the manufacture or selling of controversial weapons.	% of Fund	MSCI	30 June 2025	100%	0%	0%
Involvement in weapons manufacturing or weapons component manufacturing: share of investments in investee companies involved in the manufacture of military weapons systems, and/or tailor-made components of these weapons systems, and/or tailor-made products or services that support military	% of Fund	Sustainalytics	30 June 2025	100%	0%	0%

⁹² Data snapshot taken at the Fund's year end. Sustainalytics and MSCI data as at 30 June 2025.

⁹³ Calculated as the proportion of investments (by NAV) for which data is available. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. Where there is less than 100% coverage, this would be due to the third party provider not covering the issuer. We engage with service providers and companies directly with the objective of increasing data coverage and disclosure. More information about MSCI's coverage can be found here.
More information about Sustainalytics coverage can be found here.

⁹⁴ Calculated as the proportion of investments (by NAV) for which data is estimated. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. MSCI data methodology can be found here. Information on Sustainalytics product involvement can be found <a href=here.

⁹⁵ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus.

¹⁰Whilst only one data source is listed, we may use further data providers to support our analysis. Please refer to our Sustainability Exclusion Policy for further details.

(above 10%						
revenue threshold).						
Involvement in assault weapons for civilian customers: share of investments in investee companies involved in the manufacture and sale of assault weapons to civilian customers (above 10% revenue threshold).	% of Fund	Sustainalytics	30 June 2025	100%	0%	0%
Involvement in tobacco manufacturing: share of investments in investee companies involved in the manufacture of tobacco products (above 5% revenue threshold).	% of Fund	Sustainalytics	30 June 2025	100%	0%	0%
Involvement in tobacco retail and distribution: share of investments in investee companies involved in the distribution and/or retail sale of tobacco products (above 25% revenue threshold).	% of Fund	Sustainalytics	30 June 2025	100%	0%	0%
Involvement in oil sands extraction: share of investments in companies involved in oil sands extraction (above 25% revenue threshold).	% of Fund	Sustainalytics	30 June 2025	100%	0%	0%

47) Indicators relating to international norms and standards

Investee companies are expected to adhere to minimum international norms and standards as defined by the UN Global Compact (as defined in the Prospectus). Investee companies assessed as having seriously breached the UN Global Compact are excluded, unless the issuer is considered to have taken substantial and adequate steps to have addressed the allegations.

No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁹⁶
Violations of UN Global Compact principles (also related to Principal Adverse Impacts): share of investments in investee companies that have been involved in violations of the UNGC principles.	% of Fund	MSCI	30 June 2025	100%	0%	0%

48) Indicators relating to Principal Adverse Impacts

The Investment Manager applied an internal framework to consider and, where considered appropriate, take action to mitigate principal adverse impacts on sustainability factors.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁹⁷
Greenhouse gas (GHG) emissions: Absolute greenhouse gas emissions associated with a portfolio, expressed in tons CO2 equivalent	tons CO2 equiv alent	MSCI	30 June 2025	95.95%	0%	455.34
Investments in companies active in fossil fuel sector: share of investments in companies active in the fossil fuel sector.	% of Fund	MSCI	30 June 2025	100%	0%	0%

⁹⁶ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. We use MSCI data to determine adherence to the UN Global Compact. For this data point, we are specifically looking at whether a company is deemed to 'Fail' adhering to the underlying principles. More information on MSCI's approach can be found here.

⁹⁷ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus.

Gender diversity on the Board (also related to good governance): percentage of board members who are female. For companies with a two-tier board, the calculation is based on members of the Supervisory Board only.	Weig hted avera ge %	MSCI	30 June 2025	100%	0%	24.73%
--	-------------------------------	------	--------------------	------	----	--------

49) Indicators relating to good governance

The investment strategy incorporates a principles-based approach when assessing good governance. The assessment informs investment decisions and is used by the Investment Manager to satisfy itself that good governance practices are in place when selecting investments for the Fund. In addition, the assessment is conducted on an ongoing basis to inform voting decisions and engagement activity.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁹⁸
Board independence: the percentage of board members that meet GAM's criteria for independent management, as measured by a third-party data provider. For companies with a two-tier board, the calculation is based on members of the Supervisory Board only.	Weig hted avera ge %	MSCI	30 June 2025	100%	0%	47.54%

50) Indicators relating to engagement activities

The investment strategy includes engagement activities with investee companies on environmental, social and governance issues as part of interactions with management, including engagements following sustainability controversies, PAI review and/or thematic engagement.

⁹⁸ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus.

Sustainability Indicator	Units	Data sourc e	Date	Data cover age	Data estimated	Output ⁹⁹

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

— How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

— Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

In accordance with the provisions of the Prospectus, the Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

The actions taken in relation to the PAI indicators considered are summarised in the table below:

Indicators applicable to investments in investee companies

Adverse sus	tainability indicator	Fund consideration
	1. GHG emissions	A range of indicators in relation to company GHG
	2. Carbon footprint	emissions and carbon emission reduction
	3. GHG Intensity of investee	initiatives (including Scope 1 & Scope 2 GHG
Greenhouse	companies	emissions among others) were reviewed as part
gas	4. Exposure to companies active	of the investment process, and were primarily
emissions	in the fossil fuel sector	addressed in a qualitative way, for example
	5. Share of non-renewable	through engagement with selected investee
	energy consumption and	companies on reduction targets and initiatives or
	production	voting on resolutions to support greater

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

	Energy consumption intensity per high impact climate sector	transparency on climate-related risks. Investeee companies assessed to derive over 25% of revenue from thermal coal mining or electricity generation from thermal coal were excluded from the Fund.			
Biodiversity	7. Activities negatively affecting biodiversity-sensitive areas	Indicators in relation to an investee company's impact on biodiversity, including deforestation,			
Water	8. Emissions to water	water and waste, were reviewed as part of the			
Waste	Hazardous waste and radioactive waste ratio	investment process and were primarily addressed in a qualitative way, for example through engagement with selected companies.			
Social and employee matters	10. Violations of UNGC principles and OECD Guidelines for Multinational Enterprises 11. Lack of processes and compliance mechanisms to monitor compliance with UNGC priniples and OECD Guidelines for Multinational Enterprises 12. Unadjusted gender pay gap 13. Board gender diversity 14. Exposure to controversial weapons (anti- personnel mines, cluster munitions, chemical weapons and biological weapons)	A range of PAI indicators were reviewed as part of the investment process. Investee companies assessed as severely violating UN Global Compact principles or assessed as having exposure to controversial weapons are excluded from the Fund. Board gender diversity was considered primarily within engagement and voting decisions.			

What were the top investments of this financial product?

The list includes the
investments
constituting the
greatest proportion
of investments of
the financial product
during the reference
period which is: 30
June 2025

Largest Investments	Sector	% Assets	Country
Disco Corp	Semiconductors	4.44	Japan
Tokyo Electron Ltd	Semiconductors	4.25	Japan
Nintendo Co. Ltd	Toys/Games/Hobbies	4.24	Japan
Recruit Holdings Co. Ltd	Commercial Services	4.10	Japan
Shin-Etsu Chemical Co. Ltd	Chemicals	4.04	Japan
ORIX Corp	Diversified Financial Services	4.02	Japan
Daikin Industries Ltd	Building Materials	4.00	Japan
GMO Payment Gateway, Inc	Commercial Services	3.96	Japan
Obic Co. Ltd	Computers	3.94	Japan
Makita Corp	Hand/Machine Tools	3.93	Japan
FANUC Corp	Machinery-Diversified	3.90	Japan
Keyence Corp	Machinery-Diversified	3.88	Japan
Shimano, Inc	Leisure Time	3.88	Japan

The table above provides a snapshot of the largest investments as at 30 June 2025. This snapshot is reflective of the general portfolio composition throughout the reporting period.

The Global Industry Classification Standard is used to determine economic sectors.

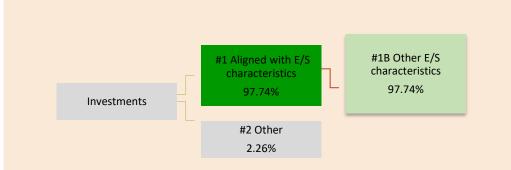

What was the proportion of sustainability-related investments?

N/A. Information on the proportion of the Fund which promoted environmental/social characteristics during the reference period is provided below.

What was the asset allocation?

All assets excluding cash/cash equivalent instruments and/or certain derivatives are aligned with environmental/social characteristics of the Fund. As at 30 June 2025 (snapshot at year-end), 97.74% of the Fund attained the environmental and social characteristics promoted by the Fund, while 2.26% was in assets categorised as #2 Other in accordance with the Prospectus. Further details in relation to such assets is set out in the section entitled "What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?" below.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Allocation
Industrials	23.37 %
Information Technology	20.21 %
Financials	15.67 %
Consumer Discretionary	11.54 %
Health Care	11.48 %
Consumer Staples	7.18 %
Communication Services	4.24 %
Materials	4.05 %

Asset allocation describes the share of investments in

specific assets.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- expenditure
 (CapEx) showing the green investments made by investee companies, , e.g. relevant for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional** activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

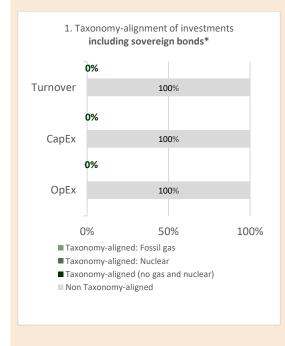

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

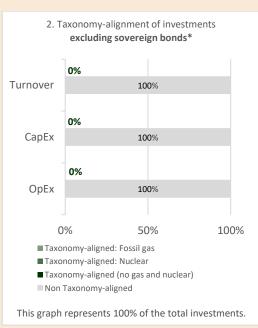

While the Fund promotes environmental and social characteristics within the meaning of Article 8 of the SFDR, it does not currently commit to investing in a minimum level of "sustainable investments" within the meaning of the SFDR and it does not currently commit to a minimum level of investments taking into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. As such, any investments that contribute to environmentally sustainable economic activities for the purposes of the Taxonomy Regulation, including investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, are held on an incidental basis and is currently estimated to be <10% based on available data.

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy¹⁰⁰?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹⁰⁰ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Other" invvestments of the Fund included [cash / cash equivalents and / or certain derivatives] for liquidity and efficient management of the Fund. An assessment of minimum environmental and social safeguards is deemed not to be relevant for cash and cash equivalents by nature of the asset class, nor derivatives where full look through is not possible.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

1. Actions relating to Sustainability Exclusion Criteria

The Sustainability Exclusion Criteria were assessed, on a best-efforts basis, as part of investment controlling, using Sustainalytics. There were no breaches of the Sustainability Exclusion Criteria during the reporting period

2. Actions relating to international norms and standards

UN Global Compact compliance was assessed, on a best-efforts basis, as part of investment controlling. The Investment Manager used third-party data providers' frameworks and data to categorise serious breaches, which were intended to identify credible allegations of a violation of global norms, supplemented by internal research where third-party data coverage was unavailable. There were no breaches of the UN Global Compact compliance during the period.

3. Actions relating to Principal Adverse Impacts on sustainability factors

The Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

Greenhouse gas emissions and involvement in fossil fuel sector – a range of indicators in relation to company GHG emissions and carbon emission reduction initiatives (including Scope 1 & Scope 2 GHG emissions among others) were reviewed as part of the investment process, and were primarily addressed in a qualitative way, for example through engagement with selected companies on reduction targets and initiatives or voting on resolutions to support greater transparency on climate-related risks. Companies assessed to derive over 25% of revenue from thermal coal mining or electricity generation from thermal coal were excluded from the Fund.

Biodiversity, water & waste – indicators in relation to a company's impact on biodiversity, including deforestation, water and waste, were reviewed as part of the investment process and were primarily addressed in a qualitative way, for example through engagement with selected companies

Social and employee matters – a range of PAI indicators were reviewed as part of the investment process. Companies assessed as severely violating UN Global Compact principles or assessed as

having exposure to controversial weapons are excluded from the Fund. Board gender diversity was considered primarily within engagement and voting decisions.

4. Actions relating to good governance

The investment Manager incorporated a principles-based approach when assessing good governance. The assessment informed investment decisions and was used by the Investment Manager to satisfy itself that good governance practices were in place when selecting investments for the Fund. In addition, the assessment was conducted on an ongoing basis to inform voting decisions and engagement activity. This included consideration of board structure and independence, alignment of remuneration, transparency of ownership and control, audit and accounting. Good governance was assessed in a qualitative and/or quantitative way dependent on the relevance of the specific indicator. This included:

- Sound management structures including Board independence, Board diversity and audit committee independence
- Employee relations in particular any serious breaches of UN Global Compact principles are excluded
- Remuneration of staff
- Tax compliance in particular any companies flagged for significant tax violations

In addition, good governance was supported by ensuring companies adhere to minimum standards as defined by the ten principles of the United Nations Global Compact, which cover anti-corruption (Principle 10) and labour rights (Principles 3-6) and well as environmental governance (Principles 7-9).

5. Actions relating to engagement

Engagement was made on behalf of the Fund with investee companies on environmental, social and governance issues in line with their investment and due diligence process. Throughout the 12 month period, from 01/07/2024 to 30/06/2025, the investment team engaged with 11 companies relating to ESG and sustainability concerns or opportunities.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: GAM Star MBS Total Return (the "Fund") Legal entity identifier: 549300E84U4YLAZL9Y55

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable

economic activities.

investments with an

objective might be

Sustainable

environmental

aligned with the

Taxonomy or not.

Did th	is financial product have a sustainable	investment objective?
••	Yes	No No
	It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	t made sustainable investments with a social objective:%	with a social objective It promoted E/S characteristics, but did not make any sustainable investments

All data presented in the annex which follows has been calculated based on the portfolio holdings of the Fund as at 30 June 2025 and constitutes unaudited information which has not been subject to any assurance provided by the Auditors or any third party.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Given the unique structure of these securities, and absence of a prescribed asset class specific approach to such securities within the SFDR framework, this Fund promotes environmental and social characteristics at the issuer level and/or at the level of the parent company of the issuer (hereinafter referred to collectively as "Issuer"), rather than at the level of the underlying assets.

The Fund promoted the following environmental and social characteristics at the issuer level:

- Exclusion of securities from Issuers that are assessed as R(ed) as part of the internal MBS Sustainability Due Diligence framework as detailed in the GAM Star Fund Plc Prospectus (the "Prospectus"). This framework incorporates an assessment of sustainability issues (including corruption, bribery, money laundering, executive compensation issues, fraud, tax evasion, anticompetitive practices, violation of international standards, predatory lending, among others),
- 2) Exclusion of securities from Issuers involved in specific activities considered to cause negative environmental and social impact, and
- 3) Assessed adherence to generally accepted international norms and standards, as set by the United Nations Global Compact ("UNGC").

The environmental and social characteristics were promoted in line with the binding elements of the Investment Strategy of the Fund, as outlined in the the Prospectus, and there were no breaches of the exclusion criteria or significant adverse impacts during the year.

No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How did the sustainability indicators perform?

The following sustainability indicators are used to measure the environmental and/or social characteristics of the Fund.

51) Indicators relating to the MBS Sustainability Due Diligence

The internal MBS Sustainability Due Diligence is an internal assessment applied at the Issuer level and uses a flagging approach to assess entities flagged in very severe risk incidents relating to sustainability issues that are considered most relevant to the MBS/ABS asset class. The due diligence process uses third-party ESG data (RepRisk), and internal qualitative analysis and is applied to all securities in the Fund. This framework incorporates an assessment of 'very severe risk incidents' for material sustainability issues (including corruption, bribery, money laundering, executive compensation issues, fraud, tax evasion, anti-competitive practices, violation of international standards, and predatory lending, among others).

R(ed) Issuers are associated with severe incidents related to the sustainability issues outlined in the Prospectus and where insufficient actions have been taken to address the issue. These issuers may have also been involved in breaches of the Sustainability Exclusions Criteria and/or the UN Global Compact and insufficient actions have been taken to address these issues.

A(mber) issuers are associated with very severe incidents related to the sustainability issues outlined in the Prospectus, but material actions have been taken to address the issue. These issuers may also have been involved in a serious breach of the UN Global Compact but material actions have been taken to address the issue.

G(reen) issuers have not been flagged for 'very severe' sustainability risk incidents related to sustainability issues outlined in the Prospectus, involvement in the ineligible activities under the Sustainability Exclusion Criteria or serious breaches of the United Nations Global Compact.

The proportion of the fund invested in securities issued by R(ed) or A(mber) issuers is shown in the following table.

Sustainability Indicator	Units	Data source ¹⁰¹	Date ¹⁰²	Data coverage	Data estimated ¹⁰⁴	Output 105
MBS Sustainability Due Diligence assessment: share of investments issued by entities that have been classified R(ed) in the MBS Sustainability Due Diligence.	%	MBS Sustainability Due Diligence RepRisk, MSCI	30 June 2025	86 %	0 %	0 %

¹⁰¹ The data is mapped from issuance level to issuer level and/or at the issuer parent company level using Bloomberg formulas or direct MSCI mapping.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

¹⁰² Data snapshot taken at the Fund's year end. RepRisk and MSCI data as at 30 June 2025.

¹⁰³ Calculated as the proportion of investments (by NAV) for which data is available. The calculation does not include assets defined under "#2 Other" in the Prospectus.

¹⁰⁴ Calculated as the proportion of investments (by NAV) for which data is estimated. The calculation does not include assets defined under "#2 Other" in the Prospectus.

¹⁰⁵ Calculated as the proportion of investment (by NAV). The calculation does not include assets defined under "#2 Other" in the Prospectus.

MBS Sustainability Due Diligence assessment: share of investments issued by entities that have been classified A(mber) in the MBS Sustainability Due Diligence.	%	MBS Sustainability Due Diligence RepRisk, MSCI	30 June 2025	86 %	0 %	0 %
---	---	--	--------------------	------	-----	-----

52) Indicators relating to Sustainability Exclusion Criteria

Involvement by the sponsor in the following activities, beyond the revenue threshold specified, result in the investment being ineligible (other than where outlined in the Sustainability Exclusion Criteria within the Prospectus). No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output
Involvement in controversial weapons: share of investments in issuers involved in the manufacture or selling of controversial weapons.	%	MBS Sustainability Due Diligence RepRisk, MSCI	30 June 2025	85 %	0 %	0 %
Involvement in tobacco production: share of investments in issuers involved in tobacco production (above 5% revenue threshold).	%	MBS Sustainability Due Diligence RepRisk, MSCI	30 June 2025	85 %	0 %	0 %
Involvement in oil sands extraction: share of investments in issuers involved in oil sands extraction (above 25% revenue threshold).	%	MBS Sustainability Due Diligence RepRisk, MSCI	30 June 2025	85 %	0 %	0 %
Involvement in thermal coal: Share of investments in companies involved in mining thermal coal or from generating electricity from thermal coal (above 25% revenue threshold).	%	MBS Sustainability Due Diligence RepRisk, MSCI	30 June 2025	85 %	0 %	0 %

"Not Free" Sovereign issuers: share of investments in sovereign issuances from countries which have been assessed as "Not Free" by the Freedom House Global Freedom Score	%	N/A	30 June 2025	100%	0 %	0 %
---	---	-----	--------------------	------	-----	-----

53) Indicators relating to international norms and standards

Issuers are expected to adhere to minimum international norms and standards as defined by the UN Global Compact. Issuers assessed as having seriously breached the UN Global Compact are excluded, unless the issuer is considered to have taken substantial and adequate steps to have addressed the allegations. This assessment is conducted at the issuer level and reported as % of the Fund's investment issued by entities failing the criteria.

No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output
Violations of UN Global Compact principles (also related to Principal Adverse Impacts): share of investments issued by entities that have been involved in violations of the UNGC principles.	%	MBS Sustainability Due Diligence RepRisk, MSCI	30 June 2025	85 %	0 %	0 %

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

- How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

The actions taken in relation to the PAI indicators considered are summarised in the table below:

Non sovereign Issuers

Advers	e sustainability indicator	Fund Considerations					
	Tab	le 1					
Social & Employee Matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Issuers with any violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises were excluded from investment.					
	14. Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons, and biological weapons)	Issuers with exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons, and biological weapons) were excluded from investment					
	Table 3						
Social and	7. Incidents of discrimination	Considered if Issuer's actions in this area leads to a UNGC violation.					

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and anti-

bribery matters.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 30 June 2024

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, , e.g.
 relevant for a
 transition to a
 green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

The table above provides a snapshot of the largest investments as at 30 June 2024. This snapshot is reflective of the general portfolio composition throughout the reporting period.

What was the proportion of sustainability-related investments?

Not applicable. Information on the proportion of the Fund which promoted environmental/social characteristics during the reference period is provided below.

The Co-Investment Manager targets a minimum of 70% (or above) of the net asset value of the Fund to be to be aligned with environmental/social characteristics promoted by the Fund. The Fund does not commit to holding sustainable investments. As at 30 June 2024, 86% of the net asset value of the Fund was aligned with the E/S characteristics promoted by the Fund, and 14% was allocated to investments categorised as "#2 Other" per the Prospectus. Further details in relation to such assets is set out in the section entitled "What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?" below.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional** activities are

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Allocation
Financial service activities	75 %
Sovereign	11 %

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

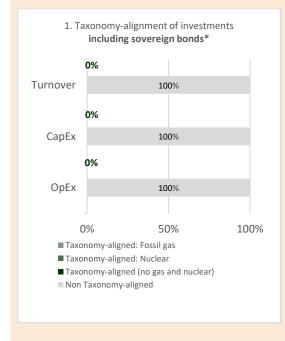

While the Fund promotes environmental and social characteristics within the meaning of Article 8 of the SFDR, it does not currently commit to investing in a minimum level of "sustainable investments" within the meaning of the SFDR and it does not currently commit to a minimum level of investments taking into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. As such, any investments that contribute to environmentally sustainable economic activities for the purposes of the Taxonomy Regulation, including investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, are held on an incidental basis and is currently estimated to be <10% based on available data.

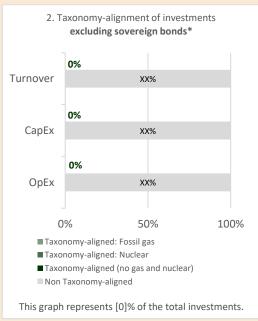

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy¹⁰⁶?

	Yes		
		In fossil gas	In nuclear energy
×	No		

¹⁰⁶ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments under #2 Other includes cash and certain derivatives, Issuers assessed as A(mber) as part of the MBS Sustainability Due Diligence process, and Issuers where there is a lack of sustainability data coverage. We do not deem an assessment of minimum environmental and social safeguards to be relevant for cash by nature of the asset class, nor derivatives where full look through is not possible. The

Co-Investment Manager continuously seeks to engage with data providers to improve coverage. A(mber) Issuers are monitored on an ongoing basis and the Co-Investment Manager engaged with these Issuers to remediate the incident and prevent further harm.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

1) Actions relating to the MBS Due Diligence

The MBS Sustainability Due Diligence framework was applied at the Issuer level. The framework incorporates an assessment of "very severe risk incidents" relating to material sustainability issues, which are considered most relevant to the MBS, ABS, or other debt security issued. An assessment of good governance at the Issuer level is integrated into the framework.

We updated the MBS Sustainability Due Diligence assessment on a quarterly basis, and used third-party ESG data, company reports, and other sources as appropriate. The due diligence was reviewed by the investment manager and internal oversight committee.

2) Actions relating to Sustainability Exclusion Criteria

The Sustainability Exclusion Criteria were assessed, on a best-efforts basis. There were no breaches of the Sustainability Exclusion Criteria during the reporting period

3) Actions relating to international norms and standards

UN Global Compact compliance was assessed, on a best-efforts basis. The Co-Investment Manager used third-party data providers' frameworks and data to categorise serious breaches, which were intended to identify credible allegations of a violation of global norms, supplemented by internal research where third-party data coverage was unavailable. There were no breaches of the UN Global Compact compliance during the period.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

- How did this financial product perform compared with the reference benchmark?

 Not applicable.
- How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: GAM Sustainable Emerging Equity (the "Fund")

Legal entity identifier: 549300ZIHQCMZKW18N16

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did th	is financial product have a sustainable	investment objective?
••	Yes	● ● ■ No
	It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective
	t made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments

All data presented in the annex which follows has been calculated based on the portfolio holdings of the Fund as at 30 June 2025 and constitutes unaudited information which has not been subject to any assurance provided by the Auditors or any third party.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

GAM Sustainable Emerging Equity (the "Financial Product" or "Fund") promoted the following environmental and social characteristics:

- 1. Incorporation of investments in companies with positive product or service alignment to the United Nations' Sustainable Development Goals ("SDGs") or companies embedding sustainability into the economic purpose of their business,
- 2. Integration of ESG risk management processes and exclusions:
 - a. Target of a weighted average carbon intensity that is materially lower than the Fund's benchmark, namely the MSCI Emerging Markets (the "Benchmark"),
 - b. Tilt towards companies with high ESG scores (focused on the management of ESG risks and opportunities) to attain an MSCI ESG Fund Rating of A or above,
 - Exclusion of companies involved in specific activities considered to cause negative environmental and/or social impact, as described in the Exclusions Criteria detailed below,
 - d. Assessed adherence to generally accepted international norms and standards set by the United Nations Global Compact (UNGC), and the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
 - e. Consideration of Principal Adverse Impacts (PAIs) on sustainability factors as detailed in Table 1 of the Commission Delegated Regulation (EU) 2022/ 1288 (the "SFDR Delegated Act"),
 - f. Investments in companies assessed to follow good governance practices,

3. Engagement with investee companies on environmental, social and governance issues as part of interactions with management, including engagements following sustainability controversies, PAI review and/or thematic engagement.

The environmental and social characteristics were promoted in line with the binding elements of the Investment Strategy of the Fund, as outlined in the Fund's Prospectus, and there were no breaches of the exclusion criteria or significant adverse impacts during the year.

No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How did the sustainability indicators perform?

The following sustainability indicators are used to measure the environmental and/or social characteristics of the Fund.

1) Indicators relating to SDG alignment

The portfolio will invest in a meaningful proportion of sustainable investments, determined by whether a company's revenue is generated from products or services positively aligned to one or more of the SDGs or their economic purpose embeds sustainability. The investment philosophy is agnostic to which SDGs companies' products or services have positive alignment to.

Sustainability Indicator	Units	Source 11	Date 1	Data coverage ²	Data estimated ³	Output ⁴
Investment in companies with positive product or service alignment to one or more SDGs - share of investments with revenue from products or services with positive alignment to one or more SDGs, or with sustainability embedded into the economic purpose of their business.	Internal assessment	Internal	30 June 2025	100%	0%	66.10%

2) Indicators relating to carbon intensity

All investments in the Fund are reviewed with respect to their carbon intensity. The Fund's investments are selected such that the weighted average carbon intensity of the Fund's portfolio is materially lower than that of the Benchmark.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

¹ Data snapshot taken at the Fund's year end. Sustainalytics and MSCI data as at 30 June 2025.

² Calculated as the proportion of investments (by NAV) for which data is available. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. Where there is less than 100% coverage, this would be due to the third party provider not covering the issuer. We engage with service providers and companies directly with the objective of increasing data coverage and disclosure. More information about MSCI's coverage can be found here. More information about Sustainalytics coverage can be found here.

³ Calculated as the proportion of investments (by NAV) for which data is estimated. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. MSCI data methodology can be found here. Information on Sustainalytics product involvement can be found here.

⁴ Calculated as the proportion of investment (by NAV). The calculation does not include assets defined under "#2 Other" in the Prospectus.

¹¹Whilst only one data source is listed, we may use further data providers to support our analysis. Please refer to our Sustainability Exclusion Policy for further details.

Sustainability Indicator	Units	Source 11	Date 5	Data coverage ⁶	Data estimated ⁷	Output ⁸
Weighted Average Carbon Intensity — calculated as the Fund portfolio's exposure to carbon-intensive companies, expressed in tons CO2e / \$M revenue. Scope 1 and Scope 2 GHG emissions are allocated based on portfolio weights (the current value of the investment relative to the current portfolio value).	tCO2e / \$M revenue	MSCI	30 June 2025	97.52%	0%	91.9

3) Indicators relating to ESG Scores

The Co-Investment Manager targets an overall MSCI ESG Fund Rating of A or above. The MSCI ESG Fund Rating is designed to assess the resilience of a fund's aggregate holdings to long-term ESG risks; highly rated funds consist of issuers with leading or improving management of key ESG risks.

Sustainability Indicator	Units	Source	Date	Data coverage	Data estimated	Output ⁹
Fund ESG Rating— overall MSCI ESG Fund Rating. A higher ESG Rating indicates the Fund's holdings are leaders in the management of long-term ESG risks.	Score	MSCI	30 June 2025	98.60%	0%	AA

4) Indicators relating to Sustainability Exclusion Criteria

Involvement in the following activities, beyond the revenue threshold specified, result in the investment being ineligible (other than where outlined in the Sustainability Exclusion Criteria within the Prospectus). No exceptions were made during the reporting period.

⁵ Data snapshot taken at the Fund's year end. Sustainalytics and MSCI data as at 26th July 2024.

⁶ Calculated as the proportion of investments (by NAV) for which data is available. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. Where there is less than 100% coverage, this would be due to the third party provider not covering the issuer. We engage with service providers and companies directly with the objective of increasing data coverage and disclosure. More information about MSCI's coverage can be found here. More information about Sustainalytics coverage can be found here.

⁷ Calculated as the proportion of investments (by NAV) for which data is estimated. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. MSCI data methodology can be found here. Information on Sustainalytics product involvement can be found here.

⁸ Calculated as the proportion of investment (by NAV). The calculation does not include assets defined under "#2 Other" in the Prospectus.

¹¹Whilst only one data source is listed, we may use further data providers to support our analysis. Please refer to our Sustainability Exclusion Policy for further details.

Involvement in oil fuels exploration, extraction, distribution, refining: Share of investments in companies involved oil fuels exploration, extraction, distribution or refining (10% or above revenue threshold).	% of Fund	MSCI	30 June 2025	100%	0%	0%
Involvement in electricity generation with GHG intensity >100 g CO2 e/kWh: Share of investments in companies involved in electricity generation with GHG intensity >100 g CO2 e/kWh (50% or above revenue threshold).	% of Fund	MSCI	30 June 2025	100%	0%	0%

5) Indicators relating to international norms and standards

Companies are expected to adhere to minimum international norms and standards as defined by the UN Global Compact and the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises. Companies assessed as having seriously breached are excluded, unless the issuer is considered to have taken substantial and adequate steps to have addressed the allegations.

No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ¹¹
Violations of UN Global Compact principles (also related to Principal Adverse Impacts): share of investments in investee companies that have been involved in violations of the UNGC principles.	% of Fund	MSCI	30 June 2025	100%	0%	0%
Violations of OECD Guidelines for Multinational Enterprises: share of investments in investee companies that have been involved in violations of the OECD Guidelines for Multinational Enterprises	% of Fund	MSCI	30 June 2025	100%	0%	0%

6) Indicators relating to Principal Adverse Impacts

The Co-Investment Manager applied an internal systematic framework to consider and take action of to mitigate of principal adverse impacts on sustainability factors.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ¹²
Scope 1 & Scope 2 Greenhouse gas (GHG) emissions: Absolute greenhouse gas emissions associated with a portfolio, expressed in tons CO2 equivalent	tCO2 e	MSCI	30 June 2025	97.52%	0%	1,561.7
Investments in companies active in fossil fuel sector: share of investments in companies active in the fossil fuel sector.	% of Fund = Yes	MSCI	30 June 2025	97.20%	0%	5.79%
Gender diversity on the Board (also related to good governance): percentage of board	Nume ric value	MSCI	30 June 2025	97.20%	0%	24.40%

¹¹ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. We use MSCI data to determine adherence to the UN Global Compact. For this data point, we are specifically looking at whether a company is deemed to 'Fail' adhering to the underlying principles. More information on MSCI's approach can be found here.

¹² Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. The was calculated using MSCl's 'SFDR Point-in-Time PASI Statement'. More information on MSCl's approach to Principal Adverse Impacts can be found https://example.com/here/.

|--|

7) Indicators relating to good governance

The investment strategy incorporates a principles-based approach when assessing good governance. The assessment informs investment decisions and is used by the Co-Investment Manager to satisfy itself that good governance practices are in place when selecting investments for the Fund. In addition, the assessment is conducted on an ongoing basis to inform voting decisions and engagement activity.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ¹³
Board independence: the percentage of board members that meet GAM's criteria for independent management, as measured by a third-party data provider. For companies with a two-tier board, the calculation is based on members of the Supervisory Board only.	Nume ric value (ratio %)	MSCI	30 June 2025	94.92%	0%	64.62%

8) Indicators relating to engagement activities

Engagement with investee companies on environmental, social and governance issues as part of interactions with management, engagements following sustainability controversies or other significant events and Thematic engagements with issuers, for example on climate-related topics.

¹³ Calculated as the proportion of investment (by NAV). The calculation does not include assets defined under "#2 Other" in the Prospectus.

¹⁴ This output is the total number of companies that the Investment Team engaged with that were held in the portfolio as at 30 June 2025. The Investment Team may have engaged with companies i) on more than one occasion, ii) for pre-investment due diligence, iii) throughout the reporting period which were sold prior to the 30 June 2025 and therefore will not be reflected here. There could also be cases when companies within the portfolio were engaged with by other investments teams that are part of GAM Holding AG where there is a cross-holding, these are also not reflected in this output.

¹²GAM's definition of engagement can be found in our Engagement Policy on our website.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

 Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
 Not applicable. The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

The actions taken in relation to the PAI indicators considered are summarised in the table below:

Indicators applicable to investments in investee companies

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Adverse sust	ainability indicator	Fund consideration			
	GHG emissions Carbon footprint GHG Intensity of investee companies	emissions among others) were reviewed as part of the investment process, and were primarily addressed in a qualitative way, for example through engagement with selected companies on reduction targets and initiatives or voting on resolutions to support greater transparency on			
Greenhouse gas emissions	energy consumption and				
		climate-related risks. Companies assessed to derive over 25% of revenue from thermal coal mining or electricity generation from thermal coal were excluded from the Fund.			
Biodiversity	7. Activities negatively affecting biodiversity-sensitive areas	Indicators in relation to a company's impact on biodiversity, including deforestation, water and			
Water	8. Emissions to water	waste, were reviewed as part of the investment			
Waste	Hazardous waste and radioactive waste ratio	process and were primarily addressed in a qualitative way, for example through engagement with selected companies.			
Social and employee matters	10. Violations of UNGC principles and OECD Guidelines for Multinational Enterprises 11. Lack of processes and compliance mechanisms to monitor compliance with UNGC priniples and OECD Guidelines for Multinational Enterprises	A range of PAI indicators were reviewed as part of the investment process. Companies assessed as severely violating UN Global Compact principles or assessed as having exposure to controversial weapons are excluded from the Fund. Board gender diversity was considered primarily within engagement and voting decisions.			

Asset allocation describes the share of investments in specific assets.

<u>_</u>	12. Unadjusted gender pay gap
7	13. Board gender diversity
(14. Exposure to controversial weapons (anti- personnel mines, cluster munitions, chemical weapons and biological weapons)

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 30 June 2025

The table above provides a snapshot of the largest investments as at 30 June 2025. This snapshot is reflective of the general portfolio composition throughout the reporting period.

The Global Industry Classification Standard is used to determine economic sectors.

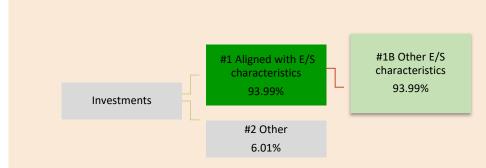

What was the proportion of sustainability-related investments?

N/A. Information on the proportion of the Fund which promoted environmental/social characteristics during the reference period is provided below.

What was the asset allocation?

All assets excluding cash/cash equivalent instruments and/or certain derivatives are aligned with environmental/social characteristics of the Fund. As at 30 June 2025 (snapshot at year-end), 93.99% of the Fund was aligned with the E/S characteristics of the Fund, while 6.01 % was in assets categorised as #2 Other in accordance with the Prospectus. Further details in relation to such assets is set out in the section entitled "What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social

- **#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2** Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

safeguards?" below.

Sector	Allocation
Financials	29.76 %
Consumer Discretionary	20.47 %
Information Technology	19.49 %
Communication Services	8.07 %
Industrials	4.62 %
Energy	4.43 %
Materials	3.07 %
Real Estate	2.28 %
Health Care	0.99 %
Consumer Staples	0.81 %

The Global Industry Classification Standard is used to determine economic sectors.

In which economic sectors were the investments made?

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, , e.g.
 relevant for a
 transition to a
 green economy.
- operational
 expenditure
 (OpEx) reflecting
 the green
 operational
 activities of
 investee
 companies.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional** activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Did the financial product invest in fossil gas and / or nuclear energy related activities

While the Fund promotes environmental and social characteristics within the meaning of Article 8 of the SFDR, it does not currently commit to investing in a minimum level of "sustainable investments" within the meaning of the SFDR and it does not currently commit to a minimum level of investments taking into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. As such, any investments that contribute to environmentally sustainable economic activities for the purposes of the Taxonomy Regulation, including investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, are held on an incidental basis and is currently estimated to be <10% based on available data.

that comply with the EU Taxonomy¹⁵?

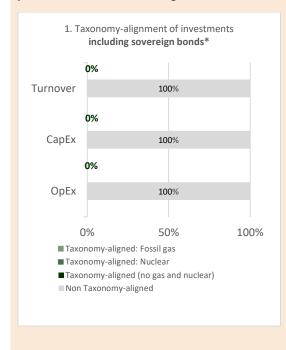

Yes

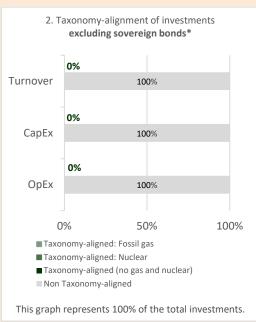

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomyalignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹⁵ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

oner" invvestments of the Fund included cash / cash equivalents and / or certain derivatives for liquidity and efficient management of the Fund. An assessment of minimum environmental and social safeguards is deemed not to be relevant for cash and cash equivalents by nature of the asset class, nor derivatives where full look through is not possible.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

1) Actions relating to SDG alignment

Assessments on SDG alignment is conducted pre-investment by the investment team. The Responsible Investment team provide independent oversight of this process and conduct their own review post-trade.

2) Actions relating to carbon intensity

Assessments of carbon intensity of investee companies were conducted quarterly using third-party data. Carbon intensity values were also assessed as part of the stock selection process, ongoing Fund monitoring and to inform engagement.

3) Actions relating to ESG Fund Rating

The Co-Investment Manager assessed ESG Scores as part of the stock selection process, ongoing Fund monitoring, and to inform engagement.

4) Actions relating to Sustainability Exclusion Criteria

The Sustainability Exclusion Criteria were assessed, on a best-efforts basis, as part of investment controlling, using Sustainalytics. There were no breaches of the Sustainability Exclusion Criteria during the reporting period

5) Indicators relating to international norms and standards

UN Global Compact compliance was assessed, on a best-efforts basis, as part of investment controlling. The Investment Manager used third-party data providers' frameworks and data to categorise serious breaches, which were intended to identify credible allegations of a violation of global norms, supplemented by internal research where third-party data coverage was unavailable. There were no breaches of the UN Global Compact compliance during the period.

6) Indicators relating to Principal Adverse Impacts

The Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

Greenhouse gas emissions and involvement in fossil fuel sector – a range of indicators in relation to company GHG emissions and carbon emission reduction initiatives (including Scope 1 & Scope 2 GHG emissions among others) were reviewed as part of the investment process, and were primarily addressed in a qualitative way, for example through engagement with selected companies on reduction targets and initiatives or voting on resolutions to support greater transparency on climate-related risks. Companies assessed to derive over 25% of revenue from thermal coal mining or electricity generation from thermal coal were excluded from the Fund.

Biodiversity, water & waste – indicators in relation to a company's impact on biodiversity, including deforestation, water and waste, were reviewed as part of the investment process and were primarily addressed in a qualitative way, for example through engagement with selected companies

Social and employee matters – a range of PAI indicators were reviewed as part of the investment process. Companies assessed as severely violating UN Global Compact principles or assessed as having exposure to controversial weapons are excluded from the Fund. Board gender diversity was considered primarily within engagement and voting decisions.

7) Indicators relating to good governance

The investment Manager incorporated a principles-based approach when assessing good governance. The assessment informed investment decisions and was used by the Co-Investment Manager to satisfy itself that good governance practices were in place when selecting investments for the Fund. In addition, the assessment was conducted on an ongoing basis to inform voting decisions and engagement activity. This included consideration of board structure and independence, alignment of remuneration, transparency of ownership and control, audit and accounting. Good governance was assessed in a qualitative and/or quantitative way dependent on the relevance of the specific indicator. This included:

- Sound management structures including Board independence, Board diversity and audit committee independence
- Employee relations in particular any serious breaches of UN Global Compact principles are excluded
- Remuneration of staff
- Tax compliance in particular any companies flagged for significant tax violations

In addition, good governance was supported by ensuring companies adhere to minimum standards as defined by the ten principles of the United Nations Global Compact, which cover anti-corruption (Principle 10) and labour rights (Principles 3-6) and well as environmental governance (Principles 7-9).

8) Indicators relating to engagement activities

The Co-investment Manager engaged with investee companies on environmental, social and governance issues as part of interactions with management, including engagements following sustainability controversies, PAI review and/or thematic engagement

The investment team maintains a record of all their key ESG engagement activities during the year and also upload its engagement activities as Bloomberg notes – as part of GAM general engagement recording process. During the year, there was 12 companies that were engaged with on ESG-related matters.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How does the reference benchmark differ from a broad market index?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: GAM Sustainable Climate Bond (the "Fund")

Legal entity identifier: 5493007KJSYSWBPW5518

Sustainable investment objective

All data presented in the annex which follows has been calculated based on the portfolio holdings of the Fund as at 30 June 2025 and constitutes unaudited information which has not been subject to any assurance provided by the Auditors or any third party.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities.

That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

To what extent was the sustainable investment objective of this financial product met?

The sustainable investment objective of the Fund is to contribute to the environmental objectives of climate change mitigation/climate change adaptation. 91% of the Fund invested in climate change mitigation and climate change adaptation projects. 122

The Fund achieved its investment objective through investment principally in Green Bonds (or Sustainability Bonds, Social Bonds, and Transition Bonds) that contributed to positive environmental or social impact issued by companies in the financial sector which aimed to generate environmental and/or social impact alongside a financial return. A range of green projects were financed including projects for renewable energy production; green buildings; sustainable transport; water and waste management; eco-efficient and circular economy solutions; and such other environmental projects that Atlanticomnium SA (the "Delegate Investment Manager") determined as relevant. There were also social projects as a result of investment in Sustainability and/or Social bonds. The Fund is invested in green bonds at 90% and sustainability bonds at 10%.

The sustainable objective was targeted in line with the binding elements of the investment strategy of the Fund, as outlined in the Fund's Prospectus, and there were no breaches of the exclusion criteria or significant adverse impacts during the year.

No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How did the sustainability indicators perform?

The following sustainability indicators are used to measure the attainment of the sustainable investment objectives of the Fund. The coverage excludes assets classified as "#Not sustainable".

1) Indicators relating to climate change mitigation/climate change adaptation

The following indicators relate to the environmental objective of the Fund, which is achieved through the investment in Green Bonds (or Sustainability Bonds, Social Bonds, and Transition Bonds).

Sustainability Indicator	Units	Source	Date 123	Cove rage	Proportio n of data estimated	Output
Alignment with ICMA Green Bond Principles, Sustainability Bond Guidelines and/ Social Bond Principles, or equivalent: proportion of investments aligned to these principles.	% of Fund	Bloomberg ¹²⁶	30 June 2025	100%	NA	90% of the Fund in green bonds, 10% in sustainabilit y bonds
Alignment with EU Taxonomy: proportion of sustainable investments with an environmental objective	% of Fund	Internal Analysis ¹²⁷	30 June 2025	100%	NA	29%

¹²² Investments attributed to projects classified as green buildings, renewable energy, sustainable transport and energy efficiency. Calculated as the proportion of investments (by NAV) for which data is available. The calculation does not include assets defined under "#2 Other" in the Prospectus.

¹²³ Data snapshot taken at the Fund's year end.

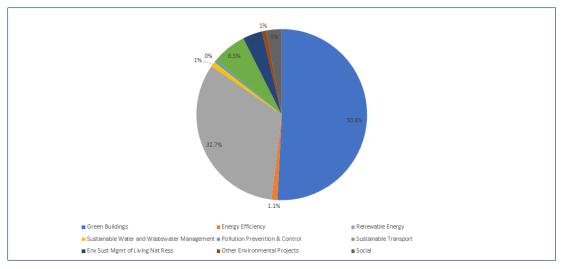

¹²⁴ Calculated as the proportion of investments (by NAV) for which data is available. The calculation does not include assets defined under "#2 Other" in the Prospectus.

¹²⁵ Calculated as the proportion of investments (by NAV) for which data is available. The calculation does not include assets defined under "#2 Other" in the Prospectus.

¹²⁶ Data snapshot taken at the Fund's year end (30 June 2025). Bloomberg Data (Bloomberg classifications) accessed on 23rd July 2025.

¹²⁷ Data snapshot taken at the Fund's year end (30 June 2025). Internal analysis was carried out by the Designated Investment Manager.

that is aligned with the EU Taxonomy.						
Type of project: split by green and/social activity aligned with ICMA principles or equivalent	Categor y	Internal Analysis ⁵	30 June 2025	96%	NA	See chart below
CO ₂ Emissions Avoided: avoided emissions from projects financed	tCO ₂ e	S&P Trucost (S&P Global Sustainabl e1), Internal Analysis ¹²⁸	30 June 2025	90%	17%	3,137
GWh of renewable capacity generated: renewable energy geneated from projects financed	MWh	S&P Trucost (S&P Global Sustainabl e1), Internal Analysis ⁵	30 June 2025	90%	17%	Generated: 72
M² of green buildings financed: square meters of green buildings financed	M ²	S&P Trucost (S&P Global Sustainabl e1), Internal Analysis ⁵	30 June 2025	90%	17%	Financed: 3,135

The projects were selected based on the green bond assessment framework that is designed to identify green bonds and other 'impact' bonds that will deliver meaningful impact. The Delegate Investment Manager's framework recognizes the ICMA Green Bond Principles (June 2021) and builds on an

¹²⁸ Data snapshot taken at the Fund's year end (30 June 2025), using data provided by S&P Trucost for end 2024 analysis. Data is based on 90% of holdings (excluding cash). 72% of the data covered is based on S&P Trucost average whereas for 17% coverage the data was estimated based on the project types and data from the same issuers. 10% of the portfolio includes new issuers that were not covered in the end December 2024 holdings analysed by S&P Trucost and hence not able to be included in this report, or green bonds of existing issuers that are allocated to a different pool of projects (and hence no estimate can be made). Where several green bonds from the same issuer are allocated to the same pool of projects, data was extrapolated from other bonds of the same issuer where possible.

approach consistent with our investment philosophy – bottom-up research-intensive and adding value through engagement.

The Fund (excluding cash & others of c4%), is mainly invested in green bonds (90%) and sustainability bonds (10%). This reflects the objective of the Fund to generate a positive environmental impact by investing in labelled bonds and providing visibility on the 'use of proceeds' and key metrics associated with these bonds. The largest categories financed are Green Buildings (51%) and Renewable Energy (33%). Through the investment in sustainability bonds, 3% of proceeds relate to projects with a positive social impact. The project breakdown is based on the portfolio holdings as at 30.06.2025 and based on Delegate Investment Manager's internal data and company documents.

2) Indicators relating to Sustainability Exclusion Criteria at issuer level

Involvement by the issuer in the following activities, beyond the revenue threshold specified, would result in the investment being ineligible (other than where outlined in the GAM Sustainability Exclusions Policy). The following exclusion criteria strengthens the avoidance of significant harm to other sustainability factors ("DNSH" criteria).

Sustainability Indicator	Units	Source ¹²⁹	Date	Coverage	Proportion of data estimated	Output
Involvement in any activities related to controversial weapons: share of investments in investee companies involved in any activities related to the manufacture or selling of antipersonnel mines, biological and chemical weapons, and cluster munitions.	% of Fund	Sustainalytics, MSCI	30 June 2025	100%	0%	0%
Involvement in the manufacture of incendiary weapons, blinding laser weapons, or non-detectable fragments: share of investments in investee companies involved in the manufacture of whole weapons systems, dual use components, intended use components, or smart weapons related to incendiary (white phosphorus) weapons, blinding laser weapons, or nondetectable fragments.	% of Fund	Sustainalytics, MSCI	30 June 2025	100%	0%	0%
Involvement in nuclear weapons manufacturing: share of investments in investee	% of Fund	Sustainalytics, MSCI	30 June 2025	100%	0%	0%

3) Indicators relating to international norms and standards at issuer level

Companies are expected to adhere to minimum international norms and standards as defined by the United Nations Global Compact (the "UN Global Compact"). Companies assessed as having seriously breached the UN Global Compact are excluded, unless the issuer is considered to have taken substantial and adequate steps to have addressed the allegations. UN Global Compact adherence strengthens the avoidance of significant harm to other sustainability factors ("DNSH" criteria) and alignment with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Sustainability Indicator	Units	Source	Date	Coverage	Proportion of data estimated	Output
Violations of UN Global Compact principles (also related to Principal Adverse Impacts): share of investments in investee companies that have been involved in violations of the UNGC principles.	% of Fund	MSCI 130	30 June 2025	100%	0%	0%
Violations of OECD Guidelines for Multinational Enterprises: share of investments in investee companies that have been involved in violations of the OECD Guidelines for Multinational Enterprises.	% of Fund	MSCI	30 June 2025	100%	0%	0%

4) Indicators relating to Principal Adverse Impacts at issuer level

The following indicators for adverse impacts, from Tables 1 of Annex I of Commission Delegated Regulation (EU) 2022/ 1288 (the "SFDR Delegated Act"), are reported as a minimum. This list may be expanded over time. These indicators are reported for the issuers of green, sustainability and/or social bonds and thus not at the bond/project level.

Sustainability Indicator	Units	Source	Date	Coverage	Proportion of data estimated	Output
Scope 1 & Scope 2 Greenhouse gas (GHG) emissions: Absolute greenhouse gas emissions associated with a portfolio, expressed in tons CO2 equivalent.	tCO2e	MSCI 131	30 June 2025	100%	0%	8.9
Investments in companies active in fossil fuel sector: share of investments in companies active in the fossil fuel sector.	% of Fund	MSCI ⁹	30 June 2025	100%	0%	0%
Gender diversity on the Board (also included in good governance): percentage of board members who are female. For companies with a two-tier board, the calculation is based on members of the Supervisory Board only.	Numeric value (ratio %)	MSCI ⁹	30 June 2025	100%	0%	43.76%

Based on the values of the three principal adverse impact indicators in the table above, we consider the portfolio holdings meet the 'do no significant harm' provision. These values are collected and will be compared with next year's Fund data for a year-on-year comparison. The absolute emissions at Scope 1 and 2 are relatively low due to the Fund's focus on the financial sector. The gender diversity on the

 $^{^{\}rm 131}$ Data snapshot taken at the Fund's year end. MSCI data as at 30 June 2025.

boards of the Fund's investee companies is more than 1.5 times higher than the average of 25% (based on OECD¹³² report on 50 jurisdictions)

5) Indicators relating to good governance at issuer level

The investment strategy of the Fund incorporates a principles-based approach when assessing good governance. The assessment informs investment decisions and is used by the Delegate Investment Manager to satisfy itself that good governance practices are in place when selecting investments for the Fund. This assessment is at the issuer level and not at the bond/project level.

Sustainability Indicator	Units	Source	Date	Coverage	Proportion of data estimated	Output
Board independence: the percentage of board members that meet GAM's criteria for independent management, as measured by a third-party data provider. *Type of project, 2024:

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Delegate Investment Manager's internal Green Bond Assessment Framework ("the Framework") considers 'do no significant harm' as a minimum criteria in the context of projects financed by the Green, Sustainability Bonds, Social Bonds, and Transition Bonds invested at the green bond and issuer level. These processes are intended to mitigate the risk that that investments in the Fund are not in contradiction with the sustainable investment objectives.

An analysis of each issuing entity's ESG profile was performed to avoid issuers contributing to significant harm. The analysis of an issuer's ESG credentials included consideration and monitoring of the principal adverse impacts (PAIs), as detailed in Table 1 of Annex 1 of the SFDR Delegated Act and in some cases involved consideration of those in Tables 2 and 3. This was done both with an in-depth analysis of the indicators and on an ongoing basis through the monitoring of controversies.

The Sustainability Exclusion Criteria and assessed adherence to the UN Global Compact detailed principles strengthened the avoidance of harmful impacts through the avoidance of certain sectors and activities.

At the green bond level, the Framework included an analysis of the governance and processes surrounding the selection of green projects by the issuer. This included an analysis of processes in place to assess and mitigate potential harmful impact on sustainability factors.

The Delegate Investment Manager engaged with issuers on strengthening transparency around taxonomy and 'do no significant harm' requirements, within their green, sustainable, social and/or transition bond frameworks and post-issuance reporting.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Fund considered the indicators for principal adverse impacts on sustainability factors, within the ESG scoring framework and Sustainability Exclusion Criteria at the issuer level, and within the overall impact of the green, social and /or transition projects financed.

For issuer-level ESG quality, the particular focus was on climate impact, employee issues, governance and other PAIs, as detailed in Table 1 of Annex 1 of the SFDR Delegated Act. These were taken into account within the Framework used by the Delegate Investment Manager.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The Fund applied Sustainability Exclusion Criteria and exclusions relating to UN Global Compact violations to restrict investment into issuers whose conduct may result in negative impacts on sustainability factors.

At the green bond level, the Framework included an analysis of the governance and processes surrounding the selection of green projects by the issuer. This included an analysis of processes in place to assess and mitigate potential harmful impact on sustainability factors.

The specific PAIs considered are disclosed in the table below in response to question "How did this financial product consider principal adverse impacts on sustainability factors?".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund was aligned with both the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights.

This was achieved through the exclusion of issuers involved in serious violation of the UN Global Compact and other fundamental conventions outlined above, the application of internal ESG analysis according to GAM's internal Framework, investment due diligence and issuer engagement.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts (PAIs), as detailed in Table 1, and the additional indicators in Tables 2 and 3 of Annex 1 of the SFDR Delegated Act, on sustainability factors in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data. The PAI indicators were taken into account within the ESG analysis used to assess potential investments and determine whether there were potential negative impacts associated with the investment, both at the issuer and project level.

The Delegate Investment Manager excluded companies involved in the manufacturing of controversial weapons (anti-personnel mines, cluster munitions, biological and chemical weapons), certain types of fossil fuel exposure and any serious breaches of the ten UN Global Compact principles (see Sustainability Exclusions).

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 30 June 2025

Adverse sustainabil	ity indicator	Actions	
	1. GHG emissions	A range of indicators in relation to company	
	2. Carbon footprint	GHG emissions and carbon emission	
	3. GHG intensity of investee companies	reduction initiatives (including Scope 1 &	
Greenhouse Gas	4. Exposure to companies active in the fossil fuel sector	 Scope 2 GHG emissions among others) were reviewed as part of the investment process. 	
Emissions	5. Share of non-renewable energy consumption and production	In addition, companies assessed to derive	
	6. Energy consumption intensity per high impact climate sector	over 5% of revenue from thermal coa mining or electricity generation from thermal coal are excluded from the Fund.	
	7. Activities negatively affecting biodiversity-sensitive areas	Indicators in relation to a company's impact on biodiversity, including deforestation water and waste, were reviewed as part of the investment process and were primarily addressed in a qualitative way through	
Biodiversity, water and waste	8. Emissions to water	Atlanticomium's internal ESG profiles and models as well as part of the climate related engagements. ESG profiles: a proprietary scoring tool to assess material ESG for each sector. The output is an ESG Risk Assessment, ranging from Very Low Risk to Very High Risk. Each aspect (E, S, G) is also individually rated, from Very Low to Very High Risk. Climate related engagements: based on Atlanticomnium's green bond assessment framework with clear expectations, 2024 engagements were focused on engaging on	
	9. Hazardous waste and radioactive waste ratio	issuers' ESG and climate strategies, as well

The table above provides a snapshot of the largest investments as at 30 June 2025. This snapshot is reflective of the general portfolio composition throughout the reporting period including assets classified as "#Not sustainable" (i.e. all investments of the Fund).

The Global Industry Classification Standard is used to determine economic sectors.

Asset allocation describes the share of investments in specific assets.

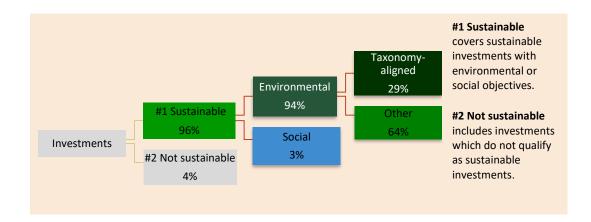

What was the proportion of sustainability-related investments?

Information on the proportion of the Fund which promoted environmental/social characteristics during the reference period (30 June 2025) is provided below. 91 % of the Fund invested n adaptation and mitigation projects¹³³.

What was the asset allocation?

The Fund allocated 97% of its investments to sustainable investments with an environmental objective and 3% to sustainable investments with a social objective. It was calculated that 29% of investments of the Fund were aligned with the EU Taxonomy on such basis as further detailed below.

See reponse below to the Question titled "What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards" for information on the non-sustainable investments of the Fund.

In which economic sectors were the investments made?

The Fund primarily invests in bonds from issuers within the financial services sector.

Sector	Allocation		
Banks	78.07%		
Insurance	18.37%		
Cash and Hedges	3.5%		

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Given the very recent introduction of taxonomy, data availability on taxonomy alignment is currently challenging. While some issuers have started reporting, overall data on taxonomy alignment remains limited. Nevertheless, given the nature of the portfolio and our regulatory obligation to disclose a proportion of investments that are taxonomy aligned we have conducted an initial analysis of the portfolio.

While data on taxonomy alignment is limited, and noting the challenges outlined in this section, we have calculated that the proportion of investments in environmentally sustainable economic activities aligned with the EU Taxonomy (including in transitional and enabling activities) is 28% of the portfolio based on currently available data.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

directly enable other activities to make a substantial

Enabling activities

contribution to an environmental objective

are economic

activities for which low-carbon alternatives are not yet available and that

Transitional activities

have greenhouse gas emission levels corresponding to the best performance.

¹³³Investments attributed to projects classified as green buildings, renewable energy, sustainable transport and energy efficiency.

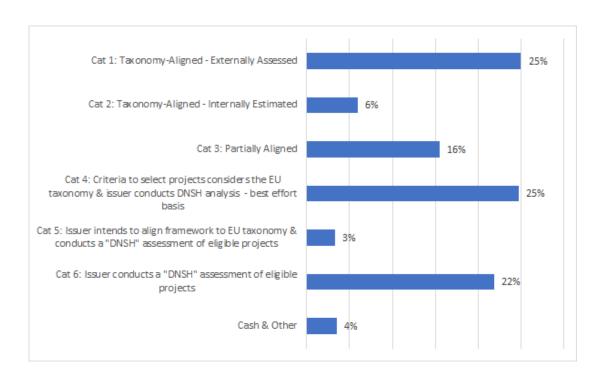

Moreover, we have conducted a detailed review of green bond reporting and documentation to assess alignment to the EU taxonomy.

These have been split into six categories:

Category 1: For 25% of holdings, the issuer's criteria for project selection and do no significant harm assessment are fully aligned with the EU taxonomy and alignment is externally assessed as part of pre-issuance verification/review (typically by a recognized ESG provider such as Sustainalytics or ISS).

Category 2: For 6% of holdings, proceeds are taxonomy-aligned, based on internal analysis conducted. Taxonomy alignment has been estimated using 2023-end taxonomy disclosures of issuers and mapping the volume of taxonomyaligned assets on the issuers' balance sheet (for each category of assets), to green bond proceeds. Based on the assumption that the majority of taxonomy-aligned assets on issuers' balance sheets will be those allocated to issuers' green bonds, we estimate the percentage alignment of the green bond. The assessment is done only where data availability allows to map project types and ensure geographic overlap. As a result this has only been done only for green mortgages and renewable energy projects for a small number of issuers (8 issuers).

Based on the above analysis, 100% of the proceeds of holdings in category 1 would be aligned to the EU taxonomy given that there has been an external verification on the alignment to the EU taxonomy either at the pre- or post-issuance level. Moreover, we conservatively estimate that 75% of the proceeds of holdings in category 2 would be aligned to the EU taxonomy based on our internal analysis. This implies that taxonomy alignment of the fund would be at least 29% (25% in category 1 and 75% of 6% in category 2), above the estimated 25% share stated above. For the rest of the projects, although we believe a material share would be aligned with the taxonomy, data limitations prevent us from estimating percentage aligned. Note that we expect taxonomy alignment to be materially above the 25% level, as the majority of proceeds financed by green bonds in the portfolio are in scope of the EU taxonomy.

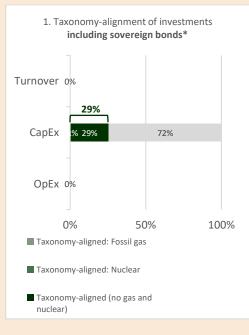

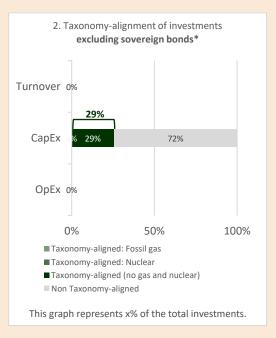

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies
- capital
 expenditure
 (CapEx) showing
 the green
 investments
 made by investee
 companies, e.g.
 for a transition to
 a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Information on taxonomy alignment based on investee company turnover and OpEx is not relevant as the Fund assesses taxonomy alignment based on the level of the use of proceeds (project level), not the investee company / issuer level.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹³⁴?

Yes:

In fossil gas

In nuclear energy

No

None of the taxonomy aligned investments are related to fossil gas or nuclear energy.

What was the share of investments made in transitional and enabling activities?

It is estimated that <5% of the Fund invests in projects in transitional and enabling activities. Data availability on taxonomy alignment is currently challenging. While some issuers have started reporting, overall data on taxonomy alignment remains limited.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

2024	2025	

¹³⁴ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

EU Taxonomy Alignment	Including	Exclusing	Including	Exclusing
	Sovereign	Sovereign	Sovereign	Sovereign
	Bonds	Bonds	Bonds	Bonds
Percentage of investments aligned with the EU Taxonomy	28%	28%	29%	29%

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

65% on the basis of the calculation detailed above for determing the percentage of investments of the Fund that were taxonomy aligned.

What was the share of socially sustainable investments?

The share of socially sustainable investments is 3% of the Fund's AUM. These investments include projects such as Affordable Basic Infrastructure, Social & Affordable Housing and Access to Essential Services.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The Fund only allocates to securities to cash deposits, cash equivalents, certificates of deposits, Money Market Instruments and / or derivatives, at the discretion of the Delegate Investment Manager.

Cash deposits, cash equivalents, certificates of deposits, money market instruments and/or derivatives were used for liquidity and hedging purposes, and are included under #2 Not Sustainable. All investments are aligned with the Fund's sustainable investment objective and the Fund's Green Bond Assessment Framework.

What actions have been taken to attain the sustainable investment objective during the reference period?

1) Actions relating to the sustainable objective

The investment objective of the Fund is to achieve long term income and capital gain in Euro, by investing in "Impact Bonds" with a positive environmental or social impact. The Fund sought to achieve this investment objective through investment principally in Impact Bonds issued by companies in the financial sector which aim to generate social and/or environmental impact alongside a financial return. Impact Bonds are defined in the Fund's Supplement as bonds which have a specific environmental, social and governance purpose and include, but are not limited to, Green Bonds, Social Bonds, Sustainability Bonds and Transition Bonds that contribute to positive environmental or social impact.

Positive environmental impact was generated by investing in green and impact bonds where proceeds could only be allocated to green projects such as renewable energy or green buildings. Green bonds provide investors with visibility on the use of proceeds and a measurable impact.

The Fund invested mainly in green bonds from the financial sector, namely banks and insurers. This is based on a conviction that the financial sector has a pivotal role to play in the environmental transition. The European banking sector has tremendous impact potential as it finances the bulk of the economy, at around 80% of corporates.

The Fund sought to offer attractive returns by investing across the capital structure, in both senior and subordinated green bonds of financials. This may allow pickup in spread and yield compared to the Euro Investment Grade Corporate Bond market. The Fund was conservatively managed, aiming for a strong investment grade rating.

2) Actions relating to avoidance of significant harm

a. Sustainability Exclusion Criteria

The Sustainability Exclusion Criteria were programmed, on a best-efforts basis, into the investment controls, using information from independent ESG rating providers and recognised third party sources. There were no breaches of the Sustainability Exclusion Criteria during the period.

b. International norms and standards

UN Global Compact compliance was programmed, on a best-efforts basis, into the investment controls, drawing on information from independent ESG rating providers and recognised third party sources and internal research as necessary. The Delegate Investment Manager used a third-party data provider's framework and data to categorise serious breaches, which are intended to identify credible allegations of a violation of global norms.

c. Principal Adverse Impacts

The Fund considered principal adverse impacts (PAIs), as detailed in Table 1, and the additional indicators in Tables 2 and 3 of Annex 1 of the SFDR Delegated Act, on sustainability factors in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data. The PAI indicators were taken into account within the ESG analysis used to assess potential investments and determine whether there are potential negative impacts associated with the investment, both at the issuer and project level.

The Delegate Investment Manager excluded companies involved in the manufacturing of controversial weapons (anti-personnel mines, cluster munitions, biological and chemical weapons), certain types of fossil fuel exposure and any serious breaches of the ten UN Global Compact principles (see Sustainability Exclusions).

3) Actions relating to good governance

The governance practices of issuers were examined as part of the Issuer ESG Quality assessment, which is part of the Green Bond Assessment Framework in relation to the management and oversight of the bond proceeds. The assessment informed investment decisions and was used by the Delegate Investment Manager to satisfy itself that good governance practices were in place when selecting investments for the Fund.

The Issuer ESG Quality assessment included consideration of board structure and organization, risk management and oversight, remuneration, auditors, ethics, transparency and controversies. Issuers are rated from Very Low Risk to Very High Risk, and issuers rated as High Risk or Very High Risk would not be eligible for investment.

4) Actions relating to engagement activities

Engagement underpins the Delegate Investment Manager's Green Bond Framework Assessment. Issuers were selected for engagement as a result of sustainability controversies, PAI review and/or other thematic review.

Where issuers did not meet the minimum requirements of the Green Bond Assessment Framework the Designated Investment Manager engaged with the issuers. These engagements aimed to improve the robustness, transparency and accuracy of issuers in alignment with the objective of the Fund.
